Heidi Stringham, Asst. to Pres, Richfield  
Meagan White, Controller

### *Others*

Collin Overton, Sanpete Messenger  
Morris Haggerty, Legal Counsel  
Blaine Hansen, Legal Counsel Law Cle

---

### Welcome and Pledge of Allegiance

Chair Bushnell called the meeting to order and asked Trustee McLean to lead the group in the pledge of allegiance.

### Minutes from the Previous Meeting

Chair Bushnell entertained a motion to approve the minutes from the March 15, 2019 and April 16, 2019 meetings. Trustee Cox so moved. Trustee May seconded the motion, and it passed unanimously.

### College Highlight and Recognition

Dr. Hood introduced David Allred and Don Saltzman and recognized their work with the new general education foundations course. They shared a presentation, and trustees commended them for their collaborative, creative work.

Because this was the last meeting of several in attendance, President Cook took the opportunity to also recognize Craig Mathie, Trustee McLean, and Chair Bushnell. The group expressed appreciation for Vice President Mathie's decades of service to public and higher education, and Trustee McLean and Chair Bushnell's dedicated service was noted. A small gift of appreciation was presented to each honoree.

### Proposed 2019-2020 Institutional Budget

Vice President Dettinger reviewed the budget narrative provided in the prepared material (archived with the meeting minutes) and highlighted categories that will be funded with the new \$2.1 million in the general fund. Trustee Robinson made a motion to approve the proposed 2020 budget as presented by Vice President Dettinger. Trustee Cox seconded the motion, and it passed unanimously.

### Committees of the Board of Trustees

Chair Bushnell said the USHE auditor suggested having an Audit Committee separate from the Finance and Facilities Committee for the Board of Trustees. Wayne Bushman, Snow's internal auditor, said he likes this idea because it gives him the ability to discuss sensitive issues in a private setting and still be transparent. Trustee Robinson made a motion to add an Audit Committee to the subcommittee of the Board of Trustees and amend the by-laws of the board. Vice Chair Kiesel seconded the motion, and it passed unanimously. This action item will be added to the next Board of Trustees' agenda.

### Report from the Finance and Facilities/Audit Committee

Committee Chair Robinson reported on the Finance and Facilities Committee meeting by making a motion to approve the presented account write-offs, the Music Department Audit, and the Cash Handling Audit. He thanked staff in the Business Office and Internal Auditor for their good work. Trustee Cox made a motion to second the motion, and it passed unanimously. Trustee Robinson also informed the trustees that Mr. Bushman had updated the group on the 2019 Audit Plan.

### Report from the Academic and Student Affairs Committee

Committee Chair May chaired the committee meeting and made the following motions to the full board: She moved approval of the certificate of proficiency in Communications. The motion was seconded by Trustee Scheffner and passed unanimously. She

moved approval of the birth and adoption policy (seconded by Trustee Cox) and the death benefit policy (seconded by Trustee McLean), and all motions carried unanimously

As an information item, Dr. Hood updated the trustees on program possibilities, on-line courses, and competency based learning opportunities. Vice President Mathie introduced Jason Springer who will serve as interim Vice President, and Assistant Vice President Clawson gave a brief enrollment report and shared her team's tactics to try to increase yield. Vice President Mathie said as the college celebrates the 20<sup>th</sup> Anniversary of the two campus merge, the need for student housing in Richfield is more evident as ever. He said the working group will continue to pursue opportunities there.

#### **Update on Accreditation Preparation**

Vice President Hood gave a brief overview of the accreditation process and cycle and welcomed Dr. Beckie Hermansen to share an update on preparation efforts currently underway. Dr. Hermansen said the college is on target for the upcoming visit and provided a significant amount of data the trustees can use as reference material.

#### **Report from the Student Body President**

Chair Bushnell welcomed President Scheffner to the meeting in his official new capacity. Trustee Scheffner said he hopes to increase unity among clubs, focus on mental health, and improve retention rates this year. Chair Bushnell thanked Trustee Scheffner for making retention and personal connections a top priority.

#### **Report from the Chair**

For his final report, Chair Bushnell expressed appreciation "to every president, every professor, and every student who has been a part of Snow" and challenged each person in attendance to think about how they can do their part to make sure all students receive the "personal, absolute finest educational experience" at Snow College. He sincerely and emotionally shared his gratitude for the opportunity to serve on the board and asked that his deep personal appreciation for past and present administrations, with a special thanks to board secretary Marci Larsen, be noted. President Cook again thanked Chair Bushnell for his years of service, and the group joined in showing their appreciation with several nice comments and a round of applause.

#### **Report from the President**

Because this was the first Board of Trustees meeting of President Cook's tenure, he and his wife, Jen, took the opportunity to more formally introduce themselves to the board and express their appreciation. President Cook said thirty-five years ago he felt something on campus as a student, and he said it's an honor to be back in this capacity. His wife, Jen, expressed their thanks for the welcome they have received. She said her career has been with K-12 and added this experience at the college is a privilege. The Cooks said they view this assignment as a partnership, and President Cook spent the remaining time of his report sharing his vision for the college.

President Cook informed the trustees that in honor of the 131<sup>st</sup> anniversary of the college, he has dedicated his first 131 days in office to a listening tour. He said he has been meeting with legislators, regents, trustees, community members, employees, and students, and he shared his desire to listen and learn in an open, collaborative way. He provided preliminary results of the employee survey and passionately declared the importance of providing an affordable, accessible, relevant, personal, high-quality education to traditional students and non-traditional students. He shared his philosophy of expanding the moral mission, reiterated the need to deepen and sustain the two-year, face-to-face, residential, personalized, high-touch experience, and explained the need to diversify offerings via on-line, partnerships, and flexible scheduling. President Cook declared a need to forecast and strategize on growth, and he asked trustees for feedback. Trustees responded positively and thanked President Cook for his energy and vision.

#### **Adjournment**

Vice Chair Kiesel made a motion to adjourn. Trustee May seconded the motion, and – with a unanimous vote – the meeting adjourned at 3:17 pm.

---

Marci Larsen, Board Secretary

## BYLAWS OF THE SNOW COLLEGE BOARD OF TRUSTEES

### ARTICLE I – MEMBERSHIP

- 1.1 The membership of the Snow College Board of Trustees consists of ten persons, eight of whom are appointed by the Governor with the consent of the Senate. The President of the Snow College Alumni Association serves as the ninth member, and the President of the Associated Students of Snow College serves as the tenth member of the Board. (Utah Code 53B-2-104)
- 1.2 The eight appointed members serve for four-year terms, four expiring on June 30 of each odd-numbered year. The two ex officio members serve for the terms of their respective offices.
- 1.3 Appointments made in filling a vacancy occurring before the expiration of the term shall be made for the remainder of the unexpired term. Regardless of the termination date of the term of office, all members shall continue to hold office until their successors have been appointed and qualified.
- 1.4 Each member shall take the official oath of office prior to assuming the office. The oath shall be filed with the Division of Archives and Records Services.
- 1.5 Each member of the Board of Trustees shall receive an honorarium as provided by law as compensation for services for attending meetings of the Board of Trustees. Each member shall also be paid actual expenses incurred in attending to the authorized business of the Board of Trustees, if payment is authorized and approved by the Regents.

### ARTICLE II – OFFICERS OF THE BOARD

- 2.1 The Board shall elect from its members a Chair who shall be the presiding officer of the Board. The Chair shall be elected at the July meeting of the Board at each odd-numbered year. He/she shall serve for a term of two years and until a successor is elected and qualified. The Chair shall preside at all meetings of the Board and, as directed by the Board, shall have such other duties, powers, and responsibilities as are assigned. If no meeting is held in July, the election shall take place during the next scheduled meeting.
- 2.2 The Board shall elect from its members a Vice Chair who shall act as and perform the duties of the Chair in the latter's absence. The Vice Chair shall be elected at the July meeting of the Board at each odd-numbered year. He/she shall serve for a term of two years and until a successor is elected and qualified. The Vice Chair shall have such other duties, powers, and

responsibilities as may be assigned by the Chair or by the Board. If no meeting is held in July, the election shall take place during the next scheduled meeting.

- 2.3 The Board shall elect a Secretary who need not be a member of the Board and shall perform duties as the Board may direct.

### ARTICLE III – POWERS AND DUTIES OF THE BOARD

- 3.1 The Board shall act in behalf of Snow College in performing such duties, responsibilities, and functions as provided by law and as may be specifically authorized and delegated to the Board by the Board of Regents.
- 3.2 The Board shall act in behalf of Snow College in facilitating communications between Snow College and the community; in assisting, planning, implementing and executing fund-raising and development programs; and in strengthening alumni and community identification with the institution's traditions and goals.
- 3.3 The Board shall consult with the Board of Regents on matters pertaining to Snow College.
- 3.4 The Board shall have the authority to adopt a Policy and Procedure Guide and other rules and regulations necessary or convenient and desirable for the efficient and well-ordered administration of the institution.
- 3.5 The Board shall have the authority to establish such standing and ad hoc committees as it deems necessary to properly fulfill its responsibilities.
- 3.6 Unless reserved by or to the Board of Regents, the Board shall have the authority to approve the actions of the President of the College in respect to the following matters:
  - 3.6.1 Appointing, hiring, and contracting with a secretary and a treasurer, administrative officers, staff, other officers and employees, deans of schools or colleges, professors, associate professors, assistant professors, instructors and other professional personnel, faculty and assistants, and in prescribing their duties and determining their salaries, pursuant to Paragraphs One, Two, and Three of Section 15 of the Utah Higher Education Act of 1969, in conformity with general policy of the Board of Regents policy.
  - 3.6.2 Providing for the constitution and organization of the faculty and administration of the institution and enacting rules and regulations for the government of the faculty and employees of the institution, which shall include the establishments of personnel policies and a prescribed system of tenure.
  - 3.6.3 Committing to the faculty the general initiation and direction of instruction and of the examination, admission, and classification of students
  - 3.6.4 Enacting rules and regulations for the administration of the institution which are not inconsistent with its prescribed role and the rules and regulations and bylaws of the Board of Regents or the laws of the State of Utah. Such rules and regulations may, within the above limits, provide for (1) administrative, faculty, student, and joint

committees over specified institutional matters, (2) student government and student affairs organizations, and (3) the establishment and publication of institutional standards involving the education policy and programs in furtherance of the ideals of higher education fostered and subscribed to the institution, its administration, faculty, and students.

- 3.6.5 Exercising such grants of power and authority as may be delegated by the Board of Regents, as well as the necessary and proper exercise of such powers and authorities not specifically denied to the institution, its administration, faculty or students by the Board of Regents or by the laws of the State of Utah, to assure the effective and efficient administration and operation of the institution.
- 3.7 The Board shall assist the President in carrying out his/her responsibilities (1) for the protection, repair, and maintenance of all property, both real and personal, of Snow College and (2) for the protection, education, welfare and general well-being of all persons admitted and enrolled at Snow College or otherwise entered upon the premises of the institution, under such rules and regulations as the President may establish with the approval of the Board.
- 3.8 All rules and regulations established as provided in this article shall be effective when approved by the Board unless otherwise directed therein or unless approval of the Board of Regents is required; provided, however, that the President, with the approval of the Board, shall have the authority to issue directives and make decisions in an emergency to maintain the safety and well-being of persons and the security of the property at Snow College.
- 3.9 The Board shall select persons to be awarded honorary degrees by Snow College in recognition of outstanding achievement or distinctive public service.
- 3.10 The Board shall approve all candidates for earned degrees and diplomas authorized by law and the Utah State Board of Regents which are conferred by Snow College. Such candidates shall be recommended to the Board by the President and faculty in accordance with the rules of Snow College; provided, however, that no degree or diploma shall be conferred except as authorized by law and the Board of Regents.

Upon approval, all degrees and certificates shall be conferred by the President. The general style for conferring degrees shall be "As authorized by law and the Utah State Board of Regents." Diplomas attesting thereto shall bear the signature of the President, the Chair of the Board, the Chair of the Board of Regents, and the Commissioner of Higher Education. Non-degree certificated signifying completion of short, correspondence, or extension courses, and authorized by law, may be awarded and distributed by the institution.

#### ARTICLE IV – MEETINGS

- 4.1 The date, time, and place of regular meetings will be determined by the Board.
- 4.2 Special meetings of the Board may be held on such days and at such times and places as designated by the Chair, by six members of the Board acting jointly, or by the President of the institution.
- 4.3 Notice of the time and place of each regular and special meeting of the Board shall be distributed at the direction of the President to each member of the Board at the last known address at least five days before each regular meeting. This notice should include an agenda

showing the nature of the business to be acted upon at such meeting. Notice as provided herein may be waived by unanimous consent of the Board.

- 4.4 The official agenda shall constitute the principal business at regular meetings of the Board. Proposed agenda items and related materials must be submitted to the Board Secretary at least fifteen days prior to the meeting.
- 4.5 Six members of the Board shall constitute a quorum, whether present in person or present by means of electronic equipment. In the event there are insufficient members present to constitute a quorum at the time and place a meeting has been called, those present may, nevertheless, proceed to hold a meeting for the purpose of scheduling the next meeting and receiving reports of Board committees and/or the President without taking any formal action thereon.
- 4.6 All matters submitted to the Board for its approval shall be decided by majority vote of the total board membership.
- 4.7 Proxy voting shall not be permitted at meetings of the Board.
- 4.8 Any member so requesting shall have his/her vote recorded in the minutes or, on request of any member, the vote of each member shall be so recorded.
- 4.9 Robert's Rule of Order shall be followed in conducting the meetings of the Board and the meetings of the committees of the Board.
- 4.10 The meeting of the Board shall be in compliance with the Utah Open and Public Meetings Act.
- 4.11 At the direction of the Chair or other presiding officer, or upon the request of at least three members of the Board and subject to fulfillment of the requirements of Chapter 4 of Title 52, Utah Code Annotated, 1953, as amended, the Board shall meet in executive session, provided, however, that all resolutions, rules, or regulations shall be approved and all final action taken in open session.
- 4.12 Members may participate in a meeting of Board of Trustees, the Executive Committee, or other committee of the Board by means of telecommunications. Members who participate by telecommunications may be counted in the quorum necessary to conduct and transact Board of Trustees or committee business. Such participation does not alter the requirements of notice, open and public meetings, and other applicable rules of the Board of Trustees. To hold an electronic meeting, the Board must establish one or more "anchor locations," at least one of which is in the building and city where the Board would normally meet, and where there is adequate space and facilities for interested persons and the public to attend and monitor the open portions of the meeting. (Utah Code 52-4-207)

#### ARTICLE V – PUBLIC INFORMATION

- 5.1 The Chair shall be the only member of the Board authorized to make official pronouncements for the Board when instructed by the Board. The President is authorized to speak for the Board with respect to any policy matters which have received the approval of the Board and on administrative matters which are entrusted to him/her.

- 5.2 The President, or in his/her absence a designated member of his/her staff, may issue such news releases, general information, and other communications regarding administration of the College as will serve its best interests. Such releases shall be consistent with the policies and practices of the Board of Regents and the Board.

## ARTICLE VI – COMMITTEES

- 6.1 There shall be four standing committees of the Board of Trustees and such other special committees as the Board or the Chair may determine from time to time to be necessary or appropriate. With the exception of the Executive Committee, the members and Chair of all standing and special committees and their Chair shall be appointed by the Chair of the Board. Each standing committee shall serve concurrent two-year terms with the Chair who appointed them, immediately following his or her election in each even numbered year.
- 6.1.1 The college president shall provide such staff and support services as may be necessary to each standing and special committee and any subcommittee thereof.
- 6.1.2 The standing committees of the Board of Trustees are: (1) Executive Committee (see Section 6.2, below); (2) Academic and Student Affairs Committee; (3) Finance and Facilities Committee; and (4) Audit Committee
- 6.1.3 The Chair may, from time to time, define or redefine the role and responsibilities of, and may make specific assignments to, a standing committee.
- 6.1.4 The Chair and Vice chair of the Board of Trustees may be appointed to and serve as regular members of one or more standing committees, with full power to vote. The Chair and Vice chair of the Board of Trustees shall also be ex officio members of each standing committee to which they are not appointed on a regular basis, but in such ex officio capacity shall be without power to vote.
- 6.2 The Executive Committee shall be composed of the Chair of the Board of Trustees, Vice Chair of the Board, and the chairs of the standing committees of the Board.
- 6.2.1 The Executive Committee shall have the full authority of the Board of Trustees to act upon routine matters during the interim between Board meetings, but shall act upon non routine matters only under extraordinary and emergency circumstances. Actions of the Executive Committee shall be reported to the Board of Trustees at its next regular meeting following such action. (Utah Code §53B-1-104(7)).
- 6.2.2 For purposes of strategic planning discussions, an additional Trustee may be added to the Executive Committee, as long as the total number of members does not create a quorum.
- 6.3 Meetings of all committees of the Board of Trustees may be held upon the call of the Chair of the committee, the Chair of the Board, or at the request of the President. Notice of the time and place of every committee meeting and of the business to be acted upon shall be given to

the members of the committee and the President by the person calling such meeting by mail or other personal communications.

#### ARTICLE VII – AMENDMENTS

- 7.1 These bylaws may be amended or repealed at any regular meeting of the Board by majority vote. A copy of any proposed amendments shall be submitted in writing to each member and to the President at least five days before the meeting at which such amendments are to be proposed.

Approved this 20th day of September 2019.

## Board of Trustees 2020 Proposed Meeting Dates

In compliance with Utah Code and the Open Public Meetings Act, the Snow College Board of Trustees is required to give public notice at least once a year of its annual meeting schedule. For this reason, in addition to scheduling purposes, the amended schedule for the 2020 calendar year is attached for Board approval. The proposed meeting dates are as follows:

**Friday, January 10, 2020**

Regular meeting in Ephraim

**Friday, February 14, 2020**

Higher Ed Day on the Hill

Regular meeting in Salt Lake

**Wednesday, March 18, 2020**

Regular Meeting in Ephraim

Review tuition and fees and other after-session work

**Friday, May 1, 2020**

Commencement Ceremony in Richfield

**Saturday, May 2, 2020**

Commencement Ceremony in Ephraim

**Friday, June 26, 2020**

Regular meeting in Richfield

Review budget for FY20

**Thursday-Friday, July 16-17, 2020**

Training with State Board of Regents in Cedar City

**Friday, September 11, 2020**

Regular meeting in Ephraim

**Wednesday, November 18, 2020**

Regular meeting in Ephraim

**Friday, January 8, 2021**

Regular meeting in Ephraim

OFFICE OF FINANCE AND ADMINISTRATIVE SERVICES

August 27<sup>th</sup>, 2019

Interim Commissioner David Woolstenhulme  
Utah State Board of Regents  
Board of Regents Building The Gateway  
60 S 400 W  
Salt Lake City, UT 84101-1284

Subject: Snow College's Request to Refinance Student Fee & Housing System Revenue Bonds

Dear Interim Commissioner Woolstenhulme:

Snow College requests that the Board of Regents approve refinancing the callable maturities of the Snow College Student Fee & Housing System Revenue Bonds, Series 2011.

The Series 2011 bonds can be refinanced in advance of their call date using taxable Student Fee & Housing System Taxable Revenue Refunding Bonds, Series 2019. Based on current historically low interest rates, it would be to the advantage of Snow College to refund the Series 2011 bonds. Currently the net present value savings from this proposed refunding is approximately 10% or \$1.25 million. Pending authorization from the Board of Regents, and the continued availability of sufficient economic savings, the College anticipates selling bonds via negotiated sale in late September or early October, and closing the transaction in October.

Gilmore & Bell have been appointed to serve as bond and disclosure counsel.

Thank you for your support in this matter and ask that you present this for approval at the Board of Regents Meeting held at USU on September 12<sup>th</sup> and 13<sup>th</sup>.

Sincerely,

Jake Dettinger  
V.P. Finance & Administrative Services

Enclosures

cc: Rich Amon, Associate Commissioner for Finance & Facilities  
Brian Baker, Zions Bank Public

**Snow College**  
**Student Fee and Housing System Revenue Refunding Bonds, Series 2019**  
**Preliminary Summary Sheet**

Proposed Issue: Student Fee & Housing System Taxable Revenue Refunding Bonds, Series 2019

Total Approximate Issue Size: \$13,025,000

Use of Funds: To refinance the callable maturities (\$12,135,000) of the College's existing Series 2011 Student Fee & Housing System Revenue Bonds for economic savings. The 2011 bonds were issued to construct the Suites at Academy Square.

Detail of Proposed Series 2019 Bonds:

Principal Amount: Not to exceed \$13,500,000

Interest Rate: Not to exceed 5%

Maturity Date: Not to exceed 17 years

Aggregate Discount: Not to exceed 2%

Bond Rating: AA from S&P

Underlying Rating: AA from S&P utilizing the State Moral Obligation

Source of Repayment: Housing Revenues, Student Fees, other Revenues

Call Features: Callable around 10 years at par

Timetable Considerations: Pending authorization from the Regents on September 13, and the continued availability of sufficient economic savings, the College anticipates selling bonds via negotiated sale in late September or early October, and closing the transaction in October.

RE: Engagement letter for bond counsel and disclosure counsel services

Dear Mr. Wade:

This letter is to confirm the State Board of Regents ("Board") has retained Gilmore & Bell P.C. to provide bond counsel and disclosure counsel services for the Board acting for and in behalf of Snow College pursuant to that certain Contract for Legal Services signed by Gilmore & Bell P.C. and the Utah Attorney General ("AG Contract").

You have been engaged to provide bond counsel and disclosure counsel services for the purpose of refunding Snow College Student Fee & Housing System revenue bonds with a par amount of the transaction of approximately \$13,000,000.

This letter and the terms for your engagement are subject to the AG Contract. We look forward to working with you.

Very truly yours,

  
Richard F. Amon, Ph.D.  
Associate Commissioner of Higher Education

To the best of my knowledge, the investment activities of Snow College, comply in every respect with the State Money Management Act, the Rules of the State Money Management Council, and the policies of the State Board of Regents.

Jake Dettinger  
VP of Finance and Administration

**Monthly Investment Performance Report**
**OVERVIEW**

Snow College's Endowment Pool grows with support by Snow College friends and alumni. Distributions from the Endowment Pool play a significant role in funding scholarships for Snow College students and help the College achieve its core mission themes of: Tradition of Excellence, Culture of Innovation, and Atmosphere of Engagement.

The investment management of endowment assets requires balancing portfolio risks and expected returns to meet long-term objectives. The goal of the Endowment is to provide a steady stream of income to fund scholarships for Snow College students while preserving the purchasing power of the assets for the benefit of future generations.

**INVESTMENT ALLOCATION**

The asset allocation includes a diverse mix of investments with the following target allocation: 58% fixed income, 40% global marketable equities, and 2% cash and cash equivalents. Actual holdings for the current period ended are:

Cash & Cash Equiv.	3.1%	314,034

The 35-day government shutdown created a great deal of economic angst for the short-term, but there are a handful of other key economic issues that could have a far greater impact on the long-term picture and the direction of the markets. We believe the shutdown will have only a minimal impact on the economy - probably shaving less than 0.5% from the annualized first quarter GDP growth rate. However, if the shutdown resumes in mid-February, that estimate would likely rise. - Mark Simenstad, CFA, Chief Investment Strategist

MARKET OUTLOOK

The partial government shutdown that spanned most of January and is only tentatively resolved has imparted a near-term hit to the economy. The direct impact should largely be limited to federal government output, with growth made up later in the year. Indirectly, however, the lack of key data has reduced visibility for the near term. With that in mind, we have lowered our GDP estimates for Q4-2018 and Q1-2019 to 2.3% and 1.9%, respectively (previously 2.5% and 2.2%). In addition to weaker government spending in the first quarter, the housing sector continues to struggle and will likely be a larger drag on growth than previously estimated. At the same time, business investment remains challenged by ongoing trade uncertainty as well as a further slowdown in growth abroad. That keeps the onus of growth on consumer spending. Although a few major government reports on spending remain delayed by the shutdown, private sector data suggest considerable momentum heading into the first quarter. Moreover, income growth still looks strong with 304,000 new jobs added in January and wages continuing to move up. At its January meeting, the FOMC adopted a notably more dovish stance, removing references to further rate hikes and vowing to be patient. We still expect the FOMC's next move will be to raise rates, but have pushed back the timing of the next rate hike to Q3 (from Q2). Whereas previously we thought the FOMC would raise rates twice more this year, we now expect the Q3 hike to be the last of the cycle. - Wells Fargo

# CASH MANAGEMENT POOL UPDATE February 28, 2019

## Monthly Investment Performance Report

### OVERVIEW

The College manages the Cash Management Pool according to the following objectives:

- Investments are made in accordance with the Utah State Money Management Act as well as other applicable laws, rules, policies, and regulations
- Protection and safety of principal
- Liquidity or availability of funds
- Maximization of the rate of return consistent with objectives stated above
- And with the exercise of judgment, care, and due diligence.

### INVESTMENT ALLOCATION

Target allocations are 20-25% immediate liquidity (Cash & Cash Equivalents, PTIF), 30% agency bonds, 45% corporate bonds. Actual holdings for the current period ended are:

Cash & Cash Equiv.	8.4%	1,796,858
PTIF	56.3%	12,064,922
Municipal Bonds	0.9%	196,806
Agency Bonds	11.1%	2,369,824

## ENDOWMENT POOL UPDATE

March 31, 2019

### Monthly Investment Performance Report

#### OVERVIEW

Snow College's Endowment Pool grows with support by Snow College friends and alumni. Distributions from the Endowment Pool play a significant role in funding scholarships for Snow College students and help the College achieve its core mission themes of: Tradition of Excellence, Culture of Innovation, and Atmosphere of Engagement.

The investment management of endowment assets requires balancing portfolio risks and expected returns to meet long-term objectives. The goal of the Endowment is to provide a steady stream of income to fund scholarships for Snow College students while preserving the purchasing power of the assets for the benefit of future generations.

#### INVESTMENT ALLOCATION

The asset allocation includes a diverse mix of investments with the following target allocation: 58% fixed income, 40% global marketable equities, and 2% cash and cash equivalents. Actual holdings for the current period ended are:

Cash & Cash Equiv.	3.2%	331,544
Bond Funds	31.4%	3,237,610
Equity Funds	64.3%	6,632,979
Corporate Bonds	0.0%	-
Stock	1.1%	109,280
<b>Endowment</b>		<b>8,068,571</b>
<b>Quasi-Endowment</b>		<b>2,242,843</b>
<b>Total Endowment</b>		<b>10,311,414</b>

No Activity

#### RETURNS

#### Market over Book Value:

	Mar-19	FY '18	FY '17
Book Value	9,710,826	9,389,770	8,298,381
Market Value	10,311,414	10,141,955	8,851,032
Unrealized Gain/(Loss)	6.2%	8.0%	6.7%

Most of the major U.S. equity indices rose in March, and all of the indices notched their biggest quarterly gains in nearly a decade. The rise in US equity markets was attributed to signs of progress on U.S. – China trade negotiations and indications that central banks would keep interest rates low as global growth slows. However, an inversion of the yield curve (when the yield of the 10-year bond falls below the yield of the 3-month Treasury bill) created a sell-off in the latter half of the month, as this phenomenon is considered an indication of a recession. - Murray Titterington, CFP, CIMA

#### Endowment Returns:

Period Ending: 3/31/2019

	Mar-19	FY '19 YTD	FY '18
Income	24,299	334,430	160,616
Unrealized Gain/(Loss)	77,516	(151,232)	226,595
Rate of Return	1.00%	1.81%	4.37%

	FY '17	FY '16	FY '15
Income	173,383	151,988	233,696
Unrealized Gain/(Loss)	516,339	(157,488)	(72,388)
Rate of Return	8.88%	-0.09%	2.63%

MARKET OUTLOOK

Stumbling Off the Blocks - Although the big picture is not fundamentally different for the U.S. economy, it is now increasingly likely that GDP growth in the first quarter will come in well below the pace we have seen in the past several quarters. Since our last monthly forecast we finally have Q4 GDP numbers. Like other economic indicators, the GDP report had been delayed by the government shutdown. The takeaway from that report is growth slowed in the fourth quarter, although not as much as expected. Since that report was released, incoming data suggest some downside risk not only in the form of downward revisions to Q4, but also lower base effects in key categories such as consumer spending, which suggests a soft start to 2019. Our forecast sees Q1 GDP growth coming in at a scant 1.3% annualized clip, which, if realized, would be the slowest growth rate in more than three years. This is partly a function of timing and an extraordinarily bad December for consumer spending. Barring another market selloff, which was likely to blame, at least partially, for households cutting back in December, we see only a moderation rather than a serious slowdown for the rest of the year. Our full year growth number for 2019 is 2.4%, down just a tenth of a percentage point from our February forecast, and our expected full-year GDP growth number for 2020 is unchanged at 2.2%. We still expect the FOMC's next move will be to raise rates, and we still expect that rate hike to be in Q3. - Wells Fargo

Monthly Investment Performance Report

OVERVIEW

The College manages the Cash Management Pool according to the following objectives:

- Investments are made in accordance with the Utah State Money Management Act as well as other applicable laws, rules, policies, and regulations
- Protection and safety of principal
- Liquidity or availability of funds
- Maximization of the rate of return consistent with objectives stated above
- And with the exercise of judgment, care, and due diligence.

INVESTMENT ALLOCATION

Target allocations are 20-25% immediate liquidity (Cash & Cash Equivalents, PTIF), 30% agency bonds, 45% corporate bonds. Actual holdings for the current period ended are:

Cash & Cash Equiv.	9.4%	2,190,597
PTIF	60.6%	14,099,265
Municipal Bonds	0.9%	198,036
Agency Bonds	8.1%	1,883,143
Corporate Bonds	21.1%	4,907,943
CD's	0.0%	-
<b>Total Investment</b>		<b>23,278,984</b>

ACTIVITY

Reclassified the Liquidity of Investments per GASB 9 guidelines.

PTIF

"The Utah Public Treasurers Investment Fund (PTIF), or the 'Pool,' invests to maintain safety of principal, liquidity and a competitive return on short term investments."

The current PTIF 360 day rate is 2.95600108

The allocation of PTIF funds as of 3/31/19 is:

- 90.7% Corporates
- 5.44% Commercial Paper
- 3.1% Money Market
- 0.13% CD's
- 0.63% Repos

MARKET OUTLOOK

Stumbling Off the Blocks - Although the big picture is not fundamentally different for the U.S. economy, it is now increasingly likely that GDP growth in the first quarter will come in well below the pace we have seen in the past several quarters. Since our last monthly forecast we finally have Q4 GDP numbers. Like other economic indicators, the GDP report had been delayed by the government shutdown. The takeaway from that report is growth slowed in the fourth quarter, although not as much as expected. Since that report was released, incoming data suggest some downside risk not only in the form of downward revisions to Q4, but also lower base effects in key categories such as consumer spending, which suggests a soft start to 2019. Our forecast sees Q1 GDP growth coming in at a scant 1.3% annualized clip, which, if realized, would be the slowest growth rate in more than three years. This is partly a function of timing and an extraordinarily bad December for consumer spending. Barring another market selloff, which was likely to blame, at least partially, for households cutting back in December, we see only a moderation rather than a serious slowdown for the rest of the year. Our full year growth number for 2019 is 2.4%, down just a tenth of a percentage point from our February forecast, and our expected full-year GDP growth number for 2020 is unchanged at 2.2%. We still expect the FOMC's next move will be to raise rates, and we still expect that rate hike to be in Q3. - Wells Fargo

To the best of my knowledge, the investment activities of Snow College, comply in every respect with the State Money Management Act, the Rules of the State Money Management Council, and the policies of the State Board of Regents.

Jake Dettlinger  
VP of Finance and Administration

**Monthly Investment Performance Report**
**OVERVIEW**

Snow College's Endowment Pool grows with support by Snow College friends and alumni. Distributions from the Endowment Pool play a significant role in funding scholarships for Snow College students and help the College achieve its core mission themes of: Tradition of Excellence, Culture of Innovation, and Atmosphere of Engagement.

The investment management of endowment assets requires balancing portfolio risks and expected returns to meet long-term objectives. The goal of the Endowment is to provide a steady stream of income to fund scholarships for Snow College students while preserving the purchasing power of the assets for the benefit of future generations.

**INVESTMENT ALLOCATION**

The asset allocation includes a diverse mix of investments with the following target allocation: 58% fixed income, 40% global marketable equities, and 2% cash and cash equivalents. Actual holdings for the current period ended are:

Cash & Cash Equiv.	3.4%	357,656
Bond Funds	30.6%	3,219,723
Equity Funds	65.0%	6,848,844
Corporate Bonds	0.0%	-
Stock	1.0%	108,520
<b>Endowment</b>		<b>8,291,900</b>
<b>Quasi-Endowment</b>		<b>2,242,843</b>
<b>Total Endowment</b>		<b>10,534,743</b>

**Market over Book Value:**

	Apr-19	FY '18	FY '17
Book Value	9,736,938	9,389,770	8,298,381
Market Value	10,534,743	10,141,955	8,851,032
Unrealized Gain/(Loss)	8.2%	8.0%	6.7%

First quarter earnings are coming in better than expected, Central banks around the globe remain accommodative, economic data saw improvement, US & China trade negotiations appeared to be going well, and the market fought through some key technical levels to find all-time highs. The NASDAQ was the best performing US index in April with a gain of 4.74%. The S&P 500 increased 3.93% in the month, while the Russell 2000 tacked on 3.34% and the Dow gained 2.56%. The yield curve steepened over the course of the month as the 2-year note yield stayed put at 2.27% while the 10-year bond yield increased ten basis points to 2.51%. - Darren Leavitt, CFA

MARKET OUTLOOK

Monthly economic data from the just-completed quarter suggest that the economy lost even more momentum in Q1-2019, due in large part to lackluster growth in real consumer spending. Fortunately, the underlying fundamentals remain supportive of stronger growth in consumer spending in coming quarters. The labor market is strong, consumer confidence remains at high levels and household balance sheets are generally healthy. Moreover, the recent drop in mortgage rates has breathed new life into the housing market, investment spending continues to grind higher and growth in government spending should be robust in the next few quarters. If our GDP growth forecast comes to pass, then the Federal Open Market Committee (FOMC) probably will not feel compelled to cut rates anytime soon, as many investors currently expect. Absent some unforeseen shock, the conditions do not appear to be in place for recession in the foreseeable future. But the conditions for a rate hike this year may no longer be in place either, as we had thought until recently. Fed policymakers have universally said that they can be "patient" as they digest incoming economic data, indicating that a rate hike probably is not in the cards in the near term. Furthermore, the inflation data do not support a rate hike at this time. In short, we have removed the rate hike that we previously forecasted, and now believe that the FOMC will likely keep its target for the fed funds rate in its current range of 2.25% to 2.50% for the rest of the year. - Wells Fargo

# CASH MANAGEMENT POOL UPDATE

April 30, 2019

## Monthly Investment Performance Report

### OVERVIEW

The College manages the Cash Management Pool according to the following objectives:

- Investments are made in accordance with the Utah State Money Management Act as well as other applicable laws, rules, policies, and regulations
- Protection and safety of principal
- Liquidity or availability of funds
- Maximization of the rate of return consistent with objectives stated above
- And with the exercise of judgment, care, and due diligence.

### INVESTMENT ALLOCATION

Target allocations are 20-25% immediate liquidity (Cash & Cash Equivalents, PTIF), 30% agency bonds, 45% corporate bonds. Actual holdings for the current period ended are:

Cash & Cash Equiv.	8.8%	1,988,032
PTIF	62.0%	14,035,645
Municipal Bonds	0.9%	198,086
Agency Bonds	8.3%	1,883,624
Corporate Bonds	20.0%	4,528,481
CD's	0.0%	-
<b>Total Investment</b>		<b>22,633,868</b>

### ACTIVITY

Book Value	22,894,663	16,229,393	18,177,608
Market Value	22,885,915	16,391,001	18,211,911
Unrealized Gain/(Loss)	0.0%	1.0%	0.2%

First quarter earnings are coming in better than expected, Central banks around the globe remain accommodative, economic data saw improvement, US & China trade negotiations appeared to be going well, and the market fought through some key technical levels to find all-time highs. The NASDAQ was the best performing US index in April with a gain of 4.74%. The S&P 500 increased 3.93% in the month, while the Russell 2000 tacked on 3.34% and the Dow gained 2.56%. The yield curve steepened over the course of the month as the 2-year note yield stayed put at 2.27% while the 10-year bond yield increased ten basis points to 2.51%. - Darren Leavitt, CFA

- 0.63% Repos

**MARKET OUTLOOK**

Monthly economic data from the just-completed quarter suggest that the economy lost even more momentum in Q1-2019, due in large part to lackluster growth in real consumer spending. Fortunately, the underlying fundamentals remain supportive of stronger growth in consumer spending in coming quarters. The labor market is strong, consumer confidence remains at high levels and household balance sheets are generally healthy. Moreover, the recent drop in mortgage rates has breathed new life into the housing market, investment spending continues to grind higher and growth in government spending should be robust in the next few quarters. If our GDP growth forecast comes to pass, then the Federal Open Market Committee (FOMC) probably will not feel compelled to cut rates anytime soon, as many investors currently expect. Absent some unforeseen shock, the conditions do not appear to be in place for recession in the foreseeable future. But the conditions for a rate hike this year may no longer be in place either, as we had thought until recently. Fed policymakers have universally said that they can be "patient" as they digest incoming economic data, indicating that a rate hike probably is not in the cards in the near term. Furthermore, the inflation data do not support a rate hike at this time. In short, we have removed the rate hike that we previously forecasted, and now believe that the FOMC will likely keep its target for the fed funds rate in its current range of 2.25% to 2.50% for the rest of the year. - Wells Fargo

VP of Finance and Administration

Monthly Investment Performance Report

OVERVIEW

Snow College's Endowment Pool grows with support by Snow College friends and alumni. Distributions from the Endowment Pool play a significant role in funding scholarships for Snow College students and help the College achieve its core mission themes of: Tradition of Excellence, Culture of Innovation, and Atmosphere of Engagement.

The investment management of endowment assets requires balancing portfolio risks and expected returns to meet long-term objectives. The goal of the Endowment is to provide a steady stream of income to fund scholarships for Snow College students while preserving the purchasing power of the assets for the benefit of future generations.

INVESTMENT ALLOCATION

The asset allocation includes a diverse mix of investments with the following target allocation: 58% fixed income, 40% global marketable equities, and 2% cash and cash equivalents. Actual holdings for the current period ended are:

Cash & Cash Equiv.	3.6%	364,025
Bond Funds	31.7%	3,241,597

International stocks have enjoyed an unexpected change of fortune this year – particularly in the emerging markets – mirroring the rebound in U.S. stocks. The rebound in the international market has come despite a weak European economy that continues to be dragged down by Brexit and weak financial sectors in Germany and Italy. However, that recent weakness has led to some attractive valuations in Europe, which could present some investment opportunities as the economy stabilizes. - Mark Simenstad, Chief Investment Strategist

Rate of Return

MARKET OUTLOOK

U.S. real GDP grew at a strong annualized pace of 3.2% in Q1-2019, which stood in marked contrast to the widespread discussion early in the quarter about a looming recession. However, the overall GDP growth rate was flattered by a sizeable build in inventories and what was likely only a temporary decline in imports. Real final sales to private domestic purchasers, a gauge of underlying U.S. demand, increased just 1.3%—the slowest pace in nearly six years. That said, the economy is hardly falling apart. Consumer spending entered the second quarter with strong momentum, and solid income gains should continue to support solid growth in personal consumption expenditures. Construction spending appears to be stabilizing, and public sector spending will continue to impart stimulus to the economy over the next few quarters. Although growth in capital spending is generally lackluster at present and net exports and inventories may exert some headwinds on the overall rate of GDP growth in coming quarters, we look for the economic expansion to remain intact for the foreseeable future. Despite the 50-year low in the unemployment rate, inflation remains quiescent, which should keep the Fed on hold. Many market participants look for the FOMC to cut rates by the end of the year, but we believe there is a fairly high bar for a rate cut. In our view, growth would need to slow meaningfully and/or inflation would need to recede further to induce the committee to ease policy. . - Wells Fargo

To the best of my knowledge, the investment activities of Snow College, comply in every respect with the State Money Management Act, the Rules of the State Money Management Council, and the policies of the State Board of Regents.

Jake Dettinger  
VP of Finance and Administration

## Monthly Investment Performance Report

### OVERVIEW

Snow College's Endowment Pool grows with support by Snow College friends and alumni. Distributions from the Endowment Pool play a significant role in funding scholarships for Snow College students and help the College achieve its core mission themes of: Tradition of Excellence, Culture of Innovation, and Atmosphere of Engagement.

The investment management of endowment assets requires balancing portfolio risks and expected returns to meet long-term objectives. The goal of the Endowment is to provide a steady stream of income to fund scholarships for Snow College students while preserving the purchasing power of the assets for the benefit of future generations.

### INVESTMENT ALLOCATION

The asset allocation includes a diverse mix of investments with the following target allocation: 58% fixed income, 40% global marketable equities, and 2% cash and cash equivalents. Actual holdings for the current period ended are:

Cash & Cash Equiv.	3.4%	364,593
Bond Funds	31.1%	3,308,732
Equity Funds	64.4%	6,843,555
Corporate Bonds	0.0%	-
Stock	1.1%	114,966
<b>Endowment</b>		<b>8,389,003</b>
<b>Quasi-Endowment</b>		<b>2,242,843</b>
<b>Total Endowment</b>		<b>10,631,846</b>

**Rate of Return**

**MARKET OUTLOOK**

On net, our forecast for Q2 growth has been little changed since June, with GDP growth slowing to a 1.8% pace. Although that is a couple tenths weaker than our June estimate, the underlying story is the same: domestic demand rebounded in Q2, while Q1's boost from trade and inventories unwound.

While a further escalation in trade tensions has been avoided for now, the lack of a resolution has prolonged trade-related uncertainty. Capital spending plans among manufacturers reached a two and a half year low in June. As such, we continue to expect a lackluster pace of business investment in the current quarter. The ongoing suspension of shipments of Boeing's best-selling 737 MAX aircraft has also taken a meaningful toll on the near-term outlook for equipment spending and exports.

Employment growth rebounded in June, yet wage growth shows few signs of generating a burst in inflation. The continued run of below-target inflation is a key reason why the FOMC will still cut the fed funds rate 25 bps when it wraps up its next meeting on July 31. Although near-term uncertainty around trade has subsided a bit in recent weeks, Fed officials note it continues to weigh on the outlook. The FOMC's limited scope to cut rates this cycle will likely lead it to take a more proactive approach in fending off a slowdown. The FOMC has recently stated its specific intent to sustain the expansion. That leads us to expect an additional "insurance" cut in October, and for the current expansion—now the longest on record—to outlast prior cycles by more than merely a few months.  
– Wells Fargo Advisors

## Monthly Investment Performance Report

### OVERVIEW

Snow College's Endowment Pool grows with support by Snow College friends and alumni. Distributions from the Endowment Pool play a significant role in funding scholarships for Snow College students and help the College achieve its core mission themes of: Tradition of Excellence, Culture of Innovation, and Atmosphere of Engagement.

The investment management of endowment assets requires balancing portfolio risks and expected returns to meet long-term objectives. The goal of the Endowment is to provide a steady stream of income to fund scholarships for Snow College students while preserving the purchasing power of the assets for the benefit of future generations.

### INVESTMENT ALLOCATION

The asset allocation includes a diverse mix of investments with the following target allocation: 58% fixed income, 40% global marketable equities, and 2% cash and cash equivalents. Actual holdings for the current period ended are:

Cash & Cash Equiv.	3.4%	357,900
Bond Funds	31.2%	3,309,590
Equity Funds	64.3%	6,821,707

MARKET OUTLOOK

The U.S. manufacturing cycle slowed abruptly at the end of 2018 and remains weak at mid-year 2019. Meanwhile the global manufacturing cycle continued to decelerate through May and is approaching recessionary levels. The 10-year U.S. Treasury yield has traded below the federal funds rate since May 22, and this inversion of the curve is a hallmark of the late cycle. And some of the economic data for the month of May suggested the labor market and the services sectors may now be decelerating, too.

To be clear, we are not in a recession. But the disconcerting dynamics above are causing our quantitative models to send a warning signal about the potential for an economic downturn in the next 12 months.

The Federal Reserve is likely to take these downside risks very seriously. At the end of the first quarter we forecasted the Fed to remain on hold for the bulk of 2019. But with downside risks re-intensifying and with inflationary dynamics weakening, it looks increasingly likely the Fed will now cut interest rates in both July and September. The crux of the argument is that the cost of a precautionary rate cut is now very low. Normally, late in the cycle central bankers are constrained by the prospect of an inflation overshoot. However, core personal consumption expenditures (PCE) inflation is running below 2% and market- and consumer-based inflation expectations have downshifted. Given the Fed wants higher inflation right now, we think it's more likely the Federal Open Market Committee will cut interest rates to buffer against downside risks. – Russell Investments

## EXECUTIVE SUMMARY

Residence Life provides on-campus student housing on the Ephraim Campus for Snow College students. In addition, during the summer months Residence Life provides temporary housing for summer camps and Snow Fun.

Utah State Board of Regents policy, R550 identifies Residence Life at Snow College as an “auxiliary enterprise operation.” As an auxiliary enterprise operation, Residence Life is to be operated at a level of quality sufficient to support the objectives of the primary programs. Direct charges for services are to be sufficient to enable Residence Life to operate on an essentially self-supporting basis whenever possible. (i.e. receiving revenues sufficient to cover all or most of the direct and indirect operating expenses, assignable indirect costs, debt service and capital expenditures for the activity).

Residence Life plays a vital role in the mission of Snow College in the recruiting, retention and academic success of students. Also, the National Association of College and University Business Officers identified student housing as being important to recruitment, retention, academic success, and positive identification with the institution.

Residence Life has established well documented internal policies and procedures for the day to day operations of the business. However, outside of a deferred maintenance list for large-scale projects, there were no long-term plans or strategies developed to ensure the operational procedures were aligned with the strategic direction. Residence Life has generally been able to be self-sustaining as an auxiliary, but with ongoing need to meet existing bond payments, combined with increasing expenses for maintenance, utilities and employee salaries, Residence Life needs to generate additional revenues to continue to be self-sustaining.

Recommendations in this audit are focused on the need to raise additional revenues to support the auxiliary enterprise function of Residence Life and to ensure Snow College is able to meet its debt service requirements each year (bond payments). Recommendations are as follows:

- Establish a strategic plan that includes maintenance, replacement and other operational needs. Also include recruiting and retention of students as part of the strategic plan.
- Establish and fund a maintenance reserve fund that aligns with the strategic plan.
- Clarify roles and responsibilities in regards to the financial responsibilities of auxiliaries and establish policies on the financial oversight of auxiliaries.
- Report all compensation and scholarships paid for student resident assistants and resident directors to the Financial Aid Department.

## **RESIDENCE LIFE BACKGROUND INFORMATION**

### **Background**

Residence Life provides on-campus student housing on the Ephraim Campus for Snow College students with an approximate occupancy of 760 beds. In addition, during the summer months Residence Life provides temporary housing for summer camps and conferences through Snow Fun, and summer housing contracts for students obtaining summer course credit.

Residence Life mission statement states: “We provide clean, safe, and secure living environments that promote maturity, diversity, and academic success. By enhancing personal growth, through developing responsibility and encouraging friendships, we will aid in the students of today becoming the leaders of tomorrow.”

To further enhance the educational experience for students residing on campus, Residence Life also has two Living Learning Communities for Fine Arts students and for student athletes. These Living Learning Communities provide students with an experience to network and learn from others and create an environment of unity and provide opportunities to further enhance team building and leadership opportunities amongst the students.

### **Auxiliary Enterprise Operation**

As per Utah State Board of Regents policy, R550, Residence Life is designated as an auxiliary enterprise operation. An Auxiliary enterprise is defined as: “a business enterprise or other support activity – the primary purpose of which is to provide specified services to students, faculty, staff or guests of the institution. All housing, food service, and college store activities in any institutions are to be classified and managed as auxiliary enterprises.”

As an auxiliary enterprise operation, Residence Life is to be operated at a level of quality sufficient to support the objectives of the primary programs. Direct charges for services are to be sufficient to enable Residence Life to operate on an essentially self-supporting basis whenever possible.

### **Residence Halls**

All residence halls have access to free onsite laundry, game rooms, study rooms, common areas and free parking. To stay in residence halls, students are required to carry a minimum of ten credit hours each semester. In addition, there is a \$50 application fee, \$150 deposit (\$100 refundable), and an \$8 Residence Hall Association fee. These fees are for students applying for the entire academic year (Fall and Spring Semesters), or a student may select a one semester contract for a \$150 fee. All buildings have access to free laundry, parking and internet. Utilities are also included in the cost of rent.

The following residence halls are management by Residence Life:

<b>Suites at Academy Square</b>		
<b>Room Type</b>	<b>Semester Rate</b>	<b>Required Meal Plan</b>
Double bedroom (8 Person Suite)	\$1025	\$795
Double bedroom (6 Person Suite)	\$1175	\$795
Single bedroom (8 Person Suite)	\$1599	\$795
Double as a Private (DAP) room	\$1975	\$795

The Suites at Academy Square (Suites) were built in 2012 and are the newest addition for student housing on-campus. The Suites can occupy nearly 400 students in an environment with spacious common areas on each floor, study rooms, lounges, and free laundry rooms on each floor. Students residing in the Suites also have access to community kitchens. The Suites are also utilized in the summer for Snow Fun, conferences and groups.

<b>Castilleja &amp; Mary Nielson</b>		
<b>Room Type</b>	<b>Semester Rate</b>	<b>Badger Buck Card</b>
Double bedroom (5 Person apartment)	\$975	\$200
Single bedroom (5 Person apartment)	\$1399	\$200

Castilleja Hall and Mary Nielson Hall are similar in that they both offer cooking style apartments. Cooking style apartments have three bedrooms that occupy five residents per apartment. Bedrooms are either shared or private. Castilleja can occupy up to 114 and Mary Nielson up to 60 residents.

<b>Anderson Hall</b>		
<b>Room Type</b>	<b>Semester Rate</b>	<b>Badger Buck Card</b>
Double bedroom (Traditional Style)	\$925	\$795
Private bedroom (Traditional Style)	\$1299	\$795

Anderson Hall can occupy up to 90 residents and is a more traditional dorm-style building. Residents in Anderson Hall have access to a community kitchen.

<b>Snow Hall – Fine Arts Living Learning Community</b>		
<b>Room Type</b>	<b>Semester Rate</b>	<b>Badger Buck Card</b>
Double bedroom (Traditional Style)	\$925	\$795
Single bedroom (Traditional Style)	\$1299	\$795
Double bedroom 5 person apartment	\$975	\$200
Single bedroom 5 person apartment	\$1399	\$200

Snow Hall has options for apartment style rooms or the more traditional dorm style rooms. Snow Hall is the Fine Arts Living Learning Community and is available to students involved in Fine Arts division programs or those in support of these programs. Snow Hall can occupy up to 60 residents.

<b>Nuttall Hall – Athletics Living Learning Community</b>		
<b>Room Type</b>	<b>Semester Rate</b>	<b>Meal Plan Cost</b>
Private bedroom (traditional style)	\$725	\$200
Private three person apartment	\$1125	\$200

Nuttall Hall Athletics Living Learning Community is available only for qualifying student athletes in organized college supported sports. The Volleyball and Basketball teams primarily reside in Nuttall Hall. The Nuttall Hall Resident Director and Resident Assistants are provided by Residence Life. Nuttall Hall currently occupies 48 residents, but at full capacity could hold up to 90 residents.

<b>Family Housing</b>		
<b>Room Type</b>	<b>Semester Rate</b>	<b>Summer Rate</b>
Greenwood Hall 1 bedroom apartment	\$1599	\$1299
The Cottages 2 bedroom apartment	\$1699	\$1399

Family Housing is for married residents, non-traditional, or families. There are a total of thirteen units available for families to rent each year. The Cottages consist of seven two bedroom units and Greenwood Hall consists of six one bedroom units.

## **Meal Cards**

All students that reside in campus housing are required to purchase a meal card. Meal cards are in addition to the rent paid and the required card is based on whether the room is categorized as a cooking or non-cooking style room. Rooms with cooking apartment style are billed a \$200 meal card and non-cooking style rooms are billed a \$795 meal card. Currently the College does not have a “meal plan” selection, but rather the meal cards which are known as Badger Bucks.

Food Services is not part of Residence Life, but is also an auxiliary enterprise at Snow College and is an integral part of the student campus experience as they provide meals to students that purchase meal plans, as well as other students, staff and faculty on campus and the general public on campus, which is allowed as per Board of Regents’ Policy. Meal plans are managed through the “Badger Bucks” program. Badger Bucks is similar to a debit card type of program, where the students have funds in an account that can be used at the campus store and food services locations. Badger Bucks cannot be used to pay tuition or rent.

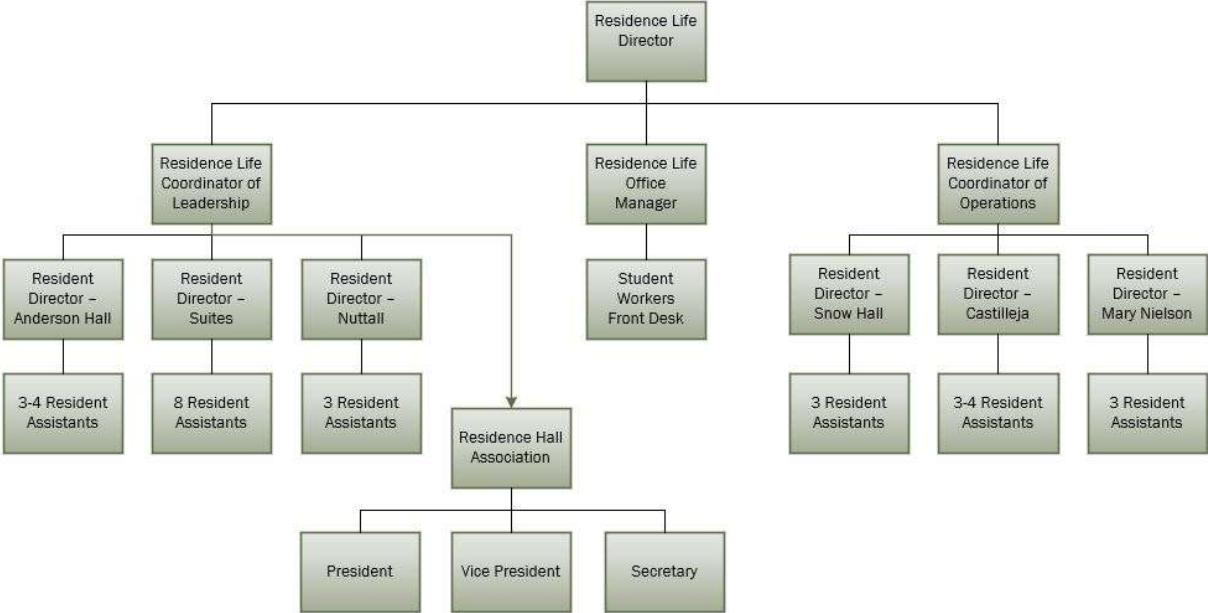

Students may put as much additional money as they desire on their Badger Bucks account and at the end of the semester the unused Badger Bucks may be refunded to the students in the form of cash. However, for all students in campus housing there are required amounts based on their room styles. Following is a breakdown of required meal plans for each building and room style:

<b>Housing Unit</b>	<b>Room Style</b>	<b>Meal Plan Amount</b>
Suites	All Rooms	\$795
Castilleja	Apartment with Kitchen	\$200
Mary Nielsen	Apartment with Kitchen	\$200
Anderson	Traditional Dorm Style	\$795
Snow Hall	Traditional Dorm Style	\$795
Snow Hall	Apartment with Kitchen	\$200

Nuttall Hall	Traditional Dorm Style	\$200
Nuttall Hall	Apartment with Kitchen	\$200
Greenwood Hall	Family Apartment	N/A
Cottages	Family Apartment	N/A

**Residence Life Organization**

Residence Life reports up through the Vice President of Student Success. Following is an organization chart for Residence Life:

The Residence Life Director, Coordinator of Leadership, and Coordinator of Operations are full-time Snow College staff positions. The Office Manager is a part-time staff position that is currently open and being filled. All other positions are held by students.

In addition, there is a full-time maintenance worker and full-time custodian that do not report through Residence Life but are campus services employees that are paid through Residence Life funding.

Student compensation is made through no-cost housing, scholarships, and contributions to meal plans. The compensation and contracts for student workers are managed by Residence Life.

**Third Party Contracts**

Residence Life has a third party contract with StarRez for student housing software programs. StarRez provides a software solution for student housing which includes features such as online housing applications, online roommate and room self-selection, roommate matching, staff administrative functions, billing, reporting email and mail merge. StarRez also contains features that help integrate

more fully with Banner. This system also has the capability to schedule camps and conferences, but is currently not being used for this purpose.

Residence Life also utilizes the services of CSC Laundry services in which they hold the contract for the campus laundry services which includes machines, maintenance of machines and operation. The contract allows students to have a free feature of no-cost laundry and ability to submit work orders through the CSC Laundry Service application, which assists the daily operation of the one FTE maintenance personnel in Residence Life.

## Financial

Auxiliary enterprises are required to be “essentially self-supporting”, meaning revenues received through the auxiliary cover all or most of the direct and indirect operating expenses, assignable indirect costs, debt service and capital expenditures. The following chart illustrates a five-year revenue and expense comparison:

The top three expenses for Residence Life in 2018 were as follows:

- 1) Bond Payment - \$1.116M
- 2) Payroll and Benefits - \$385K
- 3) Utilities - \$237K

In 2011, Snow College was issued a 20 year bond in the amount of \$16.8M for the building of the Suites at Academy square. The bond was secured through pledged housing revenues and student building fees from which payments have been made each year. Revenue sources in this report include all revenues generated through Residence Life and the student building fees for the Ephraim campus.

### Off-Campus Housing

In addition to the 700 students housed by Residence Life, there are at least 100 privately owned off-campus housing providers capable of housing an estimated 3000 students. Residence Life maintains a relationship with off-campus housing providers and provides links to their websites through the Residence Life webpage. The combination of on and off-campus housing options seem to work well for the varied student mix at the College and the competition likely helps keep housing affordable.

Some of the main differences between campus housing and off-campus housing are:

- 1) On-Campus housing rules and guidelines are reportedly more structured than off-campus housing.
- 2) Students in on-campus housing are given specific dates for check-in and checkout with the flexibility of early move-in upon request. Students may stay over the winter break through an application process similar to that of off-campus housing.

- 3) Meal cards are required for campus housing where off-campus housing does not have meal card requirements.
- 4) Off-campus residents are self-governed where on-campus residents are governed by resident directors and resident assistants. However, some of the larger off-campus housing are reportedly hiring students as RA's now.
- 5) On-campus typically has more security than off-campus housing making it potentially a safer environment.
- 6) On-campus housing has emergency procedures in place to create a safety atmosphere for students and works closely with Public Safety and Risk Management on the training for their student staff.
- 7) Family Housing is more limited.

# AUDIT OVERVIEW

## Audit Purpose

Utah State Board of Regents policy R550, Auxiliary Enterprises Operation and Accountability, section 7.3 states: "Institutions shall audit all auxiliary enterprises at least once every five years." This audit was conducted based on the Board of Regents policy requirements and because the Residence Life Director requested an internal audit be conducted to ensure Snow College is in compliance with Regents' policy and to provide an objective review of the operations of Residence Life.

## Scope and Objectives

The objectives for this audit were to determine if Residence Life was operating in accordance with the Utah State Board of Regents' policy, R550, "Auxiliary Enterprises Operation and Accountability", and with Snow College policy. Also it was to determine if Residence Life was effective and efficient in their operations as an auxiliary enterprise.

A trend analysis was conducted to better understand the expenses and revenues. Fiscal years 2014 through 2018 were included in the scope of this audit. Food Services and other auxiliaries were excluded from the scope of this audit.

## Risk Assessment

The purpose for conducting risk assessments are to determine the areas of highest risk to be included in the annual audit schedule and to identify areas of risk in the areas being audited to establish the audit scope, objectives and procedures (audit program). A risk assessment was conducted of Residence Life to establish the audit program.

## Audit Program Test Objectives

An audit program was developed with the following test objectives:

- 1) Determine if the budget process and expense reporting was done in accordance with Board of Regents policy for Auxiliary Enterprises.
- 2) Determine if expenses were appropriate and used for the intended purpose for the funds.
- 3) Determine if Residence Life revenues are adequate to cover all operational expenses including payroll and the annual bond payment while maintaining the appropriate reserves as required by Regents policy and the bond agreement.
- 4) Determine if accounts receivables for housing were done in accordance with Snow College policy and that the amounts applied to housing revenues agreed with the established rates.
- 5) Determine if collections resulting from bad debt were properly credited back to Residence Life.
- 6) Review long and short-term housing plans and determine if funding is planned and adequate to meet the requirements for maintenance and upkeep.
- 7) Perform a five year trend analysis of occupancy rates and determine if student housing was being used to its full capacity each year.
- 8) Conduct a benchmarking survey and determine if cost, amenities and services are comparable with private housing options.

- 9) Determine if summer activities revenues are in-line with contractual agreements with Snow Fun and Summer Camps
- 10) Determine if proper safety controls are implemented to help ensure the safety of residents.

## **Audit Methodology and Procedures**

IDEA is a data analytics software tool that was used for several of the audit procedures. Information for this audit was imported and organized using IDEA exported to excel spreadsheets for further analysis. Information for this audit came from the following sources:

- StarRez database
- Financial and Student system (Banner)
- Purchasing card statements
- Campus Services work order system
- Scholarship office reports

The audit process included the following procedures:

- Risk assessment to identify highest risk areas to be audited
- Review of expenses and revenues recorded in Banner and P-Card transaction registers
- Analysis of information and results
- Review of Residence Life internal policies and procedures
- Interviews with other Snow College employees
- Reviews and analysis of information

Sufficient and appropriate audit procedures have been conducted and evidence gathered to support the accuracy of the conclusions reached and contained in this report. The conclusions were based on a thorough review of controls in the Residence Life office. The audit was conducted in accordance with the *International Standards for the Professional Practice of Internal Auditing*. The evidence gathered meets professional audit standards and is sufficient to provide senior management with the proof of the conclusions derived from the internal auditor.

## FINDINGS AND RECOMMENDATIONS

### Finding #1 – Insufficient reserves for building upkeep and maintenance and other operational expenses

Although Residence Life has been able to generate revenue to cover the operational expenses and debt service, there has been inadequate funds to maintain an adequate reserve. Without an adequate reserve Residence Life was not able to provide timely cost of living and compensation study increases for all deserving employees and pay for some of the needed maintenance on the buildings.

*Utah State Board of Regents policy, R550, “Auxiliary Enterprises Operation and Accountability, section 6.2 “Working Capital” states: “In order to render adequate service, auxiliary enterprises should have a solid financial base that includes sufficient reserves ... Renewal and replacement funds for all auxiliary enterprises should be accumulated in amounts sufficient to provide for major equipment repair and replacement as well as refurbishment, renewal and replacement of physical facilities.”*

Residence Life does not have a strategic plan for building upkeep and maintenance and other operational expenses. As part of this audit a copy of the plan was requested but there was no plan that identified the maintenance and operational needs and the estimated costs at the time of the request. Also there was not a reserve with available funds for maintenance and upkeep of Residence Life facilities. Residence Life maintains a list of deferred maintenance for large-scale projects that exceed \$10,000 in estimated cost. Based on the schedule, the anticipated cost of deferred maintenance was \$1.9M. Currently there are insufficient reserves to meet these identified maintenance needs.

Maintenance of residence halls is performed by campus services and is done through maintenance requests. For more trade-specific maintenance projects or where maintenance work-load is too high, Residence Life pays the additional maintenance costs from their budgets. Following are charts showing the number of maintenance requests that have been submitted by students and number of requests for each building:

Campus services has two full-time employees who are paid through Residence Life payroll. One of the employees provides most of the maintenance work and the other provides custodial services. Maintenance is scheduled through a work order system and the maintenance worker then prioritizes the work based on the need.

The number of student maintenance requests has decreased each year primarily due to the Office of Residence Life and Campus Services being proactive and creating some efficiencies through completing more frequent building inspections, performing preventative maintenance, educating students on the work order system and consolidating requests. Following is a breakdown of the number of work orders submitted each year by building:

Residents in married housing units submitted the highest number of work orders each year. The following chart illustrates the average number of work orders submitted per resident for each building:

In addition to the work orders submitted by residents, requests are also submitted by the Office of Residence Life for preventative maintenance work such as inspecting fire suppression systems and HVAC. The following charts show the number of preventative maintenance requests that have been submitted:

**Recommendation #1 – Establish a strategic plan that includes maintenance and operational needs.**

To ensure compliance with Utah State Board of Regents policy and to maintain financial stability, Residence Life should develop a strategic plan that includes planned maintenance and upkeep of the buildings and operational needs as well as building replacement plans. The plan should include reserves for maintenance and plans for how the reserves will be adequately funded to meet the ongoing needs of Residence Life. Staffing levels of maintenance workers, custodians and other Residence Life positions should be included as part of the planning to ensure the appropriate number of staff to meet the needs.

## **Finding #2 – Lack of policy for auxiliaries and unclear roles and responsibilities regarding management of finances for Residence Life**

The Director of Residence Life role in regards to the budgeting and managing of Residence Life finances along with the responsibilities of others involved in providing financial services to Residence Life were undefined. While other Snow College auxiliaries report directly to the Budget Director or the Vice President of Finance and Administrative Services, Residence Life reports to the Vice President over Student Success. The Vice President over Student Success however, does not provide financial oversight for the operations of Residence Life.

Financial oversight for Residence Life was being provided, in part, by the Budget Office and the Controller's Office who report to the Vice President of Finance and Administrative Services. Following are the basic services provided by each of these Departments:

- 1) The Snow College Budget office provided Residence Life with periodic updates on their financial standing and annually submitted budget reports for all auxiliaries to the Board of Regents. The Budget Director meets periodically with the Director of Residence Life to review their account balances, however, annual budget reports submitted to the Board of Regents were not discussed with the Director of Residence Life.
- 2) The Controller provided accounting services for Residence Life and semi-annually submitted bond compliance reports to the bank. The Controller and Vice President of Finance met at least twice per year with the Director of Residence Life to review revenues, expenses and bond compliance.
- 3) Expenses made by the Director of Residence Life were reviewed and approved by the Vice President of Student Success.

The Director of Residence Life was not notified or granted the opportunity to provide input, and had no involvement in reviewing or submitting financial reports that pertained to the Office of Residence Life. For example, annually the Budget Office sends the Board of Regents budget reports for each auxiliary, including Residence Life, but the Director of Residence Life had no knowledge or record of this report.

*Utah State Board of Regents policy, R550, "Auxiliary Enterprises Operation and Accountability, section 7.2 "Auxiliary Enterprises Reports in the Annual Budget Process" states: "A report of auxiliary enterprises operations, covering the completed actual year and the current budget year, is to be provided annually by each institution, as part of the regular Board of Regents budget process."*

The Budget Office used information from the financial system to create the budget reports but did not consult with Residence Life to determine the budget amounts for the budget year. Without an understanding of planned expenses or changes in revenues, the amounts reported to the Board of Regents for their annual budget process may not be accurate.

## **Recommendation #2 – Establish a policy regarding the oversight and financial responsibilities of each auxiliary.**

To ensure compliance with Utah State Board of Regents policy and to maintain financial stability, financial roles and responsibilities for all auxiliaries should be clarified and documented in policy Employee memorandums of understanding (MOU) should also be updated to properly reflect employee roles and responsibilities as they relate to the policies.

As part of the policy development efforts, reporting lines for all auxiliaries should be reviewed and revised to ensure consistent management and application of financial matters.

## **Finding #3 – Lack of a strategic housing plan for recruiting and retention of students in on-campus housing**

There was no long-range housing operational plan developed to provide guidance on the targets for recruitment and retention of students in campus housing. Without a long-range plan for housing, decisions that are made such as rate changes for rent, housing options and priorities, may not be in alignment with the college mission or financial needs of the college.

*National Association of College and University Business Officers (NACUBO) Handbook on College and University Business Administration, Chapter 20, “Auxiliary Enterprises and Other Activities” states: “On-campus residence halls can be important to recruitment, retention, academic success, and positive identification with the institution ...*

*A long-range housing plan should provide guidance on the percentage of the student body to be housed on campus and the target populations that have priorities. The plan should also allow for flexibility and be couched in the terms “when financially feasible” to protect the financial viability of the auxiliary ...*

*The housing program should be evaluated on a regular basis. The Association of College and University Housing Officers – International (ACUHO-I) has a set of standards and a self-study program for use by institutional housing operations.”*

Because there were no long-term plans for housing, it was not possible to determine if Residence Life was effective in meeting the operational goals or objectives. However, through a review of operational expenses and revenues it was determined that Residence Life was not generating sufficient revenues to meet all financial needs and thus in danger of not being “essentially self-supporting”.

Associated impacts of this include employees paid out of the Residence Life funds did not always receive cost of living adjustments or compensation study increases because Residence Life did not have sufficient funds. Also staffing in the areas of building maintenance and custodial work may not be adequate to provide the needed levels of service.

The following chart shows Residence Life operating revenues, including student building fees, compared with operating expenses including bond payments:

While this chart seems to illustrate that Residence Life has been “essentially self-supporting”, it doesn’t include necessary expenses that were not incurred because revenues were not adequate to meet all the needs of Residence Life.

In addition, the college recently made a change to utility billing for electricity, that will substantially increase expenses for Residence Life in 2020. It has been said that the increase may be upwards around \$100,000, but is unknown at this time. Previously, utility billing for electricity was done based on a percentage basis, depending on the percentage of square feet for each building. Also, the Suites were not included in the percentage basis billing so the College essentially was paying the cost of electricity for the Suites out of operations and maintenance (O&M) funding. Now that metering has been implemented for each building, Residence Life will be billed for the metered amount of usage for each of their buildings, including the suites.

The following chart illustrates what was projected for fiscal year 2020 when compared to the audited numbers in 2018:

### Debt Service (Bond)

A major financial objective of Residence Life is to raise sufficient revenue to cover the bond reserve and payment requirements. The bond reserve and payments are funded through revenues raised by residence life, building fees that are paid as part of student fees, and other pledged sources such as interest earnings on investments. The total amount required for the bond reserve is 110% of the principal and interest payments or 1.12 million dollars. The following shows that Residence Life has generally been able to meet the bond reserve requirements through revenues generated combined with the student building fees:

After normal operating expenses were paid each year, the remaining revenues were transferred to the reserve to make the bond payments. In addition student building fees were transferred to the reserve, and any shortfalls in the reserve were covered through additional pledged funds from sources such as investment income.

The following chart combines operational expenses and the bond payment requirements each year:

**Recruiting / Occupancy**

The primary source of revenue for Residence Life is through rent paid by students living in campus housing. The following chart shows a breakdown of revenues for fiscal year 2018:

Students have the following choices when it comes to on-campus housing and in all cases choose between shared or private rooms:

- Apartment style units with kitchens
- Suites with community kitchens
- Traditional dorm style rooms

Students also have a variety of choices for privately managed off-campus housing. To remain competitive and provide students with the least expensive housing options, Snow College has maintained rent prices that are lower than most private housing options.

The following chart illustrates the total capacity compared with the occupancy rates for all rooms by semester:

As part of this audit a survey was conducted to better understand why students were choosing off-campus housing over the less expensive on-campus options and to know why retention rates were dropping between the fall and spring semesters. According to the majority of the students that participated in the survey, the primary reasons why they chose off-campus housing over on-campus housing were:

- Less rules – Students wanted options that provided more independent living
- Kitchens – Students wanted to have better access to kitchens to do their own cooking
- Less expensive – Overall cost of housing was less expensive when including required meal plans

Meal cards were required for all students living on-campus. Residence Life does not manage the meal plans or the funding of the meal plans, but provides a list of all students in campus housing so they are billed the proper amounts for the meal plans each semester. Through surveys and anecdotal data, students and parents stated that the “meal plan” is a deterrent in selecting on-campus housing.

*NACUBO Handbook on College and University Business Administration, Chapter 20, “Auxiliary Enterprises and Other Activities” states: “Since many housing facilities are not composed of units that allow for cooking all meals, most residence halls provide meal plans as part of a room and board rate.”*

The following chart compares on-campus housing costs including meal plans with off-campus housing:

The Suites at Academy Square are the most expensive option for students when including the cost of the required meal plan.

	Average Cost Per Semester	Meal Plan Cost Per Semester	Total Cost Per Semester
Snow College Apartment Style	\$1121	\$200	\$1321
Snow College Traditional Dorm	\$1112	\$795	\$1907
Snow College Suites	\$1266	\$795	\$2061
Off Campus Housing	\$1440	\$0	\$1440

Through a review of resident information, it was determined that on-campus apartment style units filled closest to capacity, while the shared traditional dorm style rooms and suites had more vacancies. The following chart shows a comparison of capacity and occupancy rates for units with apartment style kitchens compared to those without apartment style kitchens:

The following charts show a comparison of the occupancy rates between fall and spring semesters:

### Housing Rate Changes

Housing rate changes are proposed by Residence Life on an as-needed basis. Typically these rate changes are proposed through a presentation during the fall semester prior to the time of the proposed rate changes. Rate changes did not occur annually. All rate changes are proposed to and approved by Administration. The following chart shows the rate of rent changes by building and room type since 2014:

Nuttall Hall is currently occupied by Athletics as a living learning community for the basketball and volleyball teams. Nuttall Hall has not had price increases since 2014 because of the impact it would have on Athletic scholarships. All the rooms in Nuttall Hall are also private rooms which reduces potential capacity. While this provides opportunity for more scholarships and provides more optimal housing options through private rooms for student athletes, it also negatively impacts the overall amount of potential revenue that can be generated through Residence Life.

The biggest price increases occurred in Anderson Hall. This was due to Athletics occupying that space as a Living Learning Community prior to 2016. When Athletics was converted from an Athletics Football Living Learning Community to a standard residence hall for any student, the prices were increased to align with rates of other similar Snow College housing options.

### ***Housing Scholarships***

The following types of students received reduced cost housing or scholarships specific for housing:

- Residence Assistants (RA) – zero cost housing
- Residence Directors (RD) – zero cost housing
- Ambassadors – zero cost housing for first four Ambassadors to apply
- Student Athletes – scholarships for housing

Student Athletes were the only students to receive scholarships for housing that were recorded through the Scholarship Office. Basketball (Men’s and Women’s) and Volleyball team members are required to stay in Nuttall Hall since Nuttall Hall is the Living Learning Community for Athletics. All other student athletes that receive housing scholarships are allowed to choose their own options, including off-campus housing.

The following illustrate the trends for students that received housing scholarships that used the funds to pay for off-campus housing:

Fiscal Year	Total Scholarship Amt (used off campus)	Total # Scholarships (used off campus)
2015	\$ 26,935	19
2016	\$ 21,461	17
2017	\$ 17,200	13
2018	\$ 51,300	38
2019	\$ 63,500	44

The following chart shows the average housing amounts per student that chose to stay in off-campus housing:

### ***Summer Camps***

Residence Life provides the majority of housing for summer camps and activities. In the event that summer housing is at capacity, Snow College has contracted with off-campus providers to provide overflow summer housing. The following shows the trends by year for the total number of beds (1 bed occupied for 1 day) that were occupied for summer camp activities:

Summer camps are primarily facilitated by the Athletics Department, with Snow Fun being the camp that has the highest number of participants. To simplify the billing process, Athletics verbally agreed to pay Residence Life a flat amount of \$65,000 per summer to use their housing for camps and Snow Fun, regardless of the number of participants. From 2014 through 2018 Residence Life received on average \$66,057 per summer for summer camps and Snow Fun, which averaged out to be \$8.16 per/bed, per/night.

*NACUBO Handbook on College and University Business Administration, Chapter 20, "Auxiliary Enterprises and Other Activities" states: "Many residence hall and apartment operations provide conference services during the summer. Conference income may help the housing auxiliary to employ staff year-round and reduce the rates charged to students during the regular academic year ... It is important for colleges and universities to have a clear policy on the types of groups that may use institutional facilities."*

### **Recommendation #3 – Develop and periodically evaluate a housing program strategic plan**

To ensure Residence Life is in compliance with Utah State Board of Regents policy and to continue to be essentially self-supporting as an auxiliary enterprise, it is recommended that Residence Life develop and periodically evaluate a housing program or plan that includes recruitment and retention goals and objectives and pricing that align with the financial needs of the department.

Plans should include the financial needs of Residence Life and Snow College to ensure financial obligations are able to be met. At a minimum, the financial needs of the department should include debt service, operational, and reserve requirements. Also, Administration should establish a policy requiring an annual budget process for auxiliaries. Auxiliary budget processes should more accurately project and report operating revenues, expenses, maintenance plans, replacement and other needs.

Long-range housing plans should also provide targets for housing on planned occupancies in each building and anticipated revenues. Because of the close tie-in to student recruitment and retention, the long-term housing plans may be coordinated with strategic enrollment management plans.

In collaboration with Food Services, Administration and Residence Life should re-evaluate the requirements for meal plans for students residing in residence halls or Suites. In addition, Snow College Administration should establish policies on the summer use of campus housing. Residence Life should establish written agreements with Athletics and other departments who use housing facilities during the summer months. These agreements and rates should align with the policies and strategic plans for housing.

To raise additional revenues Snow College Administration and Residence Life, in collaboration with other departments might consider some of the following:

- 1) Align housing policies, rules and programs with student needs, including the need and cost of meal plans/cards.
- 2) Recruit more students to stay in campus housing and fill to capacity each semester and focus on retention of students in the spring semester.

- 3) Evaluate scholarships paid for housing and establish policies to ensure scholarship funds are used for campus housing only, if possible.
- 4) Perform market rate studies or hire expert consultants to establish annual rent rates.
- 5) Propose an increase student fees to generate additional funds.
- 6) Establish more programs for short term stays during the summer, consider increasing the cost of campus housing for summer activities.
- 7) Credit back to housing all student bad debt collections that were received.

#### **Finding #4 – Total amounts awarded to Resident Assistants and Resident Directors not reported through Financial Aid**

Residence Life hires students as Resident Assistants and Residence Directors to oversee the day to day activities in the halls, monitor them and help ensure they are properly secured, and to provide assistance when needed for students living there. Students in these positions receive compensation and must maintain a designated academic standing, apply, and interview for these positions.

Residence Life student worker compensation is made through:

- 1) No-cost housing in private rooms, some in private apartments with kitchens. Total value of the rent ranges from \$725 - \$1699 per semester.
- 2) Scholarships to be applied to student account for tuition or other charges. Scholarships awarded range from \$400 - \$1700 per semester, depending on building assignment.
- 3) Contributions to meal cards to be used for food or in the campus stores. Meal card contributions range from \$200 - \$450 per semester depending on their position.

It was determined that not all compensation was properly reported to Financial Aid to ensure the students financial aid needs were properly recorded. In reviewing records for 2018 and 2019 nearly half of the resident assistants and resident directors were potentially awarded higher amounts of financial aid than was appropriate because all of their compensation was not reported to Financial Aid.

All scholarships were properly recorded and reported through Financial Aid, however the value of housing and contributions made to meal plans were not properly reported. Not reporting all residence life compensation to financial aid may impact the calculations of federal financial aid that the students qualify for and result in non-compliance with federal financial aid reporting requirements.

*Section 668.16(b)(3) of the administrative capability regulations requires all campus offices to report to the financial aid office any information which may have bearing on a student's receipt of Title IV federal student aid.*

#### **Recommendation #4 – Report all awards through financial aid and the scholarship office**

To ensure compliance with federal financial aid requirements, it is recommended that Residence Life report all financial aid, scholarship offerings, and housing waivers to the Financial Aid and Scholarship offices.

In addition, it is recommended that Snow College Administration develop and implement policies regarding scholarship awarding and reporting for all student leader groups.

## MANAGEMENT RESPONSE

The following management responses were provided by the Director or Residence Life:

### **Finding #1 – Insufficient reserves for building upkeep and maintenance and other operational expenses**

This is a correct statement, but I believe it needs further explanation. The Office of Residence Life has pursued several proposals to increase revenues within their auxiliary.

1. A formal request was made to administration to adopt the supervision of Snow Fun and summer conference to assist in generating revenue not only for Residence Life but also for the institution and had been declined. This supervision was granted to Athletics as they received much of the funding from the Snow Fun proceeds already.
2. As mentioned in the audit, Residence Life was to receive \$10 per bed per night for Snow Fun attendees staying in on-campus housing, however on page 27 it is concluded that Residence Life is only receiving \$8.16/per/bed, per night. It was reported to Residence Life by Snow Fun that between the dates of May 28, 2019-July 27, 2019 there were 5,150 attendees that stayed in on-campus housing, many of which stayed for multiple days.

Month	Days	Attendees	\$8.16 Rate	\$10.00 Rate	Loss
May-July	12	2	\$195.84	\$240.00	\$44.16
May-July	4	30	\$1,958.40	\$2,400.00	\$441.60
May-July	3	760	\$18,604.80	\$22,800.00	\$4,195.20
May-July	2	3919	\$63,958.05	\$78380.00	\$14,421.95
May-July	1	449	\$3,663.84	\$4,490.00	\$826.16
Total		5150	\$88,380.96	\$108,310.00	\$19,929.04

This is a significant loss of revenue if the guarantee is that we charge Snow Fun \$10.00 per bed per head per night, and the average, per this audit, is \$8.16 per bed per head per night. Currently, Snow Fun is completing a budget transfer of \$65,000 each summer as of 2017 when Snow Fun fell under new management, for the use of several buildings (Suites at Academy Square and 2+ other traditional style buildings) for summer conference use.

Had Residence Life received \$10.00 per bed per night in Summer 2019, the revenue would have been \$108,310.00. However, Residence Life only receives \$65,000 from Snow Fun for the use of builds in the summer. Meaning there is a loss of revenue opportunity of \$43,310.00 for Summer 2019 to the auxiliary enterprise. This meaning a profit was lost to Residence Life yet gained to Snow Fun in Summer 2019.

3. Recommendation by the Director of Residence Life was made to Administration that the Bond Payment be refinanced. It is believed that in Fall 2021 the Bond will indeed be refinanced at a lower interest rate, allowing for a cost saving on payments annually.

4. An established standard by administration should be made to determine pricing for auxiliary enterprises at the institution. Often in presenting pricing consideration for the bottom line may not always be factored into the conversations. I would appreciate a standard to be developed so that the expectation may be met.
5. As Fall 2019 the Office of Residence Life has included within their deposit rubric a non-refundable portion to absorb damages fees being assessed to students and to cover general maintenance. As occupancy stands at 697 students in on-campus housing for Fall 2019, a retention of a minimum of \$34,850 will go directly to maintenance and operational expenses. This is new funding due to the change in deposit structure.
6. Over the last three years' damage charges have decreased thanks to education of students on policies and upkeep of buildings. This also reflective in the audit within Finding #1.

Year	Amount
Spring 2016	\$11,447
Spring 2017	\$11,902
Spring 2018	\$7,550
Spring 2019	\$3,757

**Recommendation #1 – Establish a strategic plan that includes maintenance and operational needs.**

The Office of Residence Life will work with administration and take their direction on how this processes will be outlined as the institution is under reorganization.

**Finding #2 – Lack of policy for auxiliaries and unclear roles and responsibilities regarding management of finances for Residence Life**

**Recommendation #2 – Establish a policy regarding the oversight and financial responsibilities of each auxiliary.**

Per the recommendations of the audit, Snow College will need to establish how auxiliary enterprises will be defined, roles and expectations of budgetary support, usage and financial oversight will be established. The Office of Residence Life would like to be involved in this policy development and follow the best practices of other USHE institutions and national trends.

**Finding #3 – Lack of a strategic housing plan for recruiting and retention of students in on-campus housing**

**Recommendation #3 – Develop and periodically evaluate a housing program strategic plan**

Let it be known that the Office of Residence Life works collaboratively with the Admissions office and attends all Snow Blasts, travels to attend open houses and when made aware attend scholarship open houses. Residence Life also provides tours twice daily and develops their own marketing. With the utilization of the Marketing Department, the Office of Residence Life prints marketing materials annually for distribution in mailers, admissions packets and emails. Additionally, Residence Life has focused efforts as a social media presents and participates in social media campaigns.

I believe what is attempted to be said in the audit, is that a formalized written recruitment and retention strategy should be in place. With regards to working with the SEM committees and the new vision of the institution, a formal plan can be outlined once the direction of the institution is determined. Every 2 years the Office of Residence Life develops a SWOT analysis that drives decisions regarding; recruitment, contract edits and communications. In future, the Office of Residence Life will involve other departments and institutional feedback to holistically create an action plan for student recruitment and retention within on-campus housing.

What we see in regards to recruitment is a fluid trend of what enrollment appears to be at the college vastly reflecting what the numbers for on-campus housing occupancy look like. Although student enrollment is relatively flat for Fall 2019, through recruitment efforts the Office of Residence Life has seen an increase in 60+ students living in on-campus housing. With 100% occupancy for male rooms with about 90% for female rooms.

#### **Finding #4 – Total amounts awarded to Resident Assistants and Resident Directors not reported through Financial Aid**

##### **Recommendation #4 – Report all awards through financial aid and the scholarship office**

The Financial Aid office should develop a policy on what is reportable to their office that is shared with campus partners. As I have read in other audit reports, there appears to be unclear expectations on what is reported and reasons for reporting. The Office of Residence Life as of Fall 2019 will be reporting room rates for scholarship/compensation amounts for Residence Life student leaders.

---

## 2019 Updated Audit Plan

This is the updated 2019 calendar year audit plan last revised on August 29, 2019. As outlined in the Memorandum of Understanding (MOU) at the time of hire, one of the major duties and responsibilities of the Internal Audit Director is to “Develop an annual audit work plan and priorities for audit.”

Snow College internal audit charter states: The Institute of Internal Auditors “International Standards for the Professional Practice of Internal Auditing (Standards) shall constitute the operating procedures for the department”. The Standards, section 2010 – Planning states: “The chief audit executive must establish a risk-based plan to determine the priorities of the internal audit activity, consistent with the organization’s goals. The chief audit executive must review and adjust the plan, as necessary, in response to changes in the organization’s business, risks, operations, programs, systems, and controls.

This audit plan was based on the results from the risk assessment that was conducted in January 2018 and other compliance requirements.

## Revised 2019 Calendar Year Audit Schedule

As per the IIA standard 2020: “The chief audit executive must communicate the internal audit activity’s plans and resource requirements, including significant interim changes, to senior management and the board for review and approval. The chief audit executive must also communicate the impact of resource limitations.” The following is the audit schedule for calendar year 2019:

#	Audit Reference#	Audit Activity Type	Audit Title / Description	Entity	Scheduled Start Date	Status / Projected Completion Date
1	2018-C03	Consulting	Private Scholarships	Scholarship office and Advancement office	December 20, 2018	Completed
2	2019-C02	Consulting	Auxiliary Services	Auxiliary Services and Administration	September 5, 2019	In Progress
3	2018-A08	Risk based audit	Cash counts and controls reviews for selected cash collection points across the campus	VP Finance and Administrative Services -Campus-wide	November, 2018	Completed
4	2019-A01	Risk based audit	Music Department, Internal Audit of the Music Department	Music Department	January 2, 2019	Completed
5	2019-A02	Required / Compliance	USHE required – Investments Audit R541	VP Finance and Administrative Services	April, 2019	In Progress
6	2019-C01	Consulting	Bank Reconciliation process using data analytics tools (IDEA)	Controller’s Office	March, 2019	Cancelled
7	2019-A03	Required / Compliance	USHE required - Presidential Travel Audit – R212	Office of the President	March, 2019	Completed
8	2019-A04	Risk based / required / compliance	Compliance and performance audit of student housing	Required auxiliary enterprise to be audited at least once every five years	May, 2019	Completed
9	2019-A05	Required / Compliance	USHE required – Discretionary Funds, report certification R548	VP Finance and Administrative Services	August, 2019	In Progress
10	2019-A06	Risk based audit	Advancement Office / Foundation – compliance and performance audit of fundraising activities	Advancement	Cancelled	Cancelled

#	Audit Reference#	Audit Activity Type	Audit Title / Description	Entity	Scheduled Start Date	Status / Projected Completion Date
11	2019-A07	Risk based audit	Campus Services – Ephraim and Richfield, compliance and performance audit of campus services including purchasing controls and fleet	Campus Services – Ephraim and Richfield	Cancelled	Cancelled
12	2019-A08	Required / Compliance	USHE required – Motor Vehicles report certification R557	Campus Services	TBD	
13	2019-E01	Compliance / Fraud	Ethics point administration and follow-up on reports filed through the anonymous hotline	Campus-wide	Ongoing / As Needed	In Progress
14	2019-Q01	Audit Standards Compliance	Review and update the Internal Audit quality assurance program, policies and procedures, etc and complete an internal assessment	Internal Audit	TBD	
15	2019-CA	Data Analytics / Continuous Auditing	Further integrate data analytics tools and processes into the audit process. Standardize tools with other USHE institutions to allow for more collaboration and sharing of scripts. Develop and implement internal procedures for data analytics and continuous auditing.	Internal Audit	February 2019	In Progress
16	2019-F01	Follow-up	Follow-up and report on status of implementations of findings and recommendations from prior audits	Athletics, Travel & P-card, Admissions, Scholarship, Human Resources, Great Basin Research Station	December 2018	In Progress

## External Audits

The following audits are performed by the State of Utah on an annual basis. Internal Audit is not responsible to conduct these audits, but may be asked to provide information or assistance:

- Annual Financial Audit
- Annual Financial Aid (Single Audit)

---

**SUBJECT: INSTITUTIONAL BUSINESS EMAIL COMMUNICATIONS**

---

**1.0 PURPOSE**

- 1.1. To ensure Snow College collects and maintains all business email communications in the institution's enterprise email systems for security, auditability, records management, document preservation, personnel actions, archiving and destruction, and other purposes as appropriate.

**2.0 DEFINITIONS**

- 2.1. **ENTERPRISE EMAIL SERVICE** - The email system by which Snow College engages in official business. This is currently @snow.edu. Enterprise email service does not include a separate, affiliated email service the institution offers to alumni or other groups.
- 2.2. **INSTITUTIONAL BUSINESS EMAIL COMMUNICATIONS** - Email communication that an employee, officer, or other designated individual has sent as part of his or her duties on behalf of the institution, and other email communications the college has designated as business communications either through this policy or through internal procedures.

**3.0 POLICY**

- 3.1. Snow College requires its employees, officers, and other designated individuals to use only the institution's Enterprise Email Service when conducting institutional business by email.
- 3.2. Active accounts in the Enterprise Email Service are only available to active employees, new hires, and others as approved by the applicable Vice President.
- 3.3. Employees are specifically prohibited from using any private or non-Enterprise Email Service for institutional business by email.
- 3.4. Employees shall maintain institutional business email communication in compliance with records retention regulations, records management regulation, or any applicable law or policy.
- 3.5. The information security office, with the approval of the College President, may approve additional Enterprise Email Services.
- 3.6. The information security office, with the approval of the college president, may approve or restrict additional non-email communication platforms over which employees can conduct college business.
- 3.7. The office of Information Technology will establish and enforce guidelines related to mailbox size, archiving, email aliases, and other issues related to managing the Enterprise Email Service

---

**SUBJECT: Hiring, Promotions, and Transfers**

---

**1.0 PURPOSE**

- 1.1. To establish policy, procedures, and guidelines that will promote fairness and rigor around decisions to hire, transfer, and promote employees at Snow College
- 1.2. To provide opportunities for upward mobility for current employees who are qualified for higher-level positions.

**2.0 DEFINITIONS**

- 2.1. Adjunct Faculty: A person who is not Faculty but who is employed to teach classes. All Adjunct Faculty are considered At-will Employment Employees.
- 2.2. Administration Employee: Officers of the administration whose primary responsibilities are management and general business operations including the President, Vice-Presidents, Associate Vice Presidents, Assistant Vice Presidents, and other administrative employees as designated by the employee's MOU. All Administration Employees are considered At-will Employment Employees.
- 2.3. Faculty: A person who is a member of the College's full-time Faculty as defined in Policy. A person may be a Faculty member and in a Staff position in which case this Policy applies to employment in the Staff position. Rights as a Faculty member are addressed in the College's Advancement and Tenure Policy or Professional Track policy
- 2.4. Hiring Committee: A short-term committee established by a hiring manager to evaluate candidates for an open position at the college.
- 2.5. Hiring manager: The person who will be the immediate supervisor of the selected employee, whether or not salaried.
- 2.6. Human Resources or HR. The office in the College charged with the administration and record maintenance of personnel matters or such other person as may be specially designated by the President to act in regard to this Policy.
- 2.7. Immediate Supervisor: the lowest level of salaried supervision of an Employee. The Immediate Supervisor may designate a Line Supervisor or higher level as the Immediate Supervisor for purposes of this Policy.
- 2.8. Part-time or Temporary Staff Member: a Staff Member assigned to work less than full-time, or in a position considered temporary or expected to be of short duration. Normally, a Part-Time Staff Member is one assigned to work less than 75%. A Temporary Staff Member is an Employee in a position that is not expected to last more than 9 months. All Part-time and Temporary Staff Employees are considered At-will Employment Employees.
- 2.9. Permanent Part-time Employees: Part-time employees in positions expected to remain funded for the foreseeable future

- 2.10. Promotion: Moving or advancing an employee to a different position within the college that has increased pay, authority, and/or other job characteristics as the previous position.
- 2.11. Regular Staff Member: a staff member whose employment is of a continuous nature, initially funded for a non-temporary period, who has successfully completed the probationary period. This includes exempt and non-exempt employees not covered by a similar faculty procedure, but excludes Probationary Regular Staff Employees, At-will Employment Employees, Administration Employees, Part-time Staff Employees, Temporary Employees and Adjunct Faculty. Normally, a Regular Staff Member is one assigned to work 75% or more (For example 30 or more hours per week, or 9 or more months in a year) in a position expected to last more than 6 months that is a full-time benefits eligible position and defined as a Regular Staff Member in an employment MOU. May also be referred to as Regular Staff Employee.
- 2.12. Student Employees: Employees who are taking at least six credits worth of classes and are in positions typically reserved for students.
- 2.13. Transfer: Moving an employee to a different position within the college that has comparable pay, authority, and other job characteristics as the previous position.

### 3.0 POLICY

- 3.1. Snow College is committed to hiring those persons who are most qualified for the positions for which they have applied based on their experience, knowledge, skills, and abilities in relation to the requirements of the position, and based on their ability to strengthen the college and help it meet its mission. In addition, the college is committed to creating a diverse and inclusive workplace, providing opportunities for underrepresented classes of employees including honoring statutory obligations in connection with this such as Veteran preferences.
  - 3.1.1. In general, having standardized hiring processes serve this Policy best. The Human Resources Department shall maintain such standardized processes and oversee the hiring process. While deviations from a standardized process may be authorized by the college president on a case-by-case basis where such deviations do not undermine this Policy, such deviations should be rare, documented and justified. The standardized processes shall be designed to accomplish the following:

- 3.1.1.1. Attract and hire talented individuals by providing hiring authorities with the tools to find, interview and select the best candidates.
    - 3.1.1.2. Provide clear and reasonable procedures for searches that are standard for each type of position.
    - 3.1.1.3. Balance the cost of employee searches with the needs of the College. For example, temporary positions may justify shortened or summary searches.
- 3.2. Snow College is committed to providing employees with promotion opportunities within the College. This may include starting search processes for higher level positions by first looking within the College, providing for advancement, and/or providing for development of employees and greater opportunities and responsibilities within their existing positions.
- 3.3. At times transferring employees to different positions is beneficial for the employee and the College by better aligning strengths, skills, and interests of employees and positions. Vice Presidents may transfer employees within their jurisdiction. The College President may transfer employees across Vice President jurisdictions.
  - 3.3.1. Human Resources should be involved in transfer decisions. The commitments outlined in 3.1 should be considered in all transfer decisions.
- 3.4. Human Resources shall maintain and publish procedures implementing and assuring compliance with this policy and shall prepare guidelines to help Hiring Committees and Hiring Managers implement this policy and the Procedures.
- 3.5. Human Resources shall be involved in all hiring, promotion and transfer decisions to assure consistency, fairness and compliance with law and policy.
- 3.6. All decisions related to hiring, transfer, or promotion must be compliant with policies on Equal Employment Opportunity, Nepotism, and any other applicable law or policy.

# Agriculture Department Review Self-Study

representing courses taught in Agribusiness, Equine Management,  
Ag Technology/Mechanics and Farm/Ranch Management

submitted to Snow College Board of Trustees and the  
Utah State Board of Regents  
Summer 2019

## Reviewed Spring Semester 2019 with the rating of recommended

- Ryan Larsen, Assistant Professor of Applied Economics, Agribusiness, Farm Management, and Risk Analysis, Utah State University
- Sandra Cox, Assistant Professor of Communications, Snow College

## Program Description and Mission Statement

### Agribusiness

Agriculture has been part of Snow College from the beginning of the college. Currently the Agriculture program focuses on the business of farming and ranching and agribusiness. The Ag Business program is committed to building on our agriculture heritage with the goal of serving students with sound exceptional programs to build skills for successfully running and operating an Ag Business.

Since the previous Agribusiness program review was completed over five years ago the program has expanded in certificate and degree offerings (certificates of proficiency and completion and AAS degrees in Agribusiness, Equine Management and Ag Technology/Mechanics). The number and variety of classes offered has increased; in addition to 2 on going classes 3 were activated from the inactive class list and 13 new classes were created. These certificate and degree offerings and the associated new classes have resulted in substantial student numbers and program growth.

Snow College's Ag Business Department offers a Certificate of Proficiency, a Certificate of Completion and Associate of Applied Science (AAS) in Ag Business. Ag Business and Agriculture majors desiring to transfer to a university to work towards a Bachelor of Science (BS) in any area of Agriculture will want to complete an Associate of Science (AS 63 credits). Agriculture students desiring to enter the workforce following two years of college will look to pursue an Associate of Applied Science (AAS 63 credits). An AAS provides an ideal preparation for entrance into professions such as: agriculture business management and other business careers, livestock production, crop production, agriculture sales, agriculture marketing, and natural resource areas e.g. range management, forestry, grazing management and soil conservation. Students desiring a quick upgrade of agriculture skills will look towards a Certificate of Proficiency or Certificate of Completion.

### Farm/Ranch Management

Snow College offers a Farm/Ranch Management program to assist farm/ranch families in achieving their business and personal goals by improving the profit- ability of their business.

The program teaches farmers and ranchers to keep detailed computerized financial and production records and to use these records in making timely and intelligent business decisions. Some computer literacy is also taught. The focus is on education and not merely a “bookkeeping service.”

The program is designed to be spread over two to three years, depending on the farm/ranch family’s business skills and business management objectives and goals; with opportunities to repeat courses based on changing technology, business needs, succession planning and family business. Farm/ranch families may enroll at any time during the year, but it is recommended that they enroll at the beginning of their financial year. Instruction is two to three hours once a month (more if necessary) one-on-one at the farm/ranch site with occasional group instruction to discuss and give instruction on topics of common interest. All financial and production records and other information is kept strictly confidential.

Management of a farm/ranch is primarily a decision-making process. To be successful in management and decision-making processes, the program is composed of various units/courses taught in an organized sequence. Courses begin with basic accounting and management skills to growing the business and succession and estate planning. All courses are non-credit and repeatable. Approximately 135 contact hours are required to complete the program.

Snow College’s Farm/Ranch Management was reviewed more than 5 years ago. Since the previous review the Farm/Ranch has experienced a 25% decrease in enrollment. This decrease is not reflective of a decreased demand in the agriculture community but reflects the substantial increased Agribusiness program teaching commitments of all agriculture faculty. It should be noted that substantial USDA grant funding has come into the Agribusiness program over the past nine years through Farm/Ranch Management work (\$1,008,011). For continued and future grant funding to be justified there must be growth in the Farm/Ranch Business Management program. Evidence of the producer demand is seen in the number of farmers/ranchers who are on waiting lists and referral lists from central Utah agriculture lenders (banks).

A reality of the combination of agriculture certificate and degree programs and the associated classes with Farm/Ranch Management is the application of the academic course topics to the real world of agriculture. The farms and ranches enrolled in Farm/Ranch Management become a “real life” lab opportunity for students in the ag business classes to engage and apply their academics to current agriculture production.

**Curriculum:** please see Appendix A for a descriptive list of degrees and course requirements. Appendix B offers a comprehensive list of all currently taught courses.

### Agribusiness

(core courses in addition to General Education and specific award level requirements)

Course	Description	GE	Credits
AGBS 1010	Fundamentals of Animal Science		4
AGBS 1100	Agri. Business Career Explorations		2
AGBS 2020	Intro. To Agri. Economics & Agri. Business		3
AGBS 2030	Agricultural Managerial Analysis & Decision Making		3
AGBS 1715	Technical Math*		3

\*may be replaced with a general education QL math class

## Farm/Ranch Management

(recommended courses in addition to the General Education core coursework)

Course	Description	GE	Credits
FRM 2010	Farm/Ranch Management I		2
FRM 2020	Farm/Ranch Management II		2
FRM 2030	Farm/Ranch Management III		2
FRM 2040	Farm/Ranch Management IV		0.5

## Student Learning Outcomes

### Agribusiness

Students who complete an AS with emphasis in Agriculture Business, or students who complete an AAS in Agri. Business or either of the Agri. Business certificates should expect the following outcomes from the program:

#### Acquire Substantive Knowledge

- Have acquired a balanced and inclusive knowledge of agriculture business management.
- Are familiar with current theories and processes in planning, analyzing, and directing an agriculture business.
- Are familiar with internal and external business and economic forces that effect the business environment of agricultural business.

#### Communications

- Are comfortable and confident in making decisions, expressing ideas and organizing ideas into presentations and able to interact with others
- Be able to produce clear, purposeful and grammatically correct written documents.

#### Computation

- Have the ability to keep financial and production records and apply financial and production records in decision making.
- Be able to perform appropriate analyses for quantitative and qualitative data and decision making.

#### Professionalism

- Appreciate the relationship between producing food, fiber and fuel and caring for nature and their physical and life sciences.
- Be able to work with a partner or as a team to prepare and present a presentation an informative and effect presentation on a substantive agriculture topic.

#### Technology

- Know fundamental use of computers in an agriculture business management setting using spreadsheets, accounting software and basic agriculture business analysis software.
- Be able to produce professional-looking documents, presentations and projects using current industry standard software.

## Farm/Ranch Management

Students who complete courses in Farm/Ranch Management will be expected to demonstrate that they:

- Have record-keeping skills necessary for business decisions;
- Can maintain a working chart of accounts;
- Can post income and expenses to the accounting system using the chart of accounts;
- Are able to reconcile their accounting system with their monthly bank statements;
- Know how to apply the financial and production records in decision making;
- Know the principle purpose of financial statements in obtaining loans and providing information for income taxes;
- Know how to interpret financial statements in order to analyze strengths and weaknesses of the farm/ranch through benchmarking to local, regional and national matrixes.
- Develop a budget and monitor actual to budget income and expenses;
- Have a sense of satisfaction in developing a budget while monitoring their desired outcome;
- Feel a sense of accomplishment in their management skills and abilities;
- Have a feeling of confidence as they see their financial soundness improve;
- Know the contribution that they are making to society by providing food.

## Academic Advising

The general advising of students attending Snow College is conducted through the Student Success Center. The Center employs many advisors who are trained to help with schedules, consult about major and career options, and find financial aid resources to pay for school. However, faculty members and part-time instructors in the agriculture program often meet with students to discuss their current academic and/or performance needs as well as their future goals. In Fall Semester 2019 an advisor was hired to

advise agriculture, business and applied technology students as part of the Student Success Center advising team.

## Faculty

Agribusiness, Equine Management, Ag Technology/Mechanics, Farm/Ranch Management

- Jay Olsen MS, Brigham Young University – AGBS classes and FRM (21 years at Snow College)
- Kendra Bagley, BS Utah State University – Rodeo Team Coach, AGBS Equine classes, and FM (6 years at Snow College)
- Matthew Goble, BS Utah State University– AGBS, AGTM classes, and FRM (2 years at Snow College). Matt is currently working to complete an MS from Colorado State University in Resource Management, completion target will be Dec 2020.

## Program Assessment

In accordance with Utah State Board of Regent's policy R411 on the periodic review of educational programs, an on-site visit of Snow College's Agriculture Business and Agricultural Technology & Mechanics program was conducted Spring Semester 2019. This visit was preceded by a careful reading of the program's self-study document and included a comprehensive tour of current facilities, conversations with students, class visits, and faculty and administration interviews.

## Program Strengths:

- Tenure:** The agribusiness program is the oldest program and serves as fantastic foundation for the other programs in equine management, ag technology/mechanics, and farm/ranch management. The agribusiness curriculum provides great training for students, who are well-prepared to run their own business or continue to a four-year degree. Students are also exposed to many real-world cases thanks to the synergies developed with the Farm & Ranch Management program. Students can analyze real world farms and understand the complexities associated with business decisions. Very few Agribusiness programs at either the 4-year or 2-year level can accomplish this. Snow College students are some of the highest performing students within the Utah State Agribusiness program.
- Reputation:** The Farm & Ranch Management Program is also a flagship program within the state of Utah and nationally. The program's ability to generate grant funding and provide training for farmers and ranchers is commendable. With limited resources, this program has grown and continues to grow.
- New Concentrations:** The Ag Technology/Mechanics program is the newest but is already attracting strong students and is also developing a good reputation within the agricultural technology industry. Each class utilizes current technology such as UAV's and variable rate irrigation systems. The Equine Management program is also relatively new but has quickly become

a strong program. This program capitalizes on the strength of the Snow College Rodeo team. The Equine Management program provides students with a science or business emphasis. This is a great model for students as they prepare for a career in the equine industry.

- **Entrepreneurship:** The faculty focus on entrepreneurship throughout the curriculum is very beneficial to workforce-ready or transfer students. The small class sizes and the faculty's commitment to the students is easily recognized. The students view the faculty as mentors. The faculty have done a nice job in utilizing their facilities. The college farm provides a "living" laboratory for students. The equine facilities are adequate. The shop facilities are organized and clean.

#### **Program Concerns:**

- **Workload:** Faculty workload is a pressing concern. Many of the faculty accomplish additional work (i.e. advisor/coach to the Rodeo Team with very little compensation (money or release time).
- **Rodeo Team Funding:** The Rodeo team appears to be a successful athletic team within Snow College, but the funding appropriated to them does not match the needs. The riding facilities are adequate but not suitable long term. Many of the rodeo team members pay much of the cost out of their pockets. This includes driving themselves and paying for their own travel and lodging. From a liability perspective, utilizing a college transport system appears to be a good solution. Grant funds are used to make up a lot of the shortfalls within the program.
- **College Farm:** The college farm appears to be utilized inappropriately. In one part of the field is a cutting-edge irrigation pivot and then in the corner is a catch all area that houses burn piles and other college waste. This is a concern from both a public perspective and inefficient use of resources.
- **Organizational Leadership:** A transition plan for the program's chair needs to be developed. Jay Olsen is the driver and leader of this program. His ability to teach, mentor, generate grant funds, and navigate collegiate politics is difficult to duplicate. He mentioned that he has a lot of time left but still the concern is who takes over his responsibilities.

#### **Program Recommendations:**

1. **Rodeo Team Support:** It was recommended that the funding for the Rodeo team be evaluated by the college and department. The current funding system is not sustainable and needs to be fixed. The loss of the coach or the team would be detrimental to Snow College. This evaluation also includes an analysis of the team transport issues. It is recommended that Snow College invests in means to assist with the transport of animals and team members.

***Institutional Response:** Through the new budget process, the Agriculture program submitted a budget proposal for \$10,000 additional dollars for the rodeo team. Kendra met with the college Budget Task Force Committee on March 13th to present the proposal. The committee highly recommended that we petition the Athletic Director for \$10,000 now, before the semester ends,*

rather than wait for a full year for any additional funding to come through the recommendation from the Budget Task Force. A few weeks following the Budget Task Force presentation, Snow College's Athletic Director offered to pay the costs for rodeo athletes attending the National Collegiate Rodeo Finals Rodeo in June 2019. He also asked Kendra to submit a budget for the upcoming fiscal year that includes an amount to cover all travel costs for the collegiate Rocky Mountain Region Rodeos, not just the fuel cost as has been done in the past. Consideration is being given to moving fiscal control of the rodeo team budget from Athletics to the Agriculture program. The program is currently seeking funding to purchase or have donated a 20 horse 53' horse trailer and college semi-tractor. The program would propose a project to welding program students to retrofit the trailer with dividers and a tack racks. (\$8,000 was added for the upcoming fiscal year.)

2. **Facility Improvements:** It was recommended that a plan is put into place to increase and modernize the Equine and Rodeo facilities. This would increase both the recruiting into the program and avoid any animal welfare issues.

*Institutional Response:* Pending Ephraim City's and Snow College's development of a soccer or baseball field at the current arena's location, any effort to make this location more permanent is on hold. The long-term goal would be to locate the arena just east of the horse barn and west of the pivot where with permanent provisions for livestock water, corrals and a shed/barn for practice calves (complete with arena sand), stalls for student horses, and clean and de-junk the area. In the meantime, the program plans upgrade the outside horse stall area with heavy duty panels and provide a raised stall area to improve drainage at the current location Ideas for funding (either through grants or donations) for a covered indoor arena with adjacent stall area are also being considered.

3. **Name Change:** It was recommended that the Ag Technology/Mechanics program evaluate the idea of changing the name to Precision Agriculture program. It is also recommended that this program develop industry partnerships that can help guide the program and keep it dynamic as the industry continues to change rapidly. These industry partnerships could also be used to identify internship opportunities for students.

*Institutional Response:* Rebranding of the Ag Tech/Mech. program will be pursued through the appropriate channels to rename the program "Precision Agriculture". This will allow the program to expand industry partnerships to include more precision equipment, curriculum and industry internships. Program faculty plan to visit peer colleges that have a Precision Ag degrees or areas of emphasis to learn from them and adapt their curriculum to match Utah's agriculture needs.

4. **Farm Utilization:** It was recommended that the college analyzes the use of the college farm and to stop utilizing the farm as a catch all for college waste. This would include identifying potential uses for the corners of the land. For example, developing compost that could be sold would provide both business and science applications for students.

***Institutional Response:*** Program faculty plan to meet with college physical facilities to eliminate non-compostable college waste. In addition, faculty plan to work with the College's recycling group(s) and/or biology student groups on a composting project using the college's organic waste materials. This would include developing a partnership with Snow College's Sustainability committee, the Center for Rural Entrepreneurship and other college departments to pursue a grant for a compost turner. Long-term, the composting project would involve participation from Ephraim City leadership and citizenry. Given the size of the project there is potential for a county-wide (maybe regional) marketing plan that could fund student employment and/or scholarship opportunities across multiple disciplines.

5. **Strategic Plan:** It was recommended that the Agriculture Program develop a long-term strategic plan that includes a succession plan. This strategic plan would also discuss the role of grants in overall funding and the use of an Advisory Board to guide the program.

***Institutional Response:*** Program faculty and division leadership will start to build a strategic plan that will support the 3 current AAS degrees and certificates and add a Livestock Production/Animal Science degree and an Agronomy degree. In addition, the strategic plan will address the following:

- increased support and emphasis of Farm Business Management as the corner stone of the agriculture program and as a major platform form for grant funding and a valuable college service to the agriculture community of Central Utah. This will continue the model of each Agriculture faculty member having a portion of their workload committed to Farm Business Management;
- a delineated program succession plan that defines areas of responsibility and provides opportunities for program leadership and development to all Ag Business faculty;
- the transition of grant-funded faculty positions to program (line-item) funded positions. This will allow grant funds to be used for program expansion and not faculty subsidizing;
- the procurement of an NSF-ATE or other grant to add the AAS Livestock Production/Animal Science degree and certificates. Faculty development opportunities will include training on grant writing and grant management;
- utilization of Snow College's GE Foundations curriculum to hire an instructor for Business and Ag Business with an emphasis on teaching credentials applicable to business and business ag classes; and
- the development of current advisory board members to represent all areas of agriculture education and programming. On April 11<sup>th</sup>, 2019, the Ag Technology/Mechanics Advisory Board met agreed unanimously to assume the role of the Snow College Agricultural Advisory Board.

## Appendix A: Course Requirements Specific to Degree Outcomes

### Agribusiness

#### *Agribusiness Certificate of Proficiency*

AGBS 1010 Fundamentals of Animal Science (4) or  
NR 1030 Fundamentals of Food Production Systems (2)  
AGBS 1100 Agri. Business Career Explorations (2)  
AGBS 2020 Intro Agri. Economics and Agri. Business (3)  
AGBS 2030 Agricultural Managerial Analysis & Decision Making (3)  
BUS 1060 QuickBooks for Small Business (3)  
BUS 1600 Entrepreneurship Seminar (1)  
BUS 1010 Introduction to Business (3) or  
BUS 2650 Management Principles for Entrepreneurs (3)

**Required Credits: 17-19**

#### *Agribusiness Certificate of Completion*

ENGL 1010 Expository Composition (3)  
ECON 1740 US Economic History (3) or  
HIST 1700 American Civilization (3)  
AGBS 1010 Fundamentals of Animal Science (4)  
AGBS 1100 Agribusiness Career Explorations (2)  
AGBS 2020 Intro. To Agri. Economics & Agri. Business (3)  
AGBS 2030 Agricultural Managerial Analysis & Decision Making (3)  
BUS 1010 Introduction to Business (3)  
BUS 1060 QuickBooks for Small Business (3)  
BUS 1600 Entrepreneurship Seminar (1-2)

**Choose 6 credits (2 classes) from the following**

BUS 1300 Social Media Marketing (3)  
BUS 1210 Personal Finance (3)  
BUS 1480 Advertising and Promotion (3)  
BUS 2650 Management Principles for Entrepreneurs (3)  
BUS 1480 Advertising and Promotion (3)  
BUS 2650 Management Principles for Entrepreneurs (3)  
BUS 2050 Business Law (3)

**Required Credits: 31-32**

### *AAS Agribusiness*

AGBS 1010 Fundamentals of Animal Science (4)  
AGBS 1100 Agri. Business Career Explorations (2)  
AGBS 2020 Intro. To Agri. Economics & Agri. Business (3)  
AGBS 2030 Agricultural Managerial Analysis & Decision Making (3)  
BUS 1010 Introduction to Business (3)

BUS 1060 QuickBooks for Small Business (3)

**Choose 6 credits (2 classes) from the following**

BUS 1300 Social Media Marketing (3)

BUS 1210 Personal Finance (3)

BUS 1020 Computer Technology and Applications (3)

BUS 2450 Presentations for Business (3)

BUS 1170 Team and Interpersonal Dynamics (3)

BUS 2650 Management Principles for Entrepreneurs (3)

BUS 2050 Business Law (3)

ENGL 1010 Expository Composition (3)

AGBS 1715 Technical Math or

MATH 1030 Quantitative Literacy or

MATH 1040 Introduction to Statistics (3)

ECON 1740 US Economic History (3) or HIST 1700 American Civilization (3)

Fine Arts (3)

Humanities (3)

BIO 1010 General Biology and 1015 lab (4)

Agronomy Emphasis take BIOL 1610 and lab 1615) (4)

**Required 43 credits (plus 20 credits for one area of Emphasis listed below)**

**Agribusiness & Management - Area of Emphasis (20 credits from the following)**

ACCT 1200 Tax Preparation (1)

PHSC 1000 Interdisciplinary Physical Science (3)

BUS 1210 Personal Finance (3)

BUS 1600 Entrepreneurship Seminar (2) or (must be an additional class to the core class options)

BUS 2650 Management Principles for Entrepreneurs (3) or BUS 2050 Business Law (3)

ACCT 2010 Financial Accounting (3)

ACCT 2020 Managerial Accounting (3)

ECON 2010 Introduction to Microeconomics (3)

ECON 2020 Introduction to Macroeconomics (3)

**Animal Science - Area of Emphasis (20 credits from the following)**

PHSC 1000 Interdisciplinary Physical Science (3)

BUS 1600 Entrepreneurship Seminar (2)

AGBS 2200 Anatomy & Physiology of Domestic Animals & 2205 Lab (4) or

AGBS 2500 Animal Breeding (4)

AGBS 2400 Livestock Feeds and Feeding (4)

AGBS 1420 Livestock Production Practices (2)

NR 1010 Introduction to Natural Resources (2)

NR 2040 Introduction to Range Management (3)

**Agronomy - Area of Emphasis – (20 credits from the following)**

PHSC 1000 Interdisciplinary Physical Science (3)

BIOL 1610 Biology I and 1615 Lab (5)

BIOL 2300 Plant Taxonomy and 2305 Lab (4)  
NR 1010 Introduction to Natural Resources (2) or NR 2040 Introduction to Range Management (3)  
AGTM 2500 Irrigation Management (3)  
AGTM 2600 Aerial Imagery - Drones in Ag and Computer Applications (3)  
AGTM 1330 Chemicals and Applications (2)  
BIO 2580 Introduction to Soil Science (3)  
BIO 2585 Introduction to Soil Science Lab (1)

**Range - Area of Emphasis – (20 credits from the following)**

BIOL 2300 Plant Taxonomy and 2305 Lab (4)  
AGBS 1420 Livestock Production Practices (2)  
AGBS 2400 Livestock Feeds and Feeding (4)  
NR 1010 Introduction to Natural Resources (2)  
NR 2040 Introduction to Range Management (2) or NR 2060 Survey of Hydrology (3)  
AGTM 1330 Pesticide Applications (2) or NR 2805 Short Term Training in Natural Resources (1-2)  
AGTM 2600 Aerial Imagery - Drones in Ag and Computer Applications (3)

## **Equine Management**

### ***Certificate of Proficiency in Equine Management (23 Credits)***

AGBS 1010 Fundamentals of Animal Science (4)  
BUS 1060 QuickBooks for Small Business (3)  
AGBS 1100 Agribusiness Career Explorations (2)  
BUS 1600 Entrepreneurship Seminar (2)  
BUS 1300 Social Media Marketing (3)  
AGBS 2030 Agriculture Managerial Analysis & Decision Making (3)  
AGBS 1700 Western Riding Skills I (3) and  
AGBS 1900 Western Riding Skills I (3) or  
AGBS 2700 Western Riding Skills II (3) and  
AGBS 2900 Western Riding Skills II (3)

### ***Certificate Completion in Equine Management (32 Credits)***

ENGL 1010 Expository Composition (3)  
ECON 1740 US Economic History (3) or  
HIST 1700 American Civilization (3)  
AGBS 1010 Fundamentals of Animal Science (4)  
AGBS 1100 Agribusiness Career Explorations (2)  
AGBS 2030 Analysis and Decision Making (3)  
BUS 1300 Social Media Marketing (3)  
AGBS 1700 Western Riding Skills I (3)  
AGBS 1900 Horse Breaking and Training I (3)  
AGBS 2700 Western Riding Skills II (3)  
AGBS 2900 Horse Breaking and Training II (3)

### ***AAS in Equine Management (42 credits)***

ENGL 1010 Expository Composition (3)  
MATH 1030, 1040, or 1050 Any Class that meets the MA requirement (3)  
BUS 1270 Strategic Selling (3)  
ECON 1740 US Economic History (3) or HIST 1700 American Civilization (3)  
Fine Arts (3)  
Humanities (3)  
Biology 1010 General Biology and 1015 lab (4) (BIOL 1610/1615 if transferring to USU)  
AGBS 1010 Fundamentals of Animal Science (4)  
AGBS 1100 Agriculture Career Exploration (2)  
AGBS 2030 Analysis and Decision Making (3)  
AGBS 1420 Livestock Production Practices (2)  
BUS 1060 QuickBooks for Small Business (3)

#### **Choose 6 credits (2 classes) from the following**

BUS 1300 Social Media Marketing (3)  
BUS 1210 Personal Finance (3)  
BUS 2650 Management Principles for Entrepreneurs (3)  
BUS 1480 Advertising and Promotion (3)  
BUS 2050 Business Law (3)

#### **Required 42 credits (plus 20-21 credits for one area of Emphasis listed below)**

##### **Equine Business Management-Area of Emphasis (21 credits)**

AGBS 1700 Western Riding Skills I (3)  
AGBS 2700 Western Riding Skills II (3)  
AGBS 1900 Horse Breaking and Training I (3)  
AGBS 2900 Horse Breaking and Training II (3)  
ACCT 2010 Financial Accounting (3)  
BUS 1020 Introduction to Business (3) or ACCT 2020 Managerial Accounting (3)  
AGBS 2020 Intro Ag Economics & Agri. Business Mgt. (3) or  
ECON 2010 Introduction to Microeconomics (3)

##### **Equine Production Management-Area of Emphasis (20 credits)**

AGBS 1700 Western Riding Skills I (3)  
AGBS 2700 Western Riding Skills II (3)  
AGBS 1900 Horse Breaking and Training I (3)  
AGBS 2900 Horse Breaking and Training II (3)  
Choose 4 credits (2 classes) from the following  
AGBS 2200 Anatomy & Physiology Domestic Animals + Lab (4)  
AGBS 2500 Breeding and Reproduction (4)  
AGBS 2400 Feeds and Feeding (4)

## **Ag Technology/Mechanics**

### ***Certificate of Proficiency in Agricultural Systems***

BUS 2200 Business Communications or English 1410 (3)  
DMT 1930 & 2930 Leadership and Professional Development (2)  
Math 1715, 1030 or 1040 (3)  
DMT 1101, 1105 Engine repair (5)  
WELD 1030 Related Welding (3)  
AGTM 1210 Small Engine Repair (2)

**Required credits: 18**

### ***Certificate of Completion in Agricultural Systems***

BUS 2200 Business Communications or English 1410 (3)  
DMT 1101/1105 Engine Repair (5)  
DMT 1930 & 2930 Leadership and Professional Development (2)  
WELD 1030 Related Welding (3)  
Math 1715, 1030 or 1040 (3)  
AGTM 1210 Small Engine Repair (2)  
AUTO 1600 Electricity & Electronics (5)  
DMT 1301/1305 Diesels Drivetrains (6)  
AGTM 1050 Farm Machinery Maintenance and Repair (3)

**Required credits: 32**

## ***AAS in Agricultural Systems or Agricultural Mechanics***

### **Mechanics Emphasis**

DMT 1000 Diesel Safety and Basics (1)  
DMT 1101 Diesel Engine Repair and Overhaul (2)  
DMT 1105 Diesel Engine Repair and Overhaul Lab (3)  
DMT 2311 Hydraulics and Pneumatics (2)  
DMT 2315 Hydraulics and Pneumatics Lab (2)  
AGBS 1100 Agri. Business Career Exploration (2)  
BUS 1020 Computer Technology and Application (3)  
DMT 1930 Leadership & Professional Development (1)  
WELD 1030 Related Oxyacetylene & Arc Welding (3)  
DMT 2930 Leadership & Professional Development (1)  
Oral Communications (3)  
Social Behavioral Science or American Institutions (3)  
ENGL 1010 Expository Composition (3)  
AGBS 2020 Ag Econ/ Agribusiness Management (3)  
DMT 1600 Electrical and Electronics 1 (5)  
DMT 1801 Computerized Engine Controls and Fuel (2)  
DMT 1805 Computerized Engine Controls and Fuel Lab (2)

DMT 2801 Emissions Control Systems (2)  
DMT 2805 Emissions Control Systems Lab (2)  
AGTM 1050 Farm Equipment Management (3)  
DMT 1301 Transmissions and Drivetrains (3)  
DMT 1305 Transmissions and Drivetrains Lab (3)  
MTT 1350 Related Machine Shop Practice (2)  
MATH 1715, 1010, 1030, 1040, or 1050 (3 or 4)  
GEO 1700 Fundamentals of GPS and GIS (3)  
BUS 1600 Entrepreneurship Seminar (1)

### **Technology Emphasis**

AGBS 1100 Agri. Business Career Exploration (2)  
GEO 1700 Fundamentals of GBS and GIS (3)  
AGTM 1050 Farm Equipment Management (3)  
ENGL 1010 Expository Composition (3)  
BUS 1020 Computer Technology and Applications (3)  
AGTM 1210 Small Engine Repair (3)  
AGTM 2500 Irrigation Systems (3)  
AGTM 2600 Drones in Agriculture (3)  
Oral Communications (3)  
Social Behavioral Science or American Institutions (3)  
MATH 1030 or 1040 or 1050 (3 or 4)  
INDM 1050 Industrial Safety (1)  
INDM 1600 Industrial Electricity (3)  
INDM 1620 Industrial Electronics (3)  
INDM 1800 Industrial Hydraulics (3)  
INDM 1820 Pumps (3)  
WELD 1020 Shielded Metal Arc Welding (4)  
INDM 1500 Industrial Pneumatics (3)  
INDM 1900 Industrial Controls and PLC (3)  
MTT 1110 Introduction to Precision Machining (3)  
MTT 1125 Introduction to Precision Machining Lab (5)  
INDM 1930 Leadership & Professional Development (1)

Curriculum: Please see Appendix A for a descriptive list of Agriculture program course offerings.

## Appendix B: Agriculture Technology Courses

### **AGBS 1010 Fundamentals of Animal Science**

Semester(s) Taught: Fall

Credits, Lecture hours, Lab hours: (4:4:0)

Description: The historical perspective and importance of animal production will be examined relative to time, society and geographical location. The contribution of animal production and related food products to our society will be covered. Scientific selection, breeding, feeding and management will be studied as they relate to efficiency of production of the various farm animals and consumer demand.

### **AGBS 1100 Career Exploration in Agribusiness**

Semester(s) Taught: Fall

Credits, Lecture hours, Lab hours: (2:2:0)

Description: This class introduces students to a variety of agriculture careers in agribusiness, production, public and private service, and sales and marketing opportunities related to agriculture. Emphasis will be on opportunities in the western United States. A variety of guest lecturers will present real-world insight into various careers. Students will also develop their own professional letter of application and resume.

### **AGBS 1420 Livestock Production Practices**

Semester(s) Taught: Fall, Spring

Credits, Lecture hours, Lab hours: (2:1:2)

Description: Agriculture livestock production enterprises will be examined and production practices and production facilities investigated. A Students will be exposed to a variety of production, processing and marketing methods, both traditional and entrepreneurial, in the fields of beef, dairy, poultry, sheep, goat, and horse animal agriculture.

### **AGBS 1700 Western Riding Skills I**

Semester(s) Taught: Fall

Credits, Lecture hours, Lab hours: (3:2:2)

Description: The objective of this class is to allow students to practice and further develop their horsemanship skills. This course is designed to cover principles of basic horsemanship and will include some of the principles of schooling/training horses that are already broke to ride. An understanding of horse behavior and safe conduct around horses are central to the course. Students will be introduced to the fundamentals of riding, handling and grooming, as well as becoming familiar with the parts of the horse. Students have the opportunity for hands-on application of these principles by actually riding and schooling horses during this course. Topics presented will include horsemanship skills, equine behavior, equine psychology, and how this knowledge can be utilized to produce and present a willing, useful horse. Goals will be set for each student-horse pair, and efforts will be made to reach these goals. Students must have or arrange for their own horse.

### **AGBS 1715 Applied Technical Math**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:3:0)

Description: This course covers the principles of business math and algebra and geometry as they apply to

problem solving in the Business and Applied Technologies (BAT) division programs. It includes basic business mathematical concepts the quadratic equation, exponents and radicals, polynomials, constructions of geometric shapes, the circle concept, and applications of volume and shapes.

### **AGBS 1900 Horsebreaking and Training I**

Semester(s) Taught: Fall

Credits, Lecture hours, Lab hours: (3:2:2)

Description: This course introduces fundamental principles and techniques used in starting and training young horses. It covers safety, equipment, handling principles, and techniques through practical application. Students will begin this course with a horse that has never been ridden. They will learn and apply techniques on this horse to take him from halter broke to riding under the saddle. Students must have or make arrangements to have their own horse.

### **AGBS 2020 Introduction to Agricultural Economics & AgriBusiness Management**

Semester(s) Taught: Spring

Credits, Lecture hours, Lab hours: (3:3:0)

Description: This course will introduce students to important aspects of the agricultural economy, its structure and function, how agricultural markets work, the impact of public policy on agriculture economics, and the relationship between agribusiness and agriculture economics.

### **AGBS 2030 Managerial Analysis and Decision Making**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:3:0)

Description: Using agricultural management software, students will apply management skills to actual agricultural businesses through analysis of real financial and production records. Students will determine a business's strengths and weaknesses and develop recommendations for improving the sustainability of the business. Through presentations from actual business owners, students will see the effect of implementing planned changes on a business. Students will participate in developing a business plan for an agricultural business. AGBS 2020 is a prerequisite for this course, or instructor approval must be given.

Prerequisites: AGBS 2020

### **AGBS 2200 Anatomy and Physiology of Domestic Animals**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:3:0)

General Ed Requirement: Science Inquiry

Description: This class is a study of the anatomy of domestic animals and the functions of the various systems. Each system is studied separately with emphasis on the skeletal, circulatory, digestive and reproductive systems.

Corequisites: AGBS 2205

### **AGBS 2205 Anatomy and Physiology of Domestic Animals Lab**

Semester(s) Taught: Fall

Credits, Lecture hours, Lab hours: (1:0:2)

General Ed Requirement: Life Science Lab

Description: This laboratory setting allows students to physically examine domestic animal tissues, organs, and systems.

Corequisites: AGBS 2200

### **AGBS 2400 Livestock Feeds and Feeding**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (4:4:0)

Description: Students will study the differences in digestive tracts of farm animals and the related digestive physiology. The composition of feeds and their uses are analyzed and ration balancing is practiced. Least cost rations are balanced for farm animals and pets using a pencil, a calculator and computer.

### **AGBS 2500 Applied Animal Reproduction & Breeding**

Semester(s) Taught: Fall

Credits, Lecture hours, Lab hours: (4:4:0)

Description: This course introduces students to animal reproduction. The course will cover the anatomy, function and regulation of livestock animal's reproductive cycle. Breeding systems and processes, including artificial insemination, embryo transfer, semen evaluation and collection, synchronization, pregnancy diagnosis, parturition and lactation, will be covered. Students will be introduced to genetic selection principles and methods of genetic and production measurement for the improvement of livestock.

### **AGBS 2700 Western Riding Skills II**

Semester(s) Taught: Spring

Credits, Lecture hours, Lab hours: (3:2:2)

Description: This course is designed for the intermediate rider and will allow students to further practice and develop riding skills. Students will concentrate on improving control and execution of aids, collection and control, and interpreting horse behavior. Students will also be introduced to more advanced equitation maneuvers and patterns as they are encouraged to develop skills useful for training and showing horses. Instruction will review and improve knowledge and skills in barn safety, horse health care, and riding techniques. There will be mounted as well as un-mounted (classroom) lessons. Students must have or arrange for their own horse.

Prerequisites: Western Riding & Horsemanship I

### **AGBS 2900 Horse Breaking and Training II**

Semester(s) Taught: Spring

Credits, Lecture hours, Lab hours: (3:2:2)

Description: This course introduces more advanced principles and techniques used in starting and training young horses. It covers safety, equipment, handling principles, and techniques through practical application. Students will begin this course with a horse that was either used in the Horse Breaking & Training I course or with a horse that has no more than 30 days riding time. They will learn and apply techniques on this horse to take him from beginning riding under the saddle to work or competition suitable

and marketable for sale. Students must provide or have access to their own horse.;  
Prerequisites: Horse Breaking & Training I

### **AGTM 1050 Farm Machinery Maintenance, Management and Operation**

Semester(s) Taught: Fall

Credits, Lecture hours, Lab hours: (3:2:2)

Description: This course prepares students to analyze the factors that comprise safe machinery management and operation, and to explain the function of various machines and mechanisms. Students will learn machinery operation, farm machinery safety, procedures for diagnosing machinery problems, and processes for making machinery management decisions.

### **AGTM 1210 Small Engines Power Systems**

Semester(s) Taught: Fall

Credits, Lecture hours, Lab hours: (2:1:2)

Description: Students will apply principles and techniques of small engine power systems used in the agricultural industry, particularly agricultural production. Proper use of tools, equipment, and safety will be emphasized in maintaining and repairing small engines.

### **AGTM 1330 Chemicals and Applications**

Semester(s) Taught: Fall

Credits, Lecture hours, Lab hours: (2:1:2)

Description: This course is designed to familiarize students with agricultural pests and measures for pest control. Special emphasis will be placed on using the proper equipment and techniques for applying pesticides. Equipment and methods used to apply pesticides in agriculture with emphasis on techniques to avoid misapplication and pesticide drift.

### **AGTM 2500 Irrigation Systems Equipment Maintenance and Repair**

Semester(s) Taught: Spring

Credits, Lecture hours, Lab hours: (3:2:2)

Description: This course will introduce students to the management and technology used in sprinkler irrigation systems. Emphasis will be on pivot maintenance and operation of Variable Rate (precision) Irrigation. Water requirements, water resources, application methods, types and selection of irrigation equipment, application time and rates, irrigation well principles and operation, maintenance and repair, costs and return will be covered.

### **AGTM 2600 Drones in Agriculture and Associated Computer Applications**

Semester(s) Taught: Spring

Credits, Lecture hours, Lab hours: (3:2:2)

Description: This course will offer an introduction to Unmanned Aerial Systems (UAS) used in precision agriculture. This course will focus on hands-on learning of hardware and software on the college farm, discussion on related topics and ideas, and federal licensing requirements.

### **FRM 2010 Farm/Ranch Management I**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (2:1:2)

Description: This course is designed to teach individual farmers/ranchers to organize and computerize their farm/ranch records. Individualized instructional format focuses on record keeping with emphasis on using, operating, and maintaining computerized records. Class will consist of monthly farm/ranch visits with some group instruction. Students will receive either a P (passing) or F (failing) grade at the conclusion of their enrollment year. Students are registered upon instructor approval.

### **FRM 2020 Farm/Ranch Management II**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (2:1:2)

Description: This course is a continuation of Farm/Ranch Management I. Instruction emphasizes the organization of farm/ranch financial and production information into enterprises and completion of a fiscal year-end enterprise analysis report. Class will consist of monthly face-to-face farm/ranch visits with some group instruction. Students will receive a P (passing) or F (failing) grade at the conclusion of the semester. Students are registered upon approval from the instructor.

Prerequisites: FRM 2010

### **FRM 2030 Farm/Ranch Management III**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (2:1:2)

Description: This course is a continuation of Farm/Ranch Management II. Instruction emphasizes budgeting, cash flow planning, and total farm/ranch record analysis for management decision making. Class will consist of monthly face-to-face on farm/ranch visits with some group instruction. Students will receive a P (passing) or F (failing) grade at the conclusion of their enrollment year. Students are registered upon approval from the instructor.

Prerequisites: FRM 2020

### **FRM 2040 Farm/Ranch Management IV**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (5:0:1)

Description: This course is designed to teach advanced principles of farm/ranch business management and is designed to meet specialized individual student needs. Five areas of specialization are emphasized. Individual instruction focuses on one or more of the following areas: inventory management, production records, and financial analysis; different business entities and how they are structured; various agricultural leasing options; tax planning information; and market planning.

Prerequisites: FRM 2030

## Appendix C: Curriculum Map and Assessment Plan

# Snow College Agribusiness Curriculum Map

### Summary:

Agriculture has been part of Snow College from the beginning of the college. Currently the Agriculture program focuses on the business of farming and ranching and agribusiness. The Agri. Business program is committed to building on our agriculture heritage with the goal of serving students with sound exceptional programs to build skills for successfully running and operating an agribusiness.

### Outcomes:

Students who complete an AS with emphasis in Agriculture Business, or students who complete an AAS in Ag Business or either of the Ag Business certificates should expect the following outcomes from the program:

1. Are familiar with internal and external business and economic forces that effect the business environment of agricultural business.
2. Are comfortable and confident in expressing ideas and organizing ideas into presentations and able to interact with others.
3. Be able to produce clear, purposeful and grammatically correct written documents.
4. Have the ability to keep financial and production records and apply financial and production records to decision making.
5. Be familiar and know the terminology of animal biological and systems.
6. Be able to work with a partner or as a team to prepare and present a presentation an informative and effective presentation on a substantive agriculture topic.
7. Know fundamental use of computers in an agriculture business management setting using spreadsheets, accounting software and basic agriculture business analysis software.

Program Coursework and Assessment	Knowledge Area: Agribusiness							Meets another Program level outcome
	Familiar with internal and external business and economic forces that effect the agriculture business environments	Are comfortable in expressing ideas and organizing ideas into presentations and able to interact with others.	Be able to produce clear, purposeful and grammatically correct written documents.	Have the ability to keep financial and production records and apply financial and production records to decision making.	Be familiar and know the terminology of animal biological and systems.	Be able to work with a partner or as a team/group to prepare and present an informative and effective presentation on a substantive agriculture topic.	Know fundamental use of computers in an agriculture business management setting using spreadsheets, accounting software and basic agriculture business analysis software.

# Snow College Equine Management Curriculum Map

## Summary:

The Ag Business program is designed to prepare students with a sound educational background in agriculture business while striving to meet the needs of a student's goals. The addition of the AAS in Equine Management expands the scope and credentials of the Ag Business Department and increase the opportunities for students desiring to be involved in the evolving and expanding equine related industry by allowing them to:

- Return to the family farm/ranch equine business with the ability to better manage it as a business.
- Discover and develop an entrepreneurial mind set for establishing an equine related business.
- Gain employment as an equine industry sales representative in feed and supply, e.g. nutrition and feed supplements, saddles, rope, and other equine equipment.
- Transfer to a university for a four-year Bachelor of Science degree in Equine Management, or a related agriculture field.
- Major in another discipline but give them the tools to work part-time, own, or be involved in an equine or equestrian boarding, training, or production agriculture business that has equine component or own and operate a farm/ranch.

## Outcomes:

A student who completes an AAS degree in Equine Management at Snow College should expect to leave with the following outcomes:

### Acquire substantive knowledge:

1. Students will understand the fundamentals of an equine management or equine production business and the relationship of equine management in the agriculture industry.
2. Students will understand that equine management encompasses people's love for the horse for recreation, entertainment, sport, and work.

### Communications:

3. Students will be able to organize and effectively present themselves to prospective employers and customers using both verbal and written communication.
4. Students will be able to produce clear, concise purposeful and grammatically correct written documents.

Program Coursework and Assessment	Knowledge Area: Equine Management				
	Understand the fundamentals of an equine management or equine production business and the relationship of equine management in the agriculture industry.	Understand that equine management encompasses people's love for the horse for recreation, entertainment, sport, and work.	Organize and effectively present themselves to prospective employers and customers using both verbal and written communication.	Produce clear, concise purposeful and grammatically correct written documents.	Meets another Program level outcome

# Snow College Agriculture Technology/Mechanics Curriculum Map

## Summary:

The Agriculture Technology/Mechanics program is currently designed to prepare students with a sound educational background in agriculture technologies and management practices while striving to meet the needs of student goals. The addition of a Certificate of Completion that is stackable into a new AAS in Agricultural Technology/Mechanics the program will expand the scope and credentials of the Agribusiness department and increase the opportunities for students desiring to be involved in the evolving and expanding agriculture technology industry.

## Outcomes:

Students who complete an AS with emphasis in Agriculture Technology/Mechanics, or students who complete an AAS in Ag. Technology or Ag. Mechanics should expect the following outcomes from the program:

1. Are familiar with current theories and processes in planning, analyzing, and directing an agriculture business.
2. Are confident in expressing ideas and organizing ideas into presentations and able to interact with others.
3. Be able to produce clear, purposeful and grammatically correct written documents.
4. Know fundamental use of computers in an agriculture business management using spreadsheets, accounting software and basic agriculture business analysis software.

# Snow College Farm & Ranch Management Curriculum Map

## Summary:

Snow College offers a Farm/Ranch Management program to assist farm/ranch families in achieving their business and personal goals by improving the profit- ability of their business.

The program teaches farmers and ranchers to keep detailed computerized financial and production records and to use these records in making timely and intelligent business decisions. Some computer literacy is also taught. The focus is on education and not merely a "bookkeeping service."

Management of a farm/ranch is primarily a decision-making process. To be successful in management and decision-making processes, the course is composed of various units taught in an organized sequence. Approximately 135 contact hours are required to complete the program.

## Outcomes:

Students who complete courses in Farm/Ranch Management will be expected to demonstrate that they:

1. Can post income and expenses to the accounting system using the chart of accounts.
2. Able to reconcile their accounting system with their monthly back statements.
3. Create a profit and loss statement.
4. Able to generate and maintain an accurate balance sheet.
5. Students will recognize the need for both financial and non-financial records.
6. Apply financial and production records in decision making.
7. Understand the principle purpose of financial statements in obtaining loans and providing information for income taxes.
8. Develop a budget and monitor actual to budget income and expenses.
9. Students will demonstrate their ability to perform a complete business analysis.
10. Students will be able to keep and analyze all whole farm and enterprise financial records.
11. Benchmark their production and financial benchmarks.

## Allied Health/Nursing Program Review

representing courses taught in Certified Nursing Assistant, Practical Nursing, and Registered Nurse  
Ag Technology/Mechanics and Farm/Ranch Management

submitted to Snow College Board of Trustees and the  
Utah State Board of Regents  
Summer 2019

**Reviewed by ACEN Fall Semester 2018 with the rating of recommended (see attached accreditation letter)**

### Reviewers

- Marsal P. Stoll, EdD, MSN, Chief Executive Officer for the Accreditation Commission for Education in Nursing.
- Sandra Baker, Peer Evaluator for the Accreditation Commission for Education in Nursing
- Melissa Copperwheat, Peer Evaluator for the Accreditation Commission for Education in Nursing

### Program Description

Nursing is an exciting career field that offers a variety of interesting opportunities. Being able to work in diverse work settings, having flexible hours, and the chance to travel the world are some of the opportunities that a nurse has. Nurses also can make a difference in people's lives by the caring and compassionate services they provide, making this a very satisfying career.

Not only is nursing very rewarding it is also one of the fastest growing occupations in the U.S. There is a greater need in the nation, and across the world, to hire nurses than any other healthcare worker. According to the Bureau of Labor Statistics, the job outlook for Practical and Registered Nurses are projected to grow 12+% faster than the average occupation. Nursing is a prestigious and in-demand profession that offers good earning potential and job security.

The Snow College Allied Health Department offers CNA, PN, and PN-RN programs. These programs develop the critical thinking skills necessary to be successful and provide opportunities to engage in the community and with patients. The nursing department also has a state-of-the-art lab facility on the Richfield and Ephraim campuses to give students a hands-on experience that is essential for a well-rounded education. The nursing department is committed to a thorough education that will enable students to have a successful career and be caring providers.

### Mission Statement

The Mission of Snow College Allied Health Department is threefold:

- To educate students for health care fields.
- To inspire them to love learning.

- To lead them to serve others.

Through quality instruction the Allied Health Department also facilitates the development of integrity, responsibility, a desire for life-long learning, and a commitment to community services as health care providers.

The Snow College Allied Health department offers courses of study in the following entry-level health-related occupations:

- Registered Nurse (PN-RN)
- Practice Nurse (LPN)
- Nursing Assistant (CNA)

There are also several degree pathways to assist students such as Practice Nursing Certificate, RN/ASN degree, Pre-Dental Hygiene, Pre-Medical/Pre-Dental, Pre-Occupational Therapy, Pre-Pharmacy, and Pre-Physical Therapy.

### **Nursing Assistant/Home Health Aide**

Certified Nursing Assistant positions are available at hospitals, home health care centers, and long term care facilities.

Applicants for certified nursing assistant (CNA) training are required to complete an academic training course. For those who want to practice in Utah, you need to complete at least 80 hours or more to be eligible for a Utah CNA license. All states in the country divide their CNA training programs into two parts. These portions are the clinical and classroom training. CNA trainees will need to have clinical experience as part of the requirements for a Utah CNA license.

The clinical part of the CNA training is usually more intense and requires an untiring physical energy. The written or the classroom training will help prepare the students for the physical and mental requirements of a CNA clinical training as well as the actual CNA role in the real world.

The Snow College CNA class is 1 semester. Classes are 80 hours of lecture and 40 hours of clinicals. This course is offered on the Richfield and Ephraim campus as well as our outreach sites: Delta, Fillmore, Nephi, Piute, and Wayne.

### **Practical Nursing**

The Practical Nursing program offers the students a Certificate of Completion in Practical Nursing and eligibility to take the State Board Examination leading to licensing as a Practical Nurse in Utah. The Snow College Practical Nursing program is designed to qualify as the first year of the RN program.

Acceptance into the LPN program is based on a point system. Students must apply to be accepted into the program. We accept up to 45 students; all 45 students are filled from the same application pool. Classes will be held at the Snow College Richfield Campus, Ephraim Campus and the Nephi Campus using video conferencing technology and live instruction. Each classroom has microphones allowing students from

each campus to participate in all lectures and discussions. Students from all campuses will travel about six times a month to these different sites for labs and activities.

Licensed Practical Nurses may find career opportunities in such places as doctors' offices, hospitals, home health care facilities, and long-term care facilities.

The practical nursing program is accredited by the Accreditation Commission for Education in Nursing, Inc. (ACEN).

### Registered Nursing Program

Snow College RN program is a 1 plus 1 nursing program. Students will first receive a Practical Nursing Certificate. Students then enter the PN-RN program where they receive an Associate of Science in nursing which allows them to take the RN-NCLEX exam.

Acceptance into the PN-RN program is based on a point system. Students must apply to be accepted into the program. We can accept up to 40 students; all 40 students are filled from the same application pool. Current Snow College LPN students will have the opportunity to transfer directly into the PN-RN program if all qualifications are met; an application is still required for those who are interested in transferring to ensure qualifications. Students must submit a PN-RN application by the March 1st deadline.

Classes will be held at the Snow College Richfield Campus and Ephraim Campus. Caring instructors teach concurrently by live instruction and video conferencing, allowing students from both campuses to participate in all lectures and discussions. Students are required to travel occasionally to meet as a group at one campus for labs and other activities.

Snow College's RN program is accredited from the Accreditation Commission for Education in Nursing Inc. (ACEN).

### 2018 Allied Health Faculty Profile

Faculty Name	FT/PT	Date of Initial Appointment	Rank	Bachelor Degree	Institution Granting Degree	Graduate Degree	Institution Granting Degree	Area of Clinical Expertise	Academic Teaching and Other Responsibilities

At the nursing program level, a target approach is used to support the students. Each new student is required to attend RN student orientation or LPN student orientation held prior to the first day of the semester. Students and faculty review policy and procedures that are specific to the nursing program on the orientation day. Nursing students are strongly encouraged to participate in student study groups and are given assignments and projects that require them to work in learning communities.

Nursing Students also receive informal advising from the nursing faculty. If a student either fails an examination with less than 80% or has a test score the student is not satisfied with, he/she may request an appointment with the instructor individually to review the test and their test preparation methods. Students who continue to show poor results receive continued counseling and additional study support and would eventually follow the grading policy that can be in the student handbook.

In addition to counseling, the nursing program has adopted the Kaplan integrated testing product to use in all didactic courses. Faculty is to oversee the Kaplan testing results and provide reports to the administrator regarding the student's trends and any area of concern.

### Student Learning Outcomes

There are ten nursing program student learning outcomes (SLOs), nine of which were developed for the PN program at its inception. The tenth SLO was added at the inception of the RN program after discussion with the advisory board and faculty members in the October 2012 advisory meeting. SLOs were recently modified for clarity and conciseness with the input of all faculty members. Program outcomes, including student performance on licensure exam, program completion, graduate program satisfaction, employer program satisfaction, and job placement rates are found in ACEN Standard 6. Student learning outcomes support the achievement of program outcomes.

<u>Snow College RN Program Purpose and Student Learning Outcomes (SLOs)</u>	<u>National League for Nursing (NLN) Outcomes and Competencies for ASN Programs</u>	<u>Utah Nurse Practice Act and National Council of State Boards of Nursing (NCSBN) Rules</u>	<u>American Nurses Association Scope and Standards of Practice</u>
<p><b><i>The Snow College Registered Nursing program will prepare students to sit for and pass the National Council Licensure Examination (NCLEX-RN) of the National Council of State Boards of Nursing (NCSBN). All graduates will earn an Associate of Science degree and be prepared to go directly into the workforce and/or choose to continue to study towards a higher nursing degree.</i></b></p>	<p>Associate degree (AD) nursing education provides the basic education necessary to become a registered nurse. Graduates are eligible to sit for the NCLEX-RN examination and, if licensed, may practice in structured care settings, including hospitals, long-term care facilities, clinics, and offices. Associate degree nursing education incorporates nursing knowledge, knowledge of key biological and social sciences, and study of the humanities in a program that typically requires at least two years (65-75 credits) of study in a junior</p>	<p>Upon program initiation in 2013 the program purpose was consistent with the Nurse Practice Act Rule R156-31b-603 (m) which read “the program shall require students to obtain general education, pre-requisite, and co-requisite courses from a regionally accredited institution of higher education, or have in place an articulation agreement with a regionally accredited institution of higher education” (pp. 13-14). The recently revised 2015 Utah Nurse Practice Act has omitted specific nursing education program requirements, granting</p>	<p>“The registered nurse is licensed and authorized by a state, commonwealth, or territory to practice nursing. Professional licensure of the healthcare professional is established by each jurisdiction to protect the public safety and authorize the practice of the profession The registered nurse is educationally prepared for competent practice at the beginning level upon graduation from an accredited school of nursing and qualified by national examination for RN licensure. ANA has consistently affirmed the baccalaureate degree in nursing as the preferred</p>

<p>The student will:</p>	<p>or community college (NLN, 2010, pp. 37-8).</p>	<p>limited approval to programs seeking national accreditation.</p>	<p>educational preparation for entry into nursing practice” (ANA, 2010, p. 14). The Snow College PN to ASN program is aligned with the SUU BSN program.</p>
<p><b>1. Apply basic principles from the biological and behavioral sciences and nursing theory to determine nursing actions for individuals and their families in a variety of health care settings.</b></p>	<p>Nursing Judgment: Make judgments in practice, substantiated with evidence, that integrate nursing science in the provision of safe, quality care and promote the health of patients within a family and community context (NLN, 2010, p. 38).</p> <p><b>Both statements read that graduates apply scientific evidence to provide care for patients and families.</b></p>	<p>This outcome is consistent with the Utah Nurse Practice Act definition 58-31b-102 number 14 which reads, “The practice of nursing requires substantial specialized or general knowledge, judgment, and skill based upon principles of the biological, physical, behavioral, and social sciences (p. 4); and R156-31b-703b of the current Utah Nurse Practice Act Rules, which reads, “An RN shall be expected to: (c) apply nursing knowledge effectively in the synthesis of the biological, psychological, spiritual, and social aspects of the patient’s condition” (p. 14).</p>	<p>“The registered nurse is educated in the art and science of nursing, with the goal of helping individuals and groups attain, maintain, and restore health whenever possible” (ANA, 2010, p. 14). “Nursing is a learned profession built on a core body of knowledge that reflects its dual components of science and art. Nursing requires judgment and skill based on principles of the biological, physical, behavioral and social sciences” (ANA, 2010, p. 22).</p>
<p><b>2. Participate as a member of a nursing team assigned to complete patient assessments, including planning, implementation, and evaluation of nursing care to assist clients of all ages to meet their functional needs.</b></p>	<p>Nursing Judgment: Make judgments in practice, substantiated with evidence, that integrate nursing science in the provision of safe, quality care and promote the health of patients within a family and community context (NLN, 2010, p. 38).</p> <p><b>Both statements read that graduates make judgments based on the nursing process, which is</b></p>	<p>This outcome is consistent with the Utah Nurse Practice Act definition 58-31b-102 number 16 which reads, “Registered nursing acts include a) assessing the health status of individuals and groups, b) identifying health care needs, c) establishing goals to meet identified health care needs, d) planning a strategy of care, e) prescribing interventions to implement the strategy of care, f) implementing the strategy of care, g)</p>	<p>“The Standards of Practice describe a competent level of nursing care as demonstrated by the critical thinking model known as the nursing process. The nursing process includes the components of assessment, diagnosis, outcomes identification, planning, implementation, and evaluation. Accordingly, the nursing process encompasses significant actions taken by registered nurses and forms the foundation of the</p>

	<p><b>based on nursing scientific methodology.</b></p>	<p>maintaining safe and effective nursing care that is rendered to a patient directly or indirectly, and h) evaluating responses to interventions” (p. 4).</p> <p>This outcome is also consistent with the NCSBN Model Act (p. 2) which reads that “the practice of registered nursing shall include: providing comprehensive nursing assessment of the health status of patients, establishing nursing diagnoses; setting goals to meet identified health care needs, prescribing nursing interventions, and evaluating responses to interventions and the effectiveness of the plan of care.”</p>	<p>nurse’s decision making (ANA, 2010, p. 9). Participation as a member of a nursing team is supported by ANA Standard 13: Collaboration, which reads “The registered nurse collaborates with healthcare consumer, family, and others in the conduct of nursing practice” (ANA, 2010, p. 11).</p>
<p><b>3. Safely implement evidence-based psychomotor skills within the RN scope of practice.</b></p>	<p>Nursing Judgment: Make judgments in practice, substantiated with evidence, that integrate nursing science in the provision of safe, quality care and promote the health of patients within a family and community context (NLN, 2010, p. 38).</p> <p><b>Both statements read that graduates safely care for patients and families.</b></p>	<p>This outcome is consistent with definition (g) maintaining safe and effective nursing care that is rendered to a patient directly or indirectly, as well as R156-31b-703b, Scope of Nursing Practice Implementation, which reads, in part, “An RN shall be expected to (i) ensure that organizational policies, procedures, and standards of nursing practice are developed, kept current, and implemented to promote safe and effective nursing care” (p. 15).</p> <p>This outcome is also consistent with the NCSBN Model Act (p. 2) which reads that “the practice of</p>	<p>This outcome is consistent with the ANA Standard of Practice 5B, which reads that “the registered nurse employs strategies to promote health and a safe environment” (ANA, 2010, p. 10) and the ANA Standards of Professional Performance 15 and 16, which read, respectively, “The registered nurse utilizes appropriate resources to plan and provide nursing services that are safe, effective, and financially responsible” and “The registered nurse practices in an environmentally safe and healthy manner” (ANA, 2010, p. 11). Page 12 of this document reads, “Skills</p>

		registered nursing shall include: implementing nursing care through the execution of independent nursing strategies, and the provision of regimens requested, ordered or prescribed by authorized health care providers.”	include psychomotor, communication, interpersonal, and diagnostic skills.”
<b>4. Use effective communication skills with clients, family members, and health team members.</b>	Human Flourishing: Advocate for patients and families in ways that promote their self-determination, integrity, and ongoing growth as human beings (NLN, 2010, p. 38). <b>Both statements infer that graduates advocate for patients and families by effectively communicating with or about them.</b>	<p>This outcome is consistent with R156-31b-703b, Scope of Nursing Practice Implementation, which reads, in part, “An RN shall be expected to (a-ii) determine whether, and according to what timeframe, another medical professional, a patient’s family member, or any other person should be apprised of a patient’s nursing needs; and (k) communicate with other health team members regarding patient choices, concerns, and special needs, including patient status and progress; patient response or lack of response to therapies; and significant changes in patient condition” (pp. 14-15).</p> <p>This outcome is also consistent with the NCSBN Model Act (p. 2) which reads that “the practice of registered nursing shall include: communicating and collaborating with other health care providers in the management of health care.”</p>	<p>This outcome is consistent with Standards 5A, Coordination of Care and 11, Communication, which reads that “the registered nurse communicates effectively in a variety of formats in all areas of practice” (ANA, 2010, pp. 11, 40, and 54). It is also consistent with Standard 12, Leadership, the competencies of which read, “The RN develops communication and conflict resolution skills and communicates effectively with the healthcare consumer and colleagues” (ANA, 2010, p. 55). Standard 13, Collaboration, reads that the RN “communicates with the healthcare consumer, the family, and healthcare providers regarding healthcare consumer care and the nurse’s role in the provision of that care” (p. 57).</p>
<b>5. Provide health education for</b>	Professional Identity: Implement one’s role as a	This outcome is consistent with R156-31b-703b,	This outcome is consistent with Standard of Practice

<p><i>individuals, families, and peers.</i></p>	<p>nurse in ways that reflect integrity, responsibility, ethical practices, and an evolving identity as a nurse committed to evidence-based practice, caring, advocacy, and safe, quality care for diverse patients within a family and community context (NLN, 2010, p. 38).</p> <p><b>Both statements read that graduates implement their roles as nurses by providing health education based on the most recent and accurate scientific evidence.</b></p>	<p>Scope of Nursing Practice Implementation, which reads, in part, “An RN shall be expected to (m) teach and counsel patient families regarding an applicable health care regimen, including general information about health and medical conditions, specific procedures, wellness, and prevention” (p. 15).</p> <p>This outcome is also consistent with the NCSBN Model Act (p. 2) which reads that “the practice of registered nursing shall include: designing and implementing teaching plans based on patient needs.”</p>	<p>5B, Health Teaching and Health Promotion, for which the competencies read that the registered nurse “provides health teaching that addresses such topics as healthy lifestyles, risk-reducing behaviors, developmental needs, activities of daily living, and preventive self-care” and “uses health promotion and health teaching methods appropriate to the situation and the healthcare consumer’s values, beliefs, health practices, developmental level, learning needs, readiness and ability to learn, language preference, spirituality, culture, and socioeconomic status” (ANA, 2010, p. 41).</p>
<p><b>6. Demonstrate concern for sociocultural and spiritual values when interacting with clients and health team members in a variety of settings.</b></p>	<p>Human Flourishing: Advocate for patients and families in ways that promote their self-determination, integrity, and ongoing growth as human beings (NLN, 2010, p. 38).</p> <p><b>Both statements read that graduates advocate for patient’s values and self-determination based on their spiritual and sociocultural backgrounds.</b></p>	<p>This outcome is consistent with R156-31b-703b of the current Utah Nurse Practice Act Rules, which reads, “An RN shall be expected to: (c) apply nursing knowledge effectively in the synthesis of the biological, psychological, spiritual, and social aspects of the patient’s condition” (p. 14).</p>	<p>This outcome is consistent with several competencies in the Standards of Practice and the Standards of Professional Performance, including number 1, which reads that the registered nurse collects cultural and spiritual data, identifies cultural barriers to effective communication, and honors consumer care preferences (ANA, 2010, p. 32). It is also supported by Standard 3, Outcomes Identification, in which the registered nurse derives culturally appropriate expected outcomes (p. 35), and Standard 4, in which the registered nurse develops a plan</p>

			considering the person's values, beliefs, spiritual and health practices, and culture (p. 36). Standard 5, Implementation, reads that the registered nurse "provides holistic care that addresses the needs of diverse populations across the lifespan, and applies knowledge of cultural diversity in implementing the plan of care (p. 38). Standard 14, Professional Practice Evaluation, reads that the registered nurse provides care in a culturally and ethnically sensitive manner (ANA, 2010, p. 59).
<b>7. Display responsibility and accountability for his/her nursing care utilizing ethical and legal principles within their scope of practice.</b>	<p>Professional Identity: Implement one's role as a nurse in ways that reflect integrity, responsibility, ethical practices, and an evolving identity as a nurse committed to evidence-based practice, caring, advocacy, and safe, quality care for diverse patients within a family and community context (NLN, 2010, p. 38).</p> <p><b>Both statements read that graduates will practice with integrity and responsibility, utilizing ethical principles.</b></p>	This outcome is consistent with R156-31b-703b, Scope of Nursing Practice Implementation, which reads, in part, "An RN shall be expected to (e) demonstrate appropriate decision making, critical thinking, and clinical judgment to make independent nursing decisions and to identify health care needs and (j) appropriately advocate for patients by respecting patients' rights, concerns, decisions, and dignity" (p. 14).	This outcome is consistent with ANA Standard of Professional Performance 7, Ethics, which reads that the registered nurse practices ethically using <i>Code of Ethics for Nurses with Interpretive Statements</i> (ANA, 2015) to guide practice. Other competencies include that the registered nurse "upholds healthcare consumer confidentiality within legal and regulatory parameters; assists healthcare consumers in self-determination and informed decision-making, and contributes to resolving ethical issues" (ANA, 2010, p. 47).
<b>8. Select appropriate goals for continued self-growth and vocational mobility to achieve his/her full potential.</b>	Professional Identity: Implement one's role as a nurse in ways that reflect integrity, responsibility, ethical practices, and an evolving identity as a nurse	This outcome is consistent with R156-31b-303, RN License Renewal and Continuing Education (3-a), which reads, "An RN shall complete one of the	This outcome is consistent with the ANA Standard of Professional Performance 8, Education, and 14, Professional Practice Evaluation (pp. 49 and 59).

	<p>committed to evidence-based practice, caring, advocacy, and safe, quality care for diverse patients within a family and community context (NLN, 2010, p. 38).</p> <p><b>Both statements read that graduates will continue to evolve in their nursing practice.</b></p>	<p>following during the two-year period immediately preceding the date of application for renewal: (i) licensed practice for not less than 400 hours; (ii) licensed practice for not less than 200 hours and completion of 15 contact hours of approved continuing education; or (iii) completion of 30 contact hours of approved continuing education hours" (p. 6).</p>	<p>"The registered nurse attains knowledge and competence that reflects current nursing practice by participating in ongoing educational activities related to appropriate knowledge bases and professional issues and demonstrating a commitment to lifelong learning." The registered nurse evaluates her or his own nursing practice by engaging in "self-evaluation of practice on a regular basis, identifying areas of strength as well as areas in which professional growth would be beneficial" and taking "action to achieve goals identified during the evaluation process."</p>
<p><b>9. Provide service to classmates, clients, families, community, and health team members.</b></p>	<p>Human Flourishing: Advocate for patients and families in ways that promote their self-determination, integrity, and ongoing growth as human beings (NLN, 2010, p. 38).</p> <p><b>Both statements read that graduates advocate for patients through service.</b></p>	<p>This outcome is consistent with the Nurse Practice Act definition number 14 which reads, "Practice of nursing means assisting individuals or groups to maintain or attain optimal health, implementing a strategy of care to accomplish defined goals and evaluating responses to care and treatment. The practice of nursing includes a) initiating and maintaining comfort measures, b) promoting and supporting human functions and responses, and c) establishing an environment conducive to well-being" (p. 3).</p> <p>This outcome is also consistent with the NCSBN Model Act (p. 2) which</p>	<p>In the section on caring and nursing practice (ANA, 2010, p. 25), it reads that the essence of nursing practice is caring. "Swanson (1993) builds on Watson's framework and described five caring processes and specific techniques for putting them into practice. They are "a) maintaining belief in persons and their capacity to make it through events and transitions, b) striving to understand an event as it has meaning in the life of the other, c) being emotionally present with the other, d) doing for the other what they would do for themselves if it were possible, and e) facilitating the other's passage through life transitions and</p>

		<p>reads that “the practice of registered nursing shall include: advocating the best interest of patients.”</p>	<p>unfamiliar events” (page 25 and 26). Service to colleagues, clients, their families, and the community is an integral component of caring, which is the foundation of nursing practice.</p>
<p><b>10. Display leadership abilities through application of management principles, critical thinking, delegation, and prioritization of care.</b></p>	<p>Spirit of Inquiry: Examine the evidence that underlies clinical nursing practice to challenge the status quo, question underlying assumptions, and offer new insights to improve the quality of care for patients, families, and communities (NLN, 2010, p. 38).</p> <p><b>Both statements read that graduates will lead the professional of nursing by using critical thinking.</b></p>	<p>This outcome is consistent with the Nurse Practice Act definition number 14 which reads, “Practice of nursing includes (g) delegating nursing interventions that may be performed by others and are not in conflict with this chapter.” This outcome is also consistent with definition number 16 which reads, “Registered nursing acts include (j) managing and supervising the practice of nursing” (p. 3). This outcome is also consistent with R156-31b-703b, Scope of Nursing Practice Implementation (2), which reads, “An RN shall be expected to (l) demonstrate the ability to responsibly organize, manage, and supervise the practice of nursing by (i) delegating tasks in accordance with these rules and applicable statutes; and (ii) matching patient needs with personnel qualifications, available resources, and appropriate supervision” (pp. 14-15).</p> <p>This outcome is also consistent with the NCSBN Model Act (p. 2) which reads that “the practice of registered nursing shall</p>	<p>Standard 12, Leadership, reads that the registered nurse demonstrates leadership in the professional practice setting and the profession. Competencies include that the registered nurse “oversees the nursing care given by others while retaining accountability for the quality of care given to the healthcare consumer” (ANA, 2010, p. 55). Under Standard 15, Resource Utilization, the registered nurse “delegates elements of care to appropriate healthcare workers in accordance with any applicable legal or policy parameters or principles” (p. 60). Under Standard 5A, Coordination of Care, the registered nurse “manages a healthcare consumer’s care in order to maximize independence and quality of life” (p. 38).</p>

		include: delegating and assigning nursing interventions to implement the plan of care.”	
--	--	---	--

The curriculum incorporates the current a) National League for Nursing (NLN) ASN outcomes and competencies, b) Utah Nurse Practice Act and Rules requirements for nursing education, c) National Council of State Boards of Nursing (NCSBN) Model Act, and (d) American Nurses Association (ANA) Scope and Standards of Practice. The NLN competencies may be found in the latest publication of Outcomes and Competencies for Graduates of Practical/Vocational, Diploma, Associate Degree, Baccalaureate, Master’s, Practice Doctorate, and Research Doctorate Programs in Nursing (NLN, 2010). The NLN publication referenced above will be present in the DDR. A printed copy of the Utah Nurse Practice Act and Rules will be available in the DDR. A printed copy of the NCSBN Model Act will be available in the DDR. A printed copy of the ANA Scope and Standards of Practice will be available in the DDR. Please see Table 4.1.2, which lists the ten RN program student learning outcomes (SLOs) and delineates how they are consistent with established professional standards, guidelines, and competencies. Note: (DDR was a display and document room where resources were provided for on-campus reviewers.)

The following table provides the percentage of students’ feelings that respective SLOs where met/not met. Data was taken from four distinct nursing courses.

**Student Learning Outcomes Course Reviews 2014-2015**

	Richfield - 1.61	Richfield – 1.79	Richfield – 1.70
	Overall – 1.53	Overall – 1.92	Overall – 1.73
6. Demonstrate concern for sociocultural and spiritual values when interacting with clients and health team members in a variety of settings	Ephraim – 1.67	Ephraim – 2.10	Ephraim – 1.89
	Richfield – 1.78	Richfield – 1.79	Richfield – 1.79
	Overall 1.73	Overall – 1.92	Overall – 1.83
7. Display responsibility for his/her nursing care utilizing ethical and legal principles within their scope of practice.	Ephraim – 1.67	Ephraim – 2.10	Ephraim – 1.89
	Richfield – 1.56	Richfield – 1.86	Richfield – 1.71
	Overall – 1.60	Overall – 1.96	Overall – 1.78
8. Select appropriate goals for continued self-growth and vocational mobility to achieve his/her full potential.	Ephraim – 1.50	Ephraim – 2.10	Ephraim – 1.80
	Richfield – 1.61	Richfield – 1.86	Richfield – 1.74
	Overall – 1.57	Overall – 1.96	Overall – 1.77
9. Provide service to classmates, clients, families, community, and health team members.	Ephraim – 1.50	Ephraim – 2.10	Ephraim – 1.80
	Richfield – 1.56	Richfield – 1.79	Richfield – 1.68
	Overall – 1.53	Overall – 1.92	Overall – 1.73
10. Display leadership abilities through application of management principles, critical thinking, delegation, and prioritization of care.	Ephraim – 1.50	Ephraim – 2.20	Ephraim – 1.85
	Richfield – 1.56	Richfield – 1.79	Richfield – 1.68
	Overall – 1.53	Overall – 1.92	Overall – 1.73

The 2014-2015 End of Program Survey did increase in value with the average of Ephraim students stating very good instead of excellent; however, no negative qualitative data was provided and through discussions with students it was found that there was confusion about the Likert scale. Students had completed another evaluation that had a different Likert scale. Students answered the survey using the same scale as the previous survey. It is felt that the overall findings on the survey are skewed. SLOs will be evaluated again in the alumni survey. It was also observed that all of the SLOs were stated as being met through the course evaluations.

Pass rates on the NCLEX-RN licensure exam have increased over the past two years. The program only has two graduating classes. This information is provided in the following table.

### NCLEX-RN First Time Pass Rates

Program	2014	2015	2-year Average
Ephraim	50% (6/12)	*80.00% (8/10)	65%
Richfield	77.77% (14/18)	88.23% (15/17)	83%
Combined	66.66% (20/30)	*82.1% (23/28)	74.38%
National Associate Degree Pass rate	79.26%	84.25% (2 quarters)	81.76%
National Pass rate	81.78%	86.77% (2 quarters)	84.27%

*\*2015 one student has not taken the NCLEX exam at this time.*

Currently the first-time pass rate is not at or above the national mean; however, the pass rate is rising. The department made several changes that they feel will help with pass rates.

The expected levels of achievement for program completion is a minimum of 80% of students will graduate from the Snow College PN-RN program in 1.5 times the length of the program. This completion rate was determined by the faculty after considering the demographics and looking at the colleges PN program. This is the same expectation for the PN program. Most students that complete the PN continue to the PN-RN program.

The program has only one completion option. The program starts once a year in August and graduates in May. Students attend classes in Ephraim or Richfield. Students have the same faculty members.

Year	Ephraim	Richfield	Overall Program
2013/14	100% (12/12)	100% (18/18)	100% (30/30)
2014/15	100% (11/11)	89% (17/19)	93% (28/30)

The expected level of achievement is that at least 80% of program graduates will be employed within six to twelve months of graduation. There is only one graduating class with job placement results however; an estimated job placement rate for the graduating class of 2014-2015 will be given in the table below. The graduate job placement rate is collected by phone calls to all students and by the RN alumni survey. The area of employment is collected through the RN alumni survey. From the surveys returned, results are compiled and reviewed annually.

Year	Percent Employed
2013/14	87%
2014/15 (estimate July 2015)	75%

Place of Employment	Percent
Hospital	61.11%
Long-term Care	27.78%
Physician's Office	11.11%

The expected level of achievement is based on survey returns at least 80% of employers will agree that they are satisfied with the overall preparation of graduate students. The survey will be sent out six to twelve months after graduation. The program has collected only one year's employer satisfaction survey (see Table 6.4.4.1). The survey was sent out ten to eleven months after the 2013-2014 graduating class. There was a 37.5% (6/16) response rate and not all that responded completed the entire survey. The survey was sent out five times through an electronic data base. The overall response was favorable for 80% of the employers. The program encouraged the Advisory Committee to complete and return surveys. In the future, faculty will continue to encourage employers to complete and return surveys.

#### RN Employee Satisfaction Survey 2013-2014

	Strongly Dissatisfied	Dissatisfied	Neutral	Satisfied	Very Satisfied	Weighted Average
What is your overall satisfaction with the Snow College graduate(s) that you employ?	0.00%	0.00%	20.00%	0.00%	80.00%	4.60

#### Program Assessment

Snow College's Allied Health and Nursing program is formally reviewed and accredited by the Accreditation Commission for Education in Nursing (ACEN). ACEN completed a comprehensive visit of the program during the 2017-2018 academic year. Results of this visit affirmed the program's continuing accreditation with the status of conditional and requested a Follow-Up Report be submitted in two years (fall 2020). The next comprehensive evaluation visit is scheduled for Fall 2020.

In accordance with Utah State Board of Regent's policy R411 on the periodic review of educational programs, the Allied Health and Nursing program used the fall 2018 ACEN site visit and review to satisfy all R411 requirements.

## Program Recommendations

1. **Standard 1 Mission and Administrative Capacity, Criterion 1.8:** It was recommended that the program ensure that the nurse administrator has enough time and resources to fulfill role responsibilities.
2. **Standard 2 Faculty and Staff, Criterion 2.5:** It was recommended that the program ensure the number of full-time faculty is enough for the achievement of the end-of-program student learning outcomes and program outcomes.
3. **Standard 4 Curriculum, Criteria 4.3 and 4.7:** It was recommended that the program ensure the curriculum is developed by faculty and regularly reviewed to ensure integrity, rigor, and currency. It was further recommended that the program ensure evaluation methodologies reflect established professional and practice competencies and measure the achievement of the end-of-program student learning outcomes.
4. **Standard 6 Outcomes, Criterion 6.1 and 6.4:** It was recommended that the program ensure strategies are identified when the expected levels of achievement for end-of-program student learning outcomes are not met. It was also recommended that the program continue to provide evidence that there is on-going assessment of job placement and that job placement data are enough to inform program decision-making. It was further recommended that the program demonstrate evidence that the evaluation plan contains data that are consistently assessed job placement and used in program decision-making for the maintenance and improvement of graduate job placement.

***Institutional Response:*** Program faculty and administration are working to address each of these recommendations in lieu of a Follow-Up report to be submitted to ACEN by fall 2020.

## Appendix A: Course Requirements Specific to Degree Outcomes

LPN Pre-Application Requirements: Math 0850, 1010, or higher math, or equivalent, current CNA License

Prerequisite Courses		
Course		Credit
BIOL 2320-2325	Human Anatomy with Lab	4
BIOL 2420/2425	Human Physiology with Lab	4
ENGL 1010	Expository Composition	3
GE Course *	General Education Course	3

**Credits 14**

1 <sup>st</sup> Fall Semester Course		
Course		Credit
NURP 1102	Fundamentals of Nursing	4
NURP 1103	Pharmacology	3
NURP 1106	Pediatric-Maternity Nursing I	2
NURP 1114	Caring for the Adult I	4

**Credits 13**

1 <sup>st</sup> Spring Semester Course		
Course		Credit
NURP 1115	Caring for the Adult II	3
NURP 1107	Pediatric-Maternity Nursing II	3
NURP 1109	Professional Transition for the Practical Nurse	2
PSY 1010	General Psychology	3
CHEM 1110/1115	Elementary Chemistry with Lab	5

**Credits 16**

2 <sup>nd</sup> Fall Semester Course		
Course		Credit
NURP 2114	Advanced Nursing Care of the Adult and Child	3
NURP 2214	Advanced Nursing Care of the Adult and Child Clinical	4
NURP 2130	Treatment Modalities	2
ENGL 2010	Intermediate Research	3
GE Course *	General Education Course	3

**Credits 15**

2 <sup>nd</sup> Spring Semester Course		
Course		Credit
NURP 2180	Mental Health Nursing Across the Lifespan	2
NURP 2280	Mental Health Nursing Across the Lifespan Clinical	1
NURP 2190	Patient Care Management	2
NURP 2290	Patient Care Management Clinical	3
Math 1030, 1040**, 1050	Introduction to Statistics	3
GE Course *	General Education Course	3

**Credits 14**

\* GE Requirements: American Institutions, Fine Arts, and Humanities. Three (3) credits each.

\*\* Associate Degrees require a qualitative literacy course i.e. Math 1030 or higher; however, students transferring to a BSN or higher nursing program will need Math 1040.

## Appendix B: RN Syllabi

### NURP 2114

**Division:** Business and Applied Technologies

**Department:** Allied Health

**Course:** NURP 2114

**Title:** Advanced Nursing Care of the Adult and Child

#### **Catalog Description:**

This course is designed to introduce students to more complex physiological and psychosocial needs of clients across the lifespan and the active role of the registered nurse in health care delivery. The course emphasis is to prepare students to focus on acute illness and conditions, as well as chronic and disabling conditions and establish critical thinking and clinical decision-making for each disease process. This course will reinforce the effects of acute and chronic illness on clients and their families and familiarize students in consulting and collaborating with other members of the multidisciplinary health care team. The course reinforces previously learned concepts and focuses on the registered nurse making nursing judgments timely and applying those appropriate clinical decisions. This course is part of a required series to prepare students to take the National Council Licensure Examination for Registered Nurses (NCLEX-RN).

**General Education Requirements:** N/A

**Semesters Offered:** TBA

**Credit/Time Requirement:** Credit: 3; Lecture: 3; Lab: 0

**Clock/Hour Requirements:** 45

**Offered for Non-Credit:** No

**Credit/Clock Comments:**

**Prerequisites:** NURP 1114, NURP 1115, NURP 1106, NURP 1107, or equivalent with an accredited Practical Nursing Program

**Corequisites:** NURP 2214

#### **Justification:**

This course is an important component of the education of registered nurses helping them understand the acute, chronic illness and their effect on client and families they will care for. Components of the Susan Ferguson Service model are incorporated throughout the course. Critical thinking and clinical decision-making for each disease process will be emphasized and assessment, intervention, and evaluations will be reviewed. The course is necessary to provide safe, responsible and competent nursing care. This course provides the basic knowledge and skills that are used in the clinical component for Advanced Nursing Care of the Adult and Child (NURP 2214).

#### **Student Learning Outcomes:**

- Upon completion of this course, the students will be able to perform the following nursing competencies within a medical surgical setting:
- Apply and understand the pathophysiological process of each disease or condition
- Demonstrate an understanding of clinical manifestation for each disease or condition
- Demonstrate an understanding of the different manifestations, treatments, and prevention for the different diseases or conditions

- Identify through critical thinking and reasoning critical lab values and how they would relate to the care of the client
- Demonstrate the knowledge to incorporate the nursing process as a framework for the client and their disease process or condition.
- Assessment of student learning outcomes is through written tests, assignments and oral exchange in class. Students receive oral and written feedback.

**Content:**

Students will develop skills needed to perform responsibly with competence and safety in the health care setting. Students will demonstrate the ability to develop individualized care plans for the client. Students will be taught theory of the above objectives and the disease processes and conditions of primary and secondary health care which include the following areas:

- Urological disorders
- Respiratory disorders
- Cardiovascular disorders
- Neurologic disorders
- Infectious diseases
- Hepatic-biliary disease
- Endocrine disease
- Reproductive system & disorders
- Transplant procedures
- Oncology

**Key Performance Indicators:**

Student Learning Outcomes will be assessed by the following Key Performance Indicators:

- Assignments 30%- 40%
- Exams 30%-40%
- Final 20%

Overall score of 80% is required in order for the student to continue in the registered nursing program.

**Representative Text and/or Supplies:**

Liefer, Gloria, *Introduction to Maternity & Pediatric Nursing*, current edition, Elsevier Saunders, St. Louis, MO.

Pagana, *Diagnostic and Laboratory Test Reference*, current edition, Elsevier Mosby, St. Louis, MO.

**Optimum Class Size: 20**

**Maximum Class Size: 40**

## **NURP 2214**

**Division:** Business and Applied Technologies

**Department:** Allied Health

**Course:** NURP 2214

**Title:** Advanced Nursing Care of the Adult and Child Clinical

### **Catalog Description:**

This is a companion course to NURP 2114 that expands on the learning processes of medical-surgical concepts through clinical application. Students will provide care in a variety of health care settings, functioning as part of a health care team to provide nursing care within the scope of practice as mandated by the Utah State Board of Nursing. A total of 180 hours per semester is required. To enroll, students must be accepted into the Registered Nursing program. This course is part of a required series preparing students to take the National Council Licensure Examination for Registered Nurses (NCLEX-RN). (Additional fee required)

**General Education Requirements:** N/A

**Semesters Offered:** Spring

**Credit/Time Requirement:** Credit: 4; Lecture: 0; Lab: 12

**Clock/Hour Requirements:** 180

**Offered for Non-Credit:** No

**Prerequisites:** NURP 1114, NURP 1115, NURP 1106, NURP 1107, or equivalent with an accredited Practical Nursing Program

**Corequisites:** NURP 2114

### **Justification:**

This course is designed to provide a clinical setting wherein students may apply knowledge by delivering care to diverse patient populations in various settings.

### **Student Learning Outcomes:**

Upon completion of this course, the students will be able to perform the following nursing competencies within a medical surgical setting.

- Design and incorporate nursing care that reveals knowledge of pathophysiologic concepts and processes for different age groups and cultures.
- Apply science and the latest technology in preparation and executing nursing care.
- Provide caring and ethical nursing.
- Plan and implement nursing care to a variety of ordinary disease processes that reveals knowledge learned.
- Provide safe nursing care to a diverse population.

Assessment of the student learning outcomes is through clinical assignments and the clinical evaluation tool. Oral and written feedback is given after completion of program.

### **Content:**

Course objectives will be accomplished by providing students with learning experiences in the following subject areas:

- Review of PN skills

- RN skills
- Role and function of the RN
- Patient teaching, time management, and nurse leadership
- Care of patients experiencing alterations in cardiac function
- Care of patients experiencing alterations in renal function
- Care of patients experiencing alteration in neurological function
- Care of patients experiencing infectious diseases
- Care of patients experiencing alterations in hepatic-biliary function
- Care of patients experiencing alterations in endocrine function
- Care of patients experiencing alterations in hematological function
- Care of patients experiencing transplant procedures
- Care of patients experiencing cancer and metastasis
- Care of patients experiencing alterations in tissue perfusion due to shock, trauma, or other acute physiological compromise

**Key Performance Indicators:**

- Student Learning Outcomes will be assessed by the following Key Performance Indicators:
- Clinical evaluation and completion of clinical hours 40%-50%
- Complete student reflections, care plan, and critical thinking assignments 20%- 30%
- Case study and comprehensive care plan 10%-20%

**Representative Text and/or Supplies:**

Liefer, Gloria, *Introduction to Maternity & Pediatric Nursing*, current edition, Elsevier Saunders, St. Louis, MO. (text)

NCLEX-RN review textbook as assigned by the course instructor

Drug handbook of choice

**Optimum Class Size: 5**

**Maximum Class Size: 10**

## **NURP 2130**

**Division:** Business and Applied Technologies

**Department:** Allied Health

**Course:** NURP 2130

**Title:** Advanced Nursing Pharmacology and Treatment Modalities

### **Catalog Description:**

This course addresses advanced treatments used by nurses to promote life-long health including pharmacological agents and non-pharmacological therapy treatments like art, music, pet, meditation, visualization, imagery, and validation. It also covers drugs that affect the endocrine system and cardiovascular system, antibiotics, blood products, calcium replacement agents, chemotherapy drugs, anti-Parkinson drugs, IV therapy, prostate drugs, and biological response modifiers. To enroll, students must be accepted into the Registered Nursing program. This course is part of a required series preparing students to take the National Council Licensure Examination for Registered Nurses (NCLEX-RN).

**General Education Requirements:** N/A

**Semesters Offered:** Fall

**Credit/Time Requirement:** Credit: 2; Lecture: 2; Lab: 0

**Clock/Hour Requirements:** 30

**Offered for Non-Credit:** No

**Prerequisites:** NURP 1103 or equivalent with an accredited Practical Nursing Program

**Corequisites:** N/A

### **Justification:**

The course is an important component of the education of a prospective Registered Nurse who will be expected, in the clinical setting, to administer medications that require advanced knowledge and training. These medications and treatments include those that affect the cardiovascular and endocrine systems, initiating and maintaining IV therapy, administering conscious sedation drugs, antibiotics, anti-Parkinson drugs, chemotherapy drugs, and biologic response modifiers. The prospective RN must also be knowledgeable about alternative therapies such as chiropractic, therapeutic touch, medication, visualization, and relaxation.

### **Student Learning Outcomes:**

Upon completion of this course, the student will be able to:

- Apply the role of the nurse in adjusting care as the patient situation changes and seeking appropriate consultation from a pharmacological perspective
- Analyze cultural considerations in caring for patients and families across a variety of settings and systems that include, but are not limited to, spiritual distress, drug addictions, herbal therapy, and alternative therapies.
- Differentiate the role of the nurse as a direct provider of care, manager of care, and member within the discipline of nursing within his/her established legal and ethical scope of practice from a pharmacological perspective.

Students are assessed through participation/preparation and responses to structured discussions and critical thinking exercises, scholarly assignments/presentations and communication of evidence-based

practice as well as written exams. Students receive written and oral feedback. An overall score of at least 80% is required in order for the student to continue in the Registered Nursing Program.

**Content:**

- Unit 1: Review of content of NURP 1103
- Unit 2: IV Therapy
- Unit 3: RN Skills
- Unit 4: Cardiovascular Drugs, Part 1
- Unit 5: Cardiovascular Drugs, Part 2
- Unit 6: Cardiovascular Drugs, Part 3
- Unit 7: Cancer, Part 1
- Unit 8: Cancer, Part 2
- Unit 9: Biological Response Modifiers
- Unit 10: Antibiotics
- Unit 11: Endocrine Drugs
- Unit 12: Psychiatric Drugs
- Unit 13: Drugs of Abuse
- Unit 14: Spiritual Care and Herbal Therapy
- Unit 15: Alternative Therapies

Teaching strategies include directed discussions, critical thinking exercises, audiovisual materials, group activities, selected readings, and scholarly assignments designed to support development of evidence-based innovation in the student's area of program concentration.

**Key Performance Indicators:**

Student Learning Outcomes will be assessed by the following Key Performance Indicators:

Exams 50-55%

Assignments 40-45%

pass standardized dosage calculation exam at 100% by first day of clinical rotation

**Representative Text and/or Supplies:**

Adams, M.P. & Koch, R.W., *Pharmacology: Connections to Nursing Practice*, current edition, Pearson Education, Inc.

Fontaine, K.L., *Complimentary & Alternative Therapies for Nursing Practice* current edition, Prentice Hall

Skidmore-Roth, Linda, *Mosby's Nursing Drug Reference*, current edition, Elsevier.

**Optimum Class Size:** 20

**Maximum Class Size:** 40

## **NURP 2180**

**Division:** Business and Applied Technologies

**Department:** Allied Health

**Course:** NURP 2180

**Title:** Mental Health Nursing Across the Lifespan

### **Catalog Description:**

Students study strategies for promoting mental health and preventing life-long illnesses. Various tasks of the psychiatric nurse are introduced with an emphasis on the dynamics and theories behind basic psychopathological conditions. Students learn the nursing processes required for restoring and rehabilitating patients with psychiatric disorders. A primary goal of this course is to develop essential communication skills in an interdisciplinary environment. To enroll, students must be accepted into the Registered Nursing program. This course is part of a required series preparing students to take the National Council Licensure Examination for Registered Nurses (NCLEX-RN).

**General Education Requirements:** N/A

**Semesters Offered:** Spring

**Credit/Time Requirement:** Credit: 2; Lecture: 2; Lab: 0

**Clock/Hour Requirements:** 30

**Offered for Non-Credit:** No

**Prerequisites:** NURP 1108 or equivalent with an accredited Practical Nursing program

**Corequisites:** NURP 2280

### **Justification:**

It has been said in the healthcare realm that "all nursing is psych nursing." This means that every interaction a nurse has with a patient has a mental health component. By nature, nursing is holistic, which means that nurses focus on not only the physical aspects of the patient, but their mental, spiritual, and emotional health as well. Nurses must learn the potential psychological disorders that patients may present, along with their treatments and nursing care. Nurses must also communicate effectively with patients and their significant others, as well as all members of the healthcare team.

Therapeutic communication is emphasized in this course.

### **Student Learning Outcomes:**

Upon completion of this course, the student should be able to perform the following nursing practice competencies in (primarily) the psychiatric setting:

- Provide safe, humanistic, patient-centered, and evidence-based nursing care (that includes quality improvement) to a diverse, multigenerational and multicultural patient population.
- Utilize therapeutic communication and interpersonal relationship skills to help meet the psychosocial needs of both psychiatric and medical-surgical patients.
- Function as an effective member of the interdisciplinary team, working in collaboration and partnership with other healthcare team members.
- Plan and implement nursing care that reflects knowledge of psychopathology.
- Analyze and demonstrate an ability to utilize, in the providing of care, ethical issues related to the psychiatric setting.

Assessment of student learning outcomes is through tests, assignments and oral exchange in class. Oral and written feedback is given.

**Content:**

- Unit 1: Introduction to Mental Health/History
- Unit 2: Mental Health Practice Issues
- Unit 3: Assessment
- Unit 4: Therapeutic Communication
- Unit 5: Schizophrenia/Psychotic Disorders
- Unit 6: Personality Disorders
- Unit 7: Anxiety Disorders
- Unit 8: Somatoform/Dissociative Disorders
- Unit 9: Mood Disorders
- Unit 10: Addictive and Eating Disorders
- Unit 11: Sexual Violence, Abuse, and Neglect
- Unit 12: Crisis Intervention
- Unit 13: Disorders of Childhood/Adolescence/Elderly
- Unit 14: The Bereaved Individual

Teaching strategies include lecture, focused discussions, audiovisual materials, group activities, selected readings, and evidence-based practice application exercises and/or activities.

**Key Performance Indicators:**

Student Learning Outcomes will be assessed by the following Key Performance

- Indicators:
- Assignments 40%-50%
- Exams 20-30%
- Final exam 20%
- An overall score of 80% is required in order for the student to continue in the Registered Nursing program.

**Representative Text and/or Supplies:**

**Optimum Class Size:** 20

**Maximum Class Size:** 40

## **NURP 2280**

**Division:** Business and Applied Technologies

**Department:** Allied Health

**Course:** NURP 2280

**Title:** Mental Health Nursing Across the Lifespan Clinical

### **Catalog Description:**

This is a companion course to NURP 2180 that provides clinical application of psychiatric/mental health nursing methodology. Students will focus on patients in a variety of health care settings with mental health needs. The course requires 45 clinical hours per semester. To enroll, students must be accepted into the Registered Nursing program. This course is part of a required series preparing students to take the National Council Licensure Examination for Registered Nurses (NCLEX-RN).

**General Education Requirements:** N/A

**Semesters Offered:** Spring

**Credit/Time Requirement:** Credit: 1; Lecture: 0; Lab: 3

**Clock/Hour Requirements:** 45

**Offered for Non-Credit:** No

**Corequisites:** NURP 2180

### **Justification:**

Students have the opportunity in this course to apply concepts learned in theory to the mental health clinical setting. It is imperative for students to come in contact with mentally ill patients in the nursing role in order to gain practical experience in establishing a therapeutic relationship, employ the nursing process, and gain therapeutic communication skills.

### **Student Learning Outcomes:**

Upon completion of this course, the student will be able to:

- Develop therapeutic communication skills to help meet the psychosocial needs of both psychiatric and non-psychiatric patients.
- Demonstrate an ability to establish a therapeutic relationship with patients.
- Communicate effectively with patients, families, and other health-team members.
- Maintain professional relationships and advocate for and support patients through interdisciplinary partnership and collaboration.
- Demonstrate cultural and generational competence in caring for patients and families across a variety of psychiatric settings.
- Participate as a member of the psychiatric community within the discipline of nursing.
- Utilize safe, ethical, patient-centered, humanistic, and evidence-based practices to participate in nursing care of psychiatric patients.

Assessment of student learning outcomes is through clinical assignments and the clinical evaluation tool. Feedback is oral and written.

### **Content:**

Course format:

- Orientation to clinical psychiatric nursing - mental health issues across generations

- Communication skills - therapeutic communication and process recording
- Therapeutic relationships - boundaries, ethics, legal issues
- Cultural competence in caring for patients and families with mental health issues
- Working with the interdisciplinary psychiatric care team
- Application of evidence-based psychiatric nursing principles

Clinical experiences include a mix of these clinical experiences:

- Attending a 12-step meeting
- Viewing the video series "On Our Own Terms: Moyers on Dying"
- Viewing the video series "Close to Home: Moyers on Addiction"
- Completing a clinical rotation at Utah State Hospital
- Time on an inpatient psychiatric unit
- Time with a hospice organization
- Time with a substance use disorder treatment program
- Time with psychiatric-outpatient, day treatment, or other community-based facilities
- Completing a process recording that demonstrates an understanding of therapeutic communication skills.

**Key Performance Indicators:**

Student Learning Outcomes will be assessed by the following Key Performance Indicators:

Clinical assignments 60-65%

Clinical evaluation 30-35%

**Representative Text and/or Supplies:**

Townsend, M.C. *Essentials of Psychiatric Mental Health Nursing: Concepts of Care in Evidence-Based Practice*. (current ed.). Philadelphia: F.A. Davis.

**Optimum Class Size: 5**

**Maximum Class Size: 10**

## **NURP 2190**

**Division:** Business and Applied Technologies

**Department:** Allied Health

**Course:** NURP 2190

**Title:** Patient Care Management

### **Catalog Description:**

Theory focuses on the synthesis of the nursing knowledge and skills necessary for a registered nurse to enter practice. Licensing, job seeking skills, professionalism, managing, and legal and ethical issues are addressed. To enroll, students must be accepted into the Registered Nursing program. This course is part of a required series preparing students to take the National Council Licensure Examination for Registered Nurses (NLEX-RN).

**General Education Requirements:** N/A

**Semesters Offered:** Fall

**Credit/Time Requirement:** Credit: 2; Lecture: 2; Lab: 0

**Clock/Hour Requirements:** 30

**Offered for Non-Credit:** No

**Prerequisites:** NURP 2130, NURP 2114, NURP 2214

**Corequisites:** NURP 2290

### **Justification:**

This course is required for the registered nurse to be successful in the field of nursing and to practice safe and competent care within the scope of practice of the registered nurse as mandated by the Utah State Board of Nursing. Students will develop skills necessary to work effectively as an important member in the health care team. This course helps students to learn how to successfully apply for and pass the national licensing exam.

### **Student Learning Outcomes:**

Upon successful completion of this course, students will be able to:

- Incorporate knowledge and skills necessary to perform professionally in the role of a registered nurse
- Obtain the information needed to procure licensure in the State of Utah
- Develop a greater understanding of skills, knowledge, and attitudes needed for successful employment as a registered nurse
- Evaluate strategies the registered nurse needs to ensure safe patient outcomes while employing cost effective practices
- Integrate skills in critical thinking to ensure quality patient care outcomes
- Describe issues facing health care that impact the delivery of nursing care
- Examine nursing with consideration to the cultural, religious, and lifestyle beliefs, values, and expectations of patient and their families.
- Identify the process and steps for preparing to take the National Council Licensure Examination for Registered Nurses (NCLEX-RN)

Assessment of student learning outcomes is through written exams, assignments and oral exchange in the classroom. Oral and written feedback is given.

**Content:**

Course objectives will be accomplished by providing students with learning experiences in the following subject areas:

- Role transition and self-management
- Nursing history and nursing profession
- Mentorship and preceptorship
- Employment considerations
- NCLEX-RN exam
- Nursing management skills
- Nursing communication skills
- Delegation
- Ethical and legal issues
- Cultural and spiritual awareness
- Conflict management
- Healthcare delivery systems
- Workplace issues
- Quality patient care
- Nursing organizations.

**Key Performance Indicators:**

Student Learning Outcomes will be assessed by the following Key Performance Indicators:

- Class/Group Participation 5%
- Assignments 15%-20%
- NCLEX review 10%-15%
- Class Exams 30%-40%
- Final Exam 20%

**Representative Text and/or Supplies:**

Ohman, Kathleen A., *Davis's Q&A Review for NCLEX-RN*, current edition, FA Davis.

**Optimum Class Size:** 20

**Maximum Class Size:** 40

## **NURP 2290**

**Division:** Business and Applied Technologies

**Department:** Allied Health

**Course:** NURP 2290

**Title:** Patient Care Management Clinical

### **Catalog Description:**

A companion course to NURP 2190, NURP 2290 Clinical focuses on the synthesis of the nursing knowledge and skills necessary for a registered nurse to enter practice. Licensing, job seeking skills, professionalism, managing, and legal and ethical issues are addressed. Hours are a concentrated four-week block and are completed as if the student were a full-time employee. To enroll, students must be accepted into the Registered Nursing program. This course is part of a required series preparing students to take the National Council Licensure Examination for Registered Nurses (NCLEX-RN).

**General Education Requirements:** N/A

**Semesters Offered:** Fall

**Credit/Time Requirement:** Credit: 3; Lecture: 0; Lab: 9

**Clock/Hour Requirements:** 135

**Offered for Non-Credit:** No

**Prerequisites:** NURP 2130, 2114, 2214

**Corequisites:** NURP 2190

### **Justification:**

This course is required for the registered nurse to be successful in the field of nursing and to practice safe and competent care within the scope of practice of the registered nurse as mandated by the Utah State Board of Nursing. Students will develop skills necessary to work effectively as an important member in the health care team. This course helps students to learn how to successfully function in a patient care setting as a registered nurse.

### **Student Learning Outcomes:**

Upon successful completion of this course, students will be able to:

- Incorporate knowledge and skills necessary to perform professionally in the role of a registered nurse
- Obtain the information needed to procure licensure in the State of Utah
- Develop a greater understanding of skills, knowledge, and attitudes needed for successful employment as a registered nurse.
- Evaluate strategies the registered nurse needs to ensure safe patient outcomes while employing cost effective practices
- Integrate skills in critical thinking to ensure quality patient care outcomes
- Describe issues facing health care that impact the delivery of nursing care
- Examine nursing with consideration to the cultural, religious, and lifestyle beliefs, values, and expectations of patient and their families.

Students are assessed with the NURP 2290 clinical evaluation tool. This evaluation of the student's competence as a RN student is completed by the clinical instructor and the RN preceptor. Feedback is oral and written.

**Content:**

Course objectives will be accomplished by providing students with learning experiences in the following subject areas:

- Role transition and self-management
- Nursing History and nursing profession
- Mentorship and preceptorship,
- Employment considerations
- NCLEX-RN exam Nursing management skills
- Nursing communication skills
- Delegation
- Ethical and legal issues
- Cultural and spiritual awareness
- Conflict management
- Healthcare delivery systems
- Workplace issues
- Quality patient care
- Nursing organizations.

**Key Performance Indicators:**

Student Learning Outcomes will be assessed by the following Key Performance Indicators:

- preceptor evaluation tool and completion of clinical hours. 100%

**Representative Text and/or Supplies:**

Zerwekh, JoAnn and Garneau, Ashley, *Nursing Today Transition and Trends*, current edition, Elsevier Saunders.

Amber Epling, MSN, RN  
Director/Associate Professor  
Snow College  
800 West 200 South  
Richfield, UT 84701

Dear Ms. Epling:

This letter is formal notification of the action taken by the Accreditation Commission for Education in Nursing (ACEN) at its meeting on September 12, 2018. Please be advised that the Board of Commissioners' decisions are based on the ACEN 2017 Standards and Criteria. The Board affirmed continuing accreditation for the associate nursing program following a decline in licensure examination passrates, changed the program's accreditation status to conditions, and requested that a Follow-Up Report be submitted in two (2) years. If the Follow-Up Report is accepted by the Board of Commissioners, the next evaluation visit will be scheduled for the Fall 2020 Cycle.

Deliberations centered on materials made available to the Board, including the Focused Site Visit Report and the recommendations for accreditation proposed by the peer evaluators and the Evaluation Review Panel. (See Summary of Deliberations and Recommendation of the Evaluation Review Panel.)

The Board of Commissioners identified the following:

**Evidence of Non-Compliance**

**Standard 6 Outcomes, Criteria 6.1 and 6.2**

- There is a lack of evidence that there is ongoing assessment of the extent to which students attain the end-of-program student learning outcomes.
- There is a lack of evidence that assessment data are consistently analyzed and used in program decision-making for the maintenance and improvement of students' attainment of the end-of-program student learning outcomes.
- There is a lack of evidence that the expected level of achievement for first-time test takers during the same 12-month period on the licensure examination has been consistently met.

**Areas Needing Development**

**Standard I Mission and Administrative Capacity, Criterion 1.8**

- Ensure that the nurse administrator has sufficient time and resources to fulfill the role responsibilities.

**Areas Needing Development (continued)****Standard 2 Faculty and Staff, Criterion 2.5**

- Ensure the number of full-time faculty is sufficient for the achievement of the end-of-program student learning outcomes and program outcomes.

**Standard 4 Curriculum, Criteria 4.3 and 4.7**

- Ensure the curriculum is developed by the faculty and regularly reviewed to ensure integrity, rigor, and currency.
- Ensure evaluation methodologies reflect established professional and practice competencies, and measure the achievement of the end-of-program student learning outcomes.

**Standard 6 Outcomes, Criterion 6.1 and 6.4**

- Ensure strategies are identified when the expected levels of achievement for end-of-program student learning outcomes are not met.
- Ensure the program demonstrates evidence that there is ongoing assessment of job placement and that job placement data are sufficient to inform program decision-making.
- Ensure the program demonstrates evidence that the evaluation plan contains data that are consistently assessed job placement and used in program decision making for the maintenance and improvement of graduates' job placement.

A Follow-Up Report requires the nursing program to demonstrate compliance with the specific Accreditation Standard(s). The Follow-Up Report for the associate nursing program is to address Standard 6 Outcomes. The Report is to be submitted to the ACEN in the Spring 2020 Accreditation Cycle by February 15, 2020.

Please note that Federal regulations and ACEN policy stipulate that a nursing program must demonstrate compliance with all of the ACEN Standards and Criteria within a maximum of two (2) years after being placed on conditions by the ACEN Board of Commissioners. At the end of that two-year monitoring period, if compliance is not evident, the program must be denied continuing accreditation and removed from the list of accredited programs unless the program can make its case for continuing accreditation for good cause. Please refer to ACEN Policy #4 Types of Commission Actions for additional information.

On behalf of the Board of Commissioners, we thank you and your colleagues for your commitment to quality nursing education. If you have questions about this action or about ACEN policies and procedures, please contact me.

Sincerely,

Marsal P. Stoll, EdD, MSN  
Chief Executive Officer

cc: Sandra Baker, Peer Evaluator  
Melissa Copperwheat, Peer Evaluator

Enc. Summary of Deliberations of the Evaluation Panel

# Construction Technology Department Review Self-Study

representing courses taught in Construction Technology and Construction Management

submitted to the Snow College Board of Trustees and the  
Utah State Board of Regents  
Summer 2019

## Reviewed Spring Semester 2019 with the rating of recommended

- Jared Baker, Professional in Residence for Construction Management, Southern Utah University
- Melanie Jenkins, Associate Vice President for Academic Affairs and Associate Professor of English, Snow College

## Program Description and Mission Statement

The Construction Management (CM) Program (Previously known as BCCM) at Snow College offers students excellent, practical training in state-of-the-art residential and light commercial construction. Students develop or enhance their skills in areas such as cabinet making and millwork, rough and finish carpentry, architectural drafting (including Computer-aided drafting systems), computerized estimating and work scheduling. An advisory committee consisting of industry professionals is consulted regularly to enhance the program and keep its offerings current.

The two-year curriculum also includes management and business courses students need to become successful contractors, builders, carpenters, cabinetmakers, or subcontractors. In addition, the program offers a solid base for students who want to transfer into advance programs that lead to professional employment in the construction industry, such as industrial education, construction management, or architecture.

There are presently 23 different classes offered through CM. The program enrolls approximately 45 students each year. Students participating in the program have several options. A Certificate of Completion and Certificate of Proficiency is available for students who complete the program that consists of 18 to 33 credits. A second option is the completion of an Associate of Applied Science degree. This degree requires the completion of a minimum of 63 to 64 credits including core classes in the CM department along with a variety of classes from several other departments. A third option for students is the completion of an Associate Degree and then transferring to a bachelor's program in construction management.

## Curriculum

The Construction Management Program offers students excellent, practical training in state-of-the-art residential and light-commercial construction. Students develop or enhance their skills in areas such as cabinet making and millwork, rough and finish carpentry, architectural CAD drafting. Students who enroll in this program must be in good mental and physical condition so they can perform required tasks. For some courses, a student must be able to lift 100 lbs., climb ladders and scaffolding, and operate power equipment safely. Meeting these requirements will help students work toward a safe and rewarding career in the construction industry. The two-year curriculum also includes management and business courses students need to become successful contractors, builders, and carpenters. The construction management program offers an associate of science degree (57 to 63 credits), a certificate of completion in construction

management (33 to 34 credits), and two certificates of proficiency in construction management (18 credits) and cabinetry and architectural woodwork (18 credits).

Please see Appendix A for a descriptive list of degrees and course requirements. Appendix B offers a comprehensive list of all currently taught courses. Appendix C provides a curriculum map of courses linked to program learning outcomes.

### Student Learning Outcomes

Students who complete Construction Management will be expected to demonstrate that they:

1. Know practical, state-of-the-art residential construction techniques.
2. Possess related business and architecture design skills.
3. Can complete the interior and exterior finish on residential buildings.
4. Can construct quality cabinets.
5. Can design a complete set of plans for a residential building.
6. Believe excellence is the hallmark of all work and activities in the program.
7. Are confident their skills will meet the needs of employers.

### Academic Advising

The general advising of students attending Snow College is conducted through the Student Success Center. The Center employs a Business and Applied Technologies advisor who is trained to help with schedules, consult about major and career options, and find financial aid resources to pay for school. However, faculty members and part-time instructors in the CM department often meet with students to discuss their current academic and/or performance needs as well as their future goals.

## Program Assessment

In accordance with Utah State Board of Regent's policy R411 on the periodic review of educational programs, an on-site visit of Snow College's Construction Management and Construction Technology program was conducted Spring Semester 2019. This visit was preceded by a careful reading of the program's self-study document and included a comprehensive tour of current facilities, conversations with students, class visits, and faculty and administration interviews.

## Program Strengths

Strengths of the department include a strong student enrollment at 45 students per year, a good fit with the overall mission and core themes of the College, a program that delivers a quality student experience, and great potential for the program to experience curricular and student growth.

Outlined below are specific commendations for the program along with a listing of recommendations from the review committee.

- **Advisory Board:** There is a great relationship with advisory board and industry-related professionals. This relationship provides students with a strong network of potential employers as well as direct "real-time" indications of industry needs and innovations. Included in this network is a commitment to service learning that partners with local contractors and/or construction-related organizations. This affords the program to bring in guest speakers who augment instruction. Finally, the students can start their professional career by joining the local Home Builders Association and working with the Ephraim City Housing Authority (ECHA).
- **Foundations Course:** The creation of the General Education foundations course that partners construction-related skills with the knowledge of folklore and biology is an exception way to integrate general education and the different disciplines into a cohesive and relatable course. This collaboration has also provided program faculty the opportunity to develop internal partnerships and learn from other professors—a relationship not naturally forged between career and technical education and liberal arts instruction.
- **Articulation:** Modifications to the program have resulted in better curricular articulation with other in-state programs offered at Southern Utah University, Utah Valley University, and Salt Lake

Community College. These improvements strengthened the associate of applied science degree and the various certificates of completion and/or proficiency to better prepare students for immediate entrance to the workforce.

- **Facility:** The facility provides a good workspace for hands-on learning, and the purchase of new equipment provides students with more relevant experience suitable to program growth.
- **Faculty:** Without exception the faculty are excellent. They are experienced professionals who are passionate about the industry, the program, and the having students succeed. Students view the faculty as mentors and commented on their remarkable ability to be open-minded in exploring difference aspects of construction and building technology.

### Program Weaknesses/Recommendations

1. **Professional Development:** It was recommended that the program consider adjustments to course loads, faculty administrative duties, and program time commitments (including the hiring of additional faculty) to provide for industry related professional development opportunities.

*Institutional Response: The collaborative work on the General Education foundations course provided current faculty a unique, internal professional development opportunity. Construction faculty will continue to develop and explore those relationships and/or opportunities within the College. In addition, the faculty could use some assistance with the department (even some part-time administrative help) that will help free up time to work on faculty development opportunities.*

2. **Two Construction Management Learning Tracks:** It was recommended that the program explore the development to two distinct learning tracks: one for trades and the other for construction supervision. The “trade track” is very similar to the existing program. The “supervision track” would involve improved articulation with four-year programs. This will allow for students to more seamlessly transition to four-year programs without losing time taking supervision-related classes not currently offered at Snow College.

*Institutional Response: The Associate of Applied Science degree in Construction Management addresses the “trade track” suggestion. Adding an associate degree (like a pathway) in Construction Management will provide the suggested “supervisory track.” Faculty will begin to explore the options for this degree. For example, faculty are planning to add a facilities management course the program beginning Spring Semester 2020.*

3. **Update Program Computers and Software:** It was recommended that program be included in the campus computer rotation with new computers being cascaded from the program to other areas of the institution.

*Institutional Response: Faculty consulted with Dr. Hood, Vice President of Academic Affairs, who will help the program apply for a grant from the Governor’s Office of Economic Development to help with computer replacement and other infrastructure issues.*

4. **Student Competition Opportunities:** It was recommended that the program investigate more student competition events and activities at local, state, and regional levels. For example, SkillsUSA is held annually with top performers receiving berths to the national competition. Snow College construction technology students can compete at the state and national level and this recognition of their abilities can be a marketing boost to the program.

*Institutional Response: Faculty will investigate these competitions and work with student interest to promote involvement in SkillsUSA and other similar competitions.*

## Appendix A: Course Requirements Specific to Degree Outcomes

### Construction Management & Technology—required coursework

CM 1155 Construction Print Reading (3)  
CM 1200 Building Science Fundamentals (3)  
CM 1210 Construction Technologies Lab I (3)  
CM 1710 Construction Technologies lab II (3)  
CM 2020 Materials and Methods I (3)  
CM 2030 Materials and Methods II (3)  
CM 2275 Construction Codes and Zoning (3)  
CM 2460 Construction Scheduling and Cost Control (3)  
CM 2610 Architectural Drafting (3)  
CM 2850 Construction Math and Estimating (3)  
**Required credits: 30**

### Construction Management & Technology—elective coursework choose 2-4 courses (6-12 Credits)\*\*

CM 1290 Electrical Wiring (3)  
CM 1997 Internship – First Year (1-3)  
CM 2010 Framing Methods (5)  
CM 2150 Cabinet Construction (3)  
CM 2210 Construction Technologies Lab III (3)  
CM 2710 Construction Technologies Lab IV (3)  
CM 2997 Internship – Second Year (1-3)  
DRFT 1100 Architecture-Residential Design (3)  
ENGR 2240 Surveying and Global Positioning (3)  
**Required credit: 6-12**

### Business Courses Elective - choose 4- 6 courses (12-19 Credits) \*\*

+BUS 1020 Computer Technology and Applications (3)  
+BUS 1060 QuickBooks for Small Business (3)

## Appendix B: Construction Technology Courses

### **CM 1100 Construction Math and Estimating**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:1:4)

Description: In this course, students learn to compute quantities of materials, cost of materials, labor, and other costs related to a residential building. Prerequisites: Prior or concurrent enrollment in CM 1155 or CM 2010, or previous residential construction experience, or equivalent.

### **CM 1155 (formerly CM 1150) Construction Print Reading (formerly Blueprint Reading)**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:3:0)

Description: In this course, students learn the symbols, terms, specifications, relationships of views, measurements, sections, and details for proper interpretation of plans used for residential and light commercial buildings.

### **CM 1200 Building Science Fundamentals**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:3:0)

Description: This course will cover essential building science principles that enable students to construct buildings that are safe, comfortable to live in, energy efficient, and functional for many years. Students will learn how to apply building science principles to new construction and how to apply the same principles to remodeling existing homes. Principles of sustainability are incorporated throughout this course.

### **CM 1210 Construction Technologies Lab I**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:0:6)

Description: This course is a hands-on construction lab experience where students will learn the training necessary to allow them to be employable in a construction-related field and to perform required duties safely. Each semester students will participate in available projects as determined by the instructor. The projects will vary from semester to semester based on local need and student interest.

### **CM 1280 Plumbing Fundamentals**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:2:2)

Description: This course includes the study of plumbing fundamentals and is a familiarization course for carpenters to aid them in coordinating their work with that of the mechanical work performed by the plumber. It includes practical experience in plumbing a project house and code compliance. This is a half semester course.

### **CM 1290 Residential Electrical Wiring**

Semester(s) Taught: Fall

Credits, Lecture hours, Lab hours: (3:2:2)

Description: In this course, students receive instruction on the fundamentals of wiring a residential home with emphasis on electrical code and safety requirements. The course includes actual practical electrical wiring experience.

### **CM 1710 Construction Technologies Lab II**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:0:6)

Description: This course is a hands-on construction lab experience where students will learn the training necessary to allow them to be employable in a construction-related field and to perform required duties safely. Each semester students will participate in available projects as determined by the instructor. The projects will vary from semester to semester based on local need and student interest

### **CM 1999 Cooperative Education Experience**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (1-6:0:2-12)

Description: This course provides an opportunity for students to apply knowledge and techniques learned in the classroom to actual job experience. Classroom instruction must precede the job experience or the student must be registered for courses at the same time the student is enrolled in the work experience.

Prerequisites: Instructor approval required.

### **CM 2020 Materials and Methods I**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:3:0)

Description: This course covers the practical theory of residential structures and the construction process methods and materials used.

### **CM 2030 Materials and Methods II**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:3:0)

Description: This course covers the practical theory of commercial structures and the construction process methods and materials used.

### **CM 2150 Cabinet Construction**

Semester(s) Taught: Fall

Credits, Lecture hours, Lab hours: (3:1:5)

Description: This course provides instruction in the principles and procedures used in the design, layout, and construction of cabinets for a residential home. It includes practical experiences in building quality cabinets for a residential project home. The course also includes a familiarization of tools, materials, and process of the woodworking industry with a special emphasis on safety.

### **CM 2210 Construction Technologies Lab III**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:0:6)

Description: This course is a hands-on construction lab experience where students will learn the training necessary to allow them to be employable in a construction-related field and to perform required duties safely. Each semester students will participate in available projects as determined by the instructor. The projects will vary from semester to semester based on local need and student interest

### **CM 2275 Construction Codes and Zoning (formerly CM 2270)**

Semester(s) Taught: Fall

Credits, Lecture hours, Lab hours: (3:3:0)

Description: This course introduces the practical applications of the Uniform Building Code especially inspection procedures and requirements for residential and light commercial construction. The National Green Building Standard will also be part of this course of study.

### **CM 2356 Construction Specialties**

Semester(s) Taught: Fall, Spring

Credits, Lecture hours, Lab hours: (.5-3:0:1.5-9)

Description: This course provides practical application of courses where additional experience and practice are desired; such as, on-the-job training, carpentry projects, and extra study in specialized areas of the building industry. Approval of project is coordinated with advisor prior to enrollment in this repeatable course.

### **CM 2460 Construction Scheduling and Cost Control**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:3:0)

Description: This course provides instruction in the planning and scheduling of construction projects. Students learn construction project control through use of critical path, Gantt bar charts, and reporting practices making paper charts and using project software.

### **CM 2610 Architectural Drafting CAD**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:2:2)

Description: An introduction to architectural design and working drawings. The class will study architectural practices, procedures, symbology, dimensioning techniques, standards and terminology. Practical applications in planning and functional design and working drawings.

### **CM 2660 Entry and Passage Door Construction**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:1:5)

Description: This course provides hands-on technical training on how to build raised panel entry and passage doors for residential homes. During the course students will build the doors for the Snow College project house.

### **CM 2690 Woodworking Technology**

Semester(s) Taught: Spring

Credits, Lecture hours, Lab hours: (3:1:5)

Description: This course is a wood project construction course with experience in milling, assembling and designing of wood projects. Emphasis is placed on layout and construction techniques. The instruction in the making of high-end furniture, including the various types of joinery and finishes will be covered.

### **CM 2710 Construction Technologies Lab IV**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:0:6)

Description: This course is a hands-on construction lab experience where students will learn the training necessary to allow them to be employable in a construction-related field and to perform required duties safely. Each semester the

student will participate in available projects as determined by the instructor. The projects will vary from semester to semester based on local need and student interest

### **CM 2800 Special Projects**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (1-2:0:3-6)

Description: This course involves a special project where there is a demonstrated need which cannot be met through enrollment in a regularly scheduled course. It also could include special projects of unusual merit in furthering a student's professional and academic goals. Students must be able to sustain and complete independent learning projects. The course provides a framework for developing and enhancing student abilities. The Special Projects Contract must be completed and will indicate the department through which credit will be awarded. Special projects for one credit can be approved by the advisor, the division dean, and the division representative to the Curriculum Committee. Projects for more than one credit must be approved by the advisor, division dean, and Curriculum Committee. Credit for a special project normally should be one to two credit hours depending on the work completed, but may be more with approval of the dean and Curriculum Committee. Unless approved in the contract, special project credit may not be used to satisfy general education requirements. Repeatable for credit. (This course is equivalent to GNST 2800.)

### **CM 2850 Construction Math and Estimating (formerly CM 1100)**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:3:0)

Description: In this course, students learn to compute quantities of materials, cost of materials, labor, and other costs related to a residential building. Prerequisites: Prior or concurrent enrollment in CM 1150 or CM 2010, or previous residential construction experience or equivalent.

### **CM 2999 Cooperative Education Experience**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (1-6:0:2-12)

Description: This course provides an opportunity for students to apply knowledge and techniques learned in the classroom to actual job experience. Classroom instruction must precede the job experience or the student must be registered for courses at the same time the student is enrolled in the work experience.

Prerequisites: Instructor approval required.

### **DRFT 1100 Architecture-Residential Design**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:2:3)

Description: The emphasis of this course is comprehensive coverage of design fundamentals and procedures used to represent design ideas using traditional, as well as state of the art technology. It covers the solving of problems related to the design of a residential structure and considers the influence of building cost, modular applications, building codes, and zoning regulations with respect to the site and design.

## Appendix C: Curriculum Map and Outcomes Assessment

# Snow College Construction Technology Curriculum Map

### Summary:

The Construction Management Program offers students excellent, practical training in state-of-the-art residential and light-commercial construction. Students develop or enhance their skills in areas such as cabinet making and millwork, rough and finish carpentry, architectural drafting (including computer-aided drafting systems).

Students who enroll in this program must be in good mental and physical condition, so they can perform required tasks. For some courses, a student must be able to lift 100 lbs., climb ladders and scaffolding, and operate power equipment safely. Meeting these requirements will help students work toward a safe and rewarding career in the construction industry.

The two-year curriculum also includes management and business courses students need to become successful contractors, builders, and carpenters.

### Outcomes:

Students who complete Construction Management will be expected to demonstrate that they:

1. Know practical, state-of-the-art residential construction techniques.
2. Possess related business and architecture design skills.
3. Can complete the interior and exterior finish on residential buildings.
4. Can construct quality cabinets.
5. Can design a complete set of plans for a residential building.
6. Believe excellence is the hallmark of all work and activities in the program.
7. Are confident their skills will meet the needs of employers.

Program Coursework and Assessment	Knowledge Area: Construction Management							
	Know practical state-of-the-art residential construction techniques.	Possess related business and architecture design skills.	Can complete interior and exterior finish on residential buildings.	Can construct quality cabinets.	Can design a complete set of plans for a residential building.	Believe excellence is the hallmark of all work and activities in the program.	Are confident their skills will meet the needs of employers.	Meet other program level outcomes.

# Industrial Technology Department Review Self-Study

representing courses taught in Composites, Industrial Manufacturing, Industrial Mechanics, Machine Tool Technology, and Welding Technology

submitted to the Snow College Board of Trustees and the  
Utah State Board of Regents  
Summer 2019

## Reviewed Spring Semester 2019 with the rating of recommended

- Richard Cozzens, Professional in Residence, Engineering and Technology, Southern Utah University
- Andrew Flinders, Assistant Professor of Mathematics, Snow College

## Program Description and Mission Statement

Industrial Technology Department focuses on five key programs to instruct students in the most important aspects of today's job market. Students will complete the programs with a knowledge of industry standards, proficiency in state-of-the-art techniques, and the ability to compete in any job market. The hands-on classes and experienced instructors ensure that the learning experience won't come just from a textbook, but rather from gaining actual working experience with high-tech equipment and methods completing a variety of projects.

### Industrial Manufacturing

The program is intended for students interested in working in manufacturing settings as a general manufacturing technician for manufacturing, processing, or other production environments. The Industrial Manufacturing Technology program prepares students to design/develop, install, maintain, diagnose/troubleshoot, and repair complex and integrated manufacturing equipment/systems.

This program is designed to give students a basic knowledge of maintaining and repairing a variety of machines and mechanical systems within manufacturing facilities. Through lecture and practical lab experience students will learn the industrial manufacturing skills needed in today's industry.

Industrial manufacturing mechanic students will be developing, maintaining and repairing a wide variety of machines, mechanical systems including factory machinery, food processing machinery, textile machinery, transportation equipment, and metal fabrication machinery: simple and complex parts. Students will diagnose mechanical pneumatic, hydraulic, and electrical problems. Students will be working with mathematics, blueprint reading, welding, electronics, and computers.

Students will be required to pass an entrance test with math and reading scores of an appropriate level. If the scores are too low, students will need to plan extra time to remediate those skills upon entering the program.

## **Industrial Mechanics**

This program is designed to give students a basic knowledge of maintaining and repairing a variety of machines and mechanical systems. Through lecture and practical lab experience students will learn the industrial mechanics skills needed in today's industry.

Students pay regular college tuition plus the cost of tools, coveralls, and safety equipment during their training. The purchased equipment is the personal property of the student.

As an industrial mechanic, students will be maintaining and repairing a wide variety of machines, mechanical systems including factory machinery, food processing machinery, textile machinery, transportation equipment, and metal fabrication machinery. Students will diagnose mechanical pneumatic, hydraulic, and electrical problems. Students will be working with mathematics, blueprint reading, welding, electronics, and computers.

Students will be required to pass an entrance test with math and reading scores of an appropriate level. If the scores are too low, students will need to plan extra time to remediate those skills upon entering the program.

## **Machine Tool Technology**

Snow College offers a Machine Tool Technology program of 63 semester hours of instruction that prepares students to meet job entry requirements.

The machine tool program is designed to give students a basic knowledge of machining skills. Items covered include: math, blueprint reading, conventional lathe and mill operation, feeds and speeds, grinder operation, and the operation of computer numerical control (CNC) lathes and mills. Through lecture and practical lab experience, students can learn the machine tool operation skills needed in today's industry.

Students pay regular college tuition plus the cost of tools, coveralls, and safety equipment during their training. The purchased equipment is the personal property of the student.

An Associate of Applied Science degree is offered in this program.

Exact course descriptions and hours for the Snow College Machine Tool Technology program match with other state schools and use national and international curriculum and task lists. There has been a working relationship between institutions to accept student hours and credit. Students have received training at Snow College Richfield campus, formerly SVATC, since 1993.

Students will be required to pass an entrance test with math and reading scores of an appropriate level. If the scores are too low, students will need to plan extra time to remediate those skills before entering the program.

## **Welding Technology**

Snow College offers a Welding Technology program of approximately 63 semester hours of instruction, which prepares the student to meet job entry requirements. This program covers all welding processes

commonly used in the fabrication, repair, and construction industries. It is taught by welding on both plate and pipe, and using ferrous and non-ferrous materials.

Students pay regular college tuition plus the cost of tools, coveralls, and safety equipment during their training. The purchased equipment is the personal property of the student.

Students have two options. They may obtain (1) an Associate of Applied Science degree in Welding Technology, or (2) complete any one or more of specific Welding courses without completing the degree.

Exact course descriptions and hours for the Welding Technology program match with other state schools and use national and international curriculum and task lists. There has been a working relationship between institutions to accept student hours and credit.

**Curriculum:** Please see Appendix A for a descriptive list of respective degrees and course requirements. Appendix B offers a comprehensive list of all currently taught courses. Appendix C has curriculum and assessment maps.

## **Student Learning Outcomes**

### ***Industrial Manufacturing***

Students who complete an AAS degree in Industrial Manufacturing Mechanics Technology will be expected to demonstrate that they have acquired skills/knowledge in the following areas:

- Manual dexterity-when handling very small parts, workers must have a steady hand and good hand-eye coordination
- Mechanical skills-use sophisticated diagnostic equipment for troubleshooting
- Technical skills-use sophisticated diagnostic equipment for troubleshooting
- Troubleshooting skills-must observe and properly diagnose and fix problems that a machine may be having
- Design-must have knowledge of design techniques, tools, and principles involved in production of precision technical plans, blueprints, drawings, and models
- Mathematics-knowledge of arithmetic, algebra, geometry, calculus, statistics, and their applications
- Judgment and decision making-industrial manufacturing mechanics must have the ability to measure the relative cost and benefits of potential actions to choose the most appropriate decision
- Operation and control-controlling operations of manufacturing equipment or system
- Critical thinking-use logic and reasoning to identify the strengths and weaknesses of alternative solutions, conclusions, or approaches to problems.

### ***Industrial Mechanics***

Students who complete an AAS degree in Industrial Mechanics Technology will be expected to demonstrate that they have acquired skills/knowledge in the following areas:

- Manual dexterity-when handling very small parts, workers must have a steady hand and good hand-eye coordination
- Mechanical skills-industrial mechanics use sophisticated diagnostic equipment for troubleshooting
- Technical skills-industrial mechanics use sophisticated diagnostic equipment for troubleshooting
- Troubleshooting skills-industrial mechanics must observe and properly diagnose and fix problems that a machine may be having
- Design-industrial mechanics must have knowledge of design techniques, tools, and principles involved in production of precision technical plans, blueprints, drawings, and models
- Judgment and decision making-industrial mechanics must have the ability to measure the relative cost and benefits of potential actions to choose the most appropriate decision
- Operation and control-controlling operations of manufacturing equipment or system
- Critical thinking-using logic and reasoning to identify the strengths and weaknesses of alternative solutions, conclusions, or approaches to problems.

### ***Machine Tool Technology***

Students who complete an AAS degree in Machine Tool Technology at Snow College will be expected to demonstrate that they:

- Have knowledge of machining skills, i.e., lathe operation, milling machine operations, Computer Numerical Control basics, drilling machines, and other machine shop support equipment
- Know machine shop safety and rules of conduct
- Have basic knowledge of quality control, measuring instruments, and blueprint reading
- Know basic knowledge of cutters and material metallurgy
- Can follow the guidelines and standards as set by industry requirements
- Produce quality machined products in a safe, time efficient manner according to required specifications
- Have a sense of pride in their skills and abilities
- Grow in individual ingenuity and imagination
- Acquire the ability to lead and help others grow with them
- Have an increase in individual self-esteem as they receive recognition from a job well done

### ***Welding Technology***

Students who complete an AAS degree in Welding Technology at Snow College will demonstrate that they

- have a knowledge of welding technology skills; i.e., safety, oxyacetylene welding,
- cutting, shielded metal arc welding, gas metal arc welding, flux cored arc welding, gas tungsten arc welding, blueprint reading, applied math, metallurgy, electrical safety, etc.;
- have a knowledge of codes and standards;
- have knowledge of tools used in the trade;
- have knowledge of interpersonal skills;

- can demonstrate good safety practices in shop;
- complete 80% of skill/task lists for each course;
- correctly weld in all positions;
- have a sense of pride in their skills and abilities;
- understand the need to develop hand-eye coordination;
- have a feeling of confidence as they successfully complete required work assignments

## Academic Advising

The general advising of students attending Snow College is conducted through the Student Success Center. The Center employs many advisors who are trained to help with schedules, consult about major and career options, and find financial aid resources to pay for school. In addition, the division funds a special advisor concentrating on career and technical education pathways whom our department has consulted. Lastly, faculty members and part-time instructors in the department often meet with students to discuss their current academic and/or performance needs as well as their future goals.

## Faculty

### Composites

- Chad Avery - 9 years Composite Technician, 1 year teaching Industrial Manufacturing
- Colton Nay – AAS Machine Tool, 4 years industry, Fanuc Robotics and Faro Measurement certifications. 4 years teaching

### Industrial Mechanics

- Ken Avery – AAS Automotive, 39 years industry, 7 years teaching,

- Morgan White – 40 years industry, 1-year teaching (mechanics and welding)

Machine Tool Technology

- Alan Hart – AAS Machine Tool, 15 years teaching, 26 years industry, MasterCam X7 multi axis certification, HTEC certification
- Dain Houston – AAS Machine Tool, 9 years teaching assistant, 27 years industry

Welding Technology

- Alan Palmer - Associate Professor Masters Ed., 26 years teaching, 40 years industry
- James Batterman - 34 years Industry, 5 years teaching assistant

## Program Assessment

In accordance with Utah State Board of Regent's policy R411 on the periodic review of educational programs, an on-site visit of Snow College's Industrial Technology program was conducted Spring Semester 2019. This visit was preceded by a careful reading of the program's self-study document and included a comprehensive tour of current facilities, conversations with students, class visits, and faculty and administration interviews.

## Program Strengths:

Outlined below are specific commendations for the program.

- **Faculty:** The review found that one of the main strengths of all five programs was the experience and coordinated efforts of faculty. This was evident in the small class sizes that provided opportunities to work directly with faculty in “hands-on” real-world experiences.
- **Innovation:** It was impressive to the reviewers how many of the concerns from the previous review were proactively addressed by faculty. For example, the welding technology program build the 5-ton dump trailer and each of the welding tables used for student projects. In addition to the superior construction, the facilities were well maintained. Each piece of equipment was in good working order and the workspace in instructional rooms and teaching laboratories was clean and well-organized.
- **Economic Need:** The economy in the regional area is strong, which has created a demand for program graduates. The curriculum is well-adapted to the current workforce needs. In fact, a main challenge to the program is the early exit of students who find full-time job placement prior to completing all the program’s degree requirements.
- **Advisory Board and Articulation:** The reviewers complemented the diversity, strength, and active involvement of the program’s advisory board. The Advisory Board has played a critical role in developing relevant curriculum and instruction such as the composites program. The reviewers also found it noteworthy how the programs have pursued articulation agreements and generated potential pathways for students to further their education at four-year engineering and technology programs.

## Program Weaknesses/Recommendations:

1. **Grants:** It was recommended that, either individual or collectively, the programs pursue grants like the Strategic Workforce Initiative Grant (SWI) in order to incorporate new technology into the curriculum.

*Institutional Response: The Industrial Technology Department will continue to look for and apply for grants and faculty professional training opportunities to assist in bring new technology to all programs.*

2. **Enhance Visibility:** It was recommended that the department more actively reach out to the main campus to find connections to the non-CTE areas of the institution and to increase program visibility on the Richfield and Ephraim campuses

*Institutional Response: The Industrial Technology Department will continue to work with other programs on the main campus in providing constructed materials and will continue to explore opportunities for program integration (e.g. a GE foundations course).*

- 3. Improve Program Marketing:** It was recommended that program faculty work with Advisory Board members, college recruitment officials, and the local community to better promote the program to prospective students.

*Institutional Response:* Currently the Industrial Technology program sponsors several public open houses through the year and participates in community events such as Hoodstock (an annual classic and modern car restoration show) and the Richfield Community Christmas Light Parade. Instructors attend local high schools on public education career days and assist local shop teachers when requested. Program faculty have also appeared on local radio shows, provided print advertisement, presented at local chamber of commerce meetings, and participated in community open houses and career fairs. Program faculty will continue to find avenues to showcase the program and student accomplishments.

- 4. Public Education Outreach:** It was recommended that the faculty improve efforts to contact Snow College admissions advisors and local high school counselors regarding the program's opportunities and career placement benefits.

*Institutional Response:* Program faculty are assigned to distinct high schools where they regularly meeting with students, teachers, and staff to share information about the Industrial Technology program. The faculty will also pursue more opportunities to provide concurrent enrollment industrial technology courses to local high schools and via distance using interactive video technology and trained shop teachers who can provide offsite supervised lab experiences.

- 5. Industrial Technology and Pre-Engineering Program:** It was recommended that better collaboration exists between Snow College's Industrial Technology program and Pre-Engineering program. Each program can strengthen the curriculum and student experience of the other.

*Institutional Response:* Industrial Technology program faculty will establish meetings with Engineering program faculty to determine curricular mutual benefits and better program coordination.

## Appendix A: Course Requirements Specific to Degree Outcomes

### Industrial Manufacturing

(recommended courses in addition to the General Education core coursework)

Course	Description	Credits
MANF 1060	Industrial Blueprint Reading	3
MANF 1100	Manufacturing and Automation Tech	3
MANF 1200	Introduction to Robotics	3
MANF 1300	Geometric Dimensioning and Tolerancing	3
MANF 1400	Composites	3
MANF 1500	Quality Control	3
MANF 2332	Mechanical CAD Drafting	4
INDM 1050	Industrial Safety and Basics	1
INDM 1100	Industrial Mechanics I	3
INDM 1600	Industrial Electricity	3
INDM 1800	Industrial Hydraulics	3
INDM 1900	Industrial Controls & PLC	3
WELD 1030	Related Oxy-Acetylene and Arc Welding	3
MTT 2435	Computer Numerical Control Operations	4
MTT 2440	Computer Aided Manufacturing	4

### Industrial Mechanics

(recommended courses in addition to the General Education core coursework)

Course	Description	Credits
INDM 1050	Industrial Safety and Basics	1
INDM 1060	Industrial Blueprint Reading	3
INDM 1100	Industrial Mechanics I	3
INDM 1200	Industrial Mechanics II	3
INDM 1300	Industrial Mechanics III	3
INDM 1400	Industrial Mechanics IV	3
INDM 1500	Industrial Pneumatics	3
INDM 1600	Industrial Electricity	3
INDM 1620	Industrial Electronics	3
INDM 1800	Industrial Hydraulics	3
INDM 1820	Industrial Pumps	3
INDM 1840	Industrial Rigging	3
INDM 1900	Industrial Controls & PLC	3
MTT 1000	Machine Tool Technology	2
MTT 1110	Intro to Precision Machining	3
MTT 1125	Intro to Precision Machining Lab	5

WELD 1020	Shielded Metal Arc Welding	4
WELD 2200	Semi-Auto Processes/MIG	2

### Machine Tool Technology

(recommended courses in addition to the General Education core coursework)

Course	Description	Credits
MTT 1110	Intro to Precision Machining	3
MTT 1125	Intro to Precision Machining Lab	5
MTT 1210	Intermediate Precision Machining	3
MTT 1225	Intermediate Precision Machining Lab	5
MTT 2330	Introduction to Computer Numerical Control	3
MTT 2335	Introduction to Computer Numerical Control lab	5
MTT 2430	Computer Numerical Control Operations	3
MTT 2435	Computer Numerical Control Operations lab	5
MTT 2716	Machine Tool Mathematics/Measurement	3
MANF 1060	Industrial Blueprint Reading	3
MANF 1300	Geometric Dimensioning and Tolerancing	3
MANF 1500	Quality Control	3
MANF 2332	Mechanical CAD Drafting	4
WELD 1030	Related Oxy-Acetylene and Arc Welding	3
WELD 2332	Metallurgy	4

### Welding Technology

(recommended courses in addition to the General Education core coursework)

Course	Description	Credits
WELD 1012	Oxyacetylene Welding	2
WELD 1015	Cutting Processes	2
WELD 1020	Intro to SMAW	4
WELD 1220	Intro to GMAW	2
WELD 1420	Intro to GTAW	2
WELD 1310	Welding Inspection	2
WELD 2020	Advanced SMAW	4
WELD 2220	Advanced GMAW	3
WELD 2230	Advanced FCAW	3
WELD 2420	Advanced GTAW	4
WELD 2210	Blueprints for Welders	5
WELD 2320	Metallurgy	4
WELD 2300	Weld Fabrication	3
WELD 2520	Advanced Pipe Welding	6
INDM 1600	Industrial Electricity	3

INDM 1840	Industrial Rigging	3
MANF 1060	Industrial Blueprint Reading	3
MANF 2332	Mechanical CAD Drafting	3
MTT 1350	Related Machine Shop	2

### General Education Courses

GE Area	Course Name	Credits
Computation	AT 1715 Applied Technical Math or MATH 1050 College Algebra	3-4
Composition	BUS 2200 Bus. Communication or ENGL 1010	3
Human Relations	GNST 1200 GE Foundations or BUS 1170 Human Relations in Org.	3
Technology	BUS 1020 Computer Technology and Applications	3

## Appendix B: Industrial Technology Courses

### **INDM 1050 Industrial Safety**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (1:1:1)

Description: This course teaches the rights and responsibilities of workers in the workplace to ensure industrial safety. Students will gain valuable knowledge about how they can protect themselves and others in industrial settings. Students will explore a wide range of topics, including laws, guidelines, behaviors, and equipment related to industrial safety.

### **INDM 1060 Industrial Print Reading**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:2:2)

Description: This course is an introduction to reading and interpreting working drawings and prints for industrial processes and associated trades. Students will receive basic information on blueprints and written documents commonly found in industrial environments. The course is designed to allow the student to develop an understanding of the use of prints and an ability to read and interpret prints found in industrial settings.

### **INDM 1100 Industrial Mechanics I**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:2:3)

Description: This course is designed to introduce the basics of industrial mechanical systems. This course begins a series of four courses designed to prepare students to understand and recognize mechanical systems they will encounter on the job. Students will learn relevant industrial skills, including mechanical drive systems, key fasteners, power transmission systems, v-belt drives, chain drives, spur gear drives and multiple shaft drives. Students will learn basic measuring for industrial applications using basic measurement tools to include: digital calipers, micrometers and dial calipers.

### **INDM 1200 Industrial Mechanics II**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:2:3)

Description: The course teaches the bearings and gears used in heavy duty mechanical transmission systems. This course will emphasize linear axis drives, clutches and brakes. In addition, this course teaches how to setup, operate and apply laser shaft alignment to a variety of industrial applications. Topics include: heavy-duty v-belt drives, v-belt selection and maintenance, synchronous belt drives, lubrication concepts, precision shaft alignment, couplings and heavy-duty chain drives. Students will also learn the basics of vibration analysis used to determine when to perform maintenance of power transmission components. Prerequisites: INDM 1100

### **INDM 1300 Industrial Mechanics III**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (2:1:3)

Description: This course teaches the bearings and gears used in heavy duty mechanical transmission systems. This course will emphasize bearing mechanics, selection and maintenance. Topics include: plain bearings, ball bearings, roller bearings, anti-friction bearing selection, gaskets and seals and gear drive selection. In addition, this course teaches how to set up, operate and apply laser shaft alignment systems to a variety of industrial applications. Topics

include laser alignment systems, rough alignment, soft foot correction, alignment analysis and operation.

Prerequisites: INDM 1200

### **INDM 1400 Industrial Mechanics IV**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:2:3)

Description: This course teaches linear axis drives, clutches, brakes, piping, fittings and valves. Students will learn relevant industrial skills including identifying, sizing, selecting, installation, operation, performing analysis, design, troubleshooting and maintenance as well as installing a variety of types of piping, fittings and valves including iron pipe, steel tubing, hydraulic hose, plastic pipe, copper tubing, globe valves, gate valves, check valves, and Sloan valves. Prerequisites: INDM 1100, 1200, and 1300

### **INDM 1500 Industrial Pneumatics**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:2:3)

Description: This course teaches the fundamentals of pneumatic systems using industrial, agricultural and mobile applications. Students will learn skills in the following areas: safety, basic pneumatic systems design, installation, operation, and performance analysis. Student will also be skilled in more advanced concepts of air logic, ways to decelerate a pneumatic cylinder, how to prevent condensation in a pneumatic circuit, DCV applications, and maintenance.

### **INDM 1600 Industrial Electrical**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:2:3)

Description: This course teaches industry-relevant fundamentals of AC/DC electrical systems used for power and control in industrial, commercial, agricultural, and residential applications as well as commercial and residential applications including single phase AC motors and three-phase AC electric motors, DC electric motors, and DC generators. Students will learn skills in how to operate, install, analyze performance, select electric machines for various applications, design, and troubleshoot basic AC/DC electrical circuits for various applications.

### **INDM 1620 Industrial Electronics**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:2:3)

Description: This course teaches electronic devices control and power machines used in industries throughout the world, from manufacturing and transportation to energy and construction. Students will learn to operate, adjust, and troubleshoot electronic components, circuits, and systems used in these vital machine applications.

### **INDM 1715 Applied Technical Math**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:3:0)

Description: This course covers the principles of algebra and geometry as they apply to problem solving in the Career and Technical Education (CTE) division programs. It includes the quadratic equation, exponents and radicals, polynomials, constructions of geometric shapes, the circle concept, and applications of volume and shapes.

### **INDM 1800 Industrial Hydraulics**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:2:3)

Description: This course introduces industry-relevant hydraulic skills while showing the fundamentals of the hydraulic principles, hydraulic motors and actuators, and hydraulic formulas such as calculating theoretical pump flow rate. Students learning skills will include: safety, how to operate, install, troubleshoot, analyze performance, and design hydraulic systems. Students will also be skilled in more advanced hydraulics.

### **INDM 1820 Industrial Pumps**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:2:3)

Description: This course teaches a comprehensive set of industry-relevant skills including how to operate, install, maintain, troubleshoot, analyze performance, and select centrifugal pumps as well as system design. Students will learn skills related to centrifugal pumps, which are used in almost every industry to transfer non-hydraulic fluids of various types from one place to another.

### **INDM 1840 Industrial Rigging**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:2:3)

Description: This course teaches a comprehensive set of industry-relevant skills including how to safely move loads of different shapes and sizes using a variety of methods. Students will learn skills including hoist operation, installation, maintenance, equipment movement, wire mesh slings, synthetic slings, knots, load turning and cranes.

### **INDM 1900 Industrial Controls and PLC**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:2:3)

Description: This course teaches industry-relevant skills including how to operate, interface, program, and troubleshoot Programmable Logic Controller systems for a variety of applications.

### **INDM 1930 Leadership & Professional Development - Course 1**

### **INDM 2930 Leadership & Professional Development - Course 2**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (1:1:0)

Description: This is the first course in a series of two courses which will help students gain and improve workplace and interpersonal skills. Professional stewardship, management, and leadership are the foundational topics. Students taking this course will also have the opportunity to participate in the SkillsUSA career and professional leadership organization.

### **INDM 2800 Special Projects**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (1-2:0:3-6)

Description: This course involves a special project where there is a demonstrated need which cannot be met through enrollment in a regularly scheduled course. It also could include special projects of unusual merit in furthering a student's professional and academic goals. Students must be able to sustain and complete independent learning projects. The course provides a framework for developing and enhancing student abilities. The Special Projects Contract must be completed, and will indicate the department through which credit will be awarded. Special projects for one credit can be approved by the advisor, the division dean, and the division representative to the Curriculum

Committee. Projects for more than one credit must be approved by the advisor, division dean, and Curriculum Committee. Credit for a special project normally should be one to two credit hours depending on the work completed, but may be more with approval of the dean and Curriculum Committee. Unless approved in the contract, special project credit may not be used to satisfy general education requirements. Repeatable for credit. (This course is equivalent to GNST 2800.)

### **MANF 1060 Industrial Print Reading**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:2:2)

Description: This course is an introduction to reading and interpreting working drawings and prints for industrial processes and associated trades. Students will receive basic information on blueprints and written documents commonly found in industrial environments. The course is designed to allow the student to develop an understanding of the use of prints and an ability to read and interpret prints found in industrial settings.

### **MANF 1100 Manufacturing and Automation Technology**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:2:3)

Description: This course teaches manufacturing and automation technology providing a complete course of the basic elements of manufacturing and automation and how they affect the world that we live in. This course covers the materials, processes, and management techniques used in the industry. Manufacturing is a managed system that draws upon many resources. Students will explore a number of materials and material processing techniques common to manufacturing.

### **MANF 1200 Intro to Robotics**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:2:3)

Description: This course is an introductory level that will explore many aspects of robotics in a basic and easy-to-understand manner. The key concepts are discussed using a big picture or systems approach that greatly enhances student learning. Many application and operational aspects of equipment and robotic systems are discussed.

### **MANF 1300 Geometric Dimensioning**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:2:3)

Description: This course will provide students with the complete fundamentals of geometric dimensioning and tolerancing concepts which will be introduced to the students in a methodical manner to help ensure that they have a full understanding of every basic concept as they build knowledge toward more advanced application.

### **MANF 1400 Composites**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:2:3)

Description: This course will provide students with both introductory and advanced levels in composites. Students will have comprehensive and hands-on experiences. They will be creating reliable methods and processes for composites, which will help students learn how to find ways to make quality products faster, better, and cheaper.

### **MANF 1500 Quality Control**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:2:3)

Description: This course will provide students with a greater understanding of the complexities of quality improvement efforts and will give the students real-life situations through each application. Emphasis is placed on the practical application of quality principles, interpretations, understanding, and concepts throughout the problem-solving process. Students will have a full understanding of every basic concept as they build knowledge toward more advanced applications in quality control.

### **MANF 1715 Applied Technical Math**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:3:0)

Description: This course covers the principles of algebra and geometry as they apply to problem solving in the Business & Applied Technologies division programs. It includes the quadratic equation, exponents and radicals, polynomials, constructions of geometric shapes, the circle concept, and applications of volume and shapes.

### **MANF 1930 Leadership & Professional Development - Course 1**

### **MANF 2930 Leadership & Professional Development - Course 2**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (1:1:0)

Description: This is the first course in a series of two courses which will help students gain and improve workplace and interpersonal skills. Professional stewardship, management, and leadership are the foundational topics. Students taking this course will also have the opportunity to participate in the SkillsUSA career and professional leadership organization.

### **MANF 2332 Mechanical CAD Drafting (Formerly DRFT 2332)**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (4:3:3)

Description: The course will introduce the student to the 3D modeling process and 3D parametric modeling. It will present a process-based approach to mechanical drafting using solid modeling commands, options, and techniques. Students will experience the power of solid modeling with a parametric modeling program, as they complete parts, assemblies and working drawings.

### **MTT 1000 Survey of Machine Tool Technology**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (2:1:3)

Description: This is an introductory course for those interested in the world of manufacturing. It emphasizes the machine tool field and includes hands-on activities with metal cutting lathes and milling machines.

### **MTT 1060 Industrial Print Reading**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:2:2)

Description: This course is an introduction to reading and interpreting working drawings and prints for industrial processes and associated trades. Students will receive basic information on blueprints and written documents commonly found in industrial environments. The course is designed to allow the student to develop an understanding of the use of prints and an ability to read and interpret prints found in industrial settings.

### **MTT 1110 Intro to Precision Machining**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:3:0)

Description: This course is for first semester students. It teaches the manufacture of metal parts using machine tool operations. Students learn the theoretical operations of the engine lathe, drill press, pedestal grinder, and vertical milling machine. The course includes lecture, discussion, and demonstrations. Corequisites: MTT 1125

### **MTT 1125 Intro to Precision Machining Lab**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (5:0:15)

Description: This is a lab course for first semester students. It teaches the manufacture of metal parts using machine tool operations and covers hands-on operations of the engine lathe, drill press, pedestal grinder, and vertical milling machine. Students practice all common operations done on a metal cutting lathe and are introduced to basic introduction of the vertical milling machine. The course includes demonstrations, practical applications, and labs. Those that complete the course should have entry skills for the machine tool industry. Corequisites: MTT 1110

### **MTT 1210 Intermediate Precision Machining**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:3:0)

Description: This course is for second semester students. It covers advanced machining principles dealing with threads, gear cutting, computer numeric control (CNC), basic metallurgy tool building and design, and includes operation theory of band machines, shapers, grinders, and turret lathes. Students improve skills on engine lathes and vertical milling machines. The course uses lectures, discussions, and demonstrations. Prerequisites: MTT 1125, MTT 1150, Corequisites: MTT 1225

### **MTT 1225 Intermediate Precision Machining Lab**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (5:0:15)

Description: This lab course is for second semester students. It teaches advanced operation of vertical milling machines and introduces operation of horizontal milling machines, grinders, shapers, and turret lathes. The course includes the combining of machine operations for the manufacturing of products and teaches on-call response to customer job demand. The course includes hands-on experience and demonstrations. Prerequisites: MTT 1125, MTT 1150, Corequisites: MTT 1210

### **MTT 1350 Related Machine Shop Practice**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (2:0:6)

Description: This course is for students with majors other than Machine Tool Technology. It presents general information and covers only basic machine tool operation, principally on the engine lathe. The course includes turning, boring, drill bit sharpening, tool bit grinding, taper cutting, facing, hole formation, threading (both internal and external), and simple tool design.

### **MTT 1715 Applied Technical Math**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:3:0)

Description: This course covers the principles of algebra and geometry as they apply to problem solving in the Career and Technical Education (CTE) division programs. It includes the quadratic equation, exponents and radicals, polynomials, constructions of geometric shapes, the circle concept, and applications of volume and shapes.

### **MTT 1930 Leadership & Professional Development - Course 1**

### **MTT 2930 Leadership & Professional Development - Course 2**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (1:1:0)

Description: This is the first course in a series of two courses which will help students gain and improve workplace and interpersonal skills. Professional stewardship, management, and leadership are the foundational topics. Students taking this course will also have the opportunity to participate in the SkillsUSA career and professional leadership organization.

### **MTT 2330 Introduction to Computer Numerical Control**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:3:0)

Description: This course is for students seeking careers in CNC programming and operation. It introduces programming techniques such as conversational, G and M Code, and Dyna. Students learn about CAM software and how to generate code for CAM machines. Successful completers should be able to generate a process plan, a tool list, and a working program to produce the part from a print. Corequisites: MTT 2335

### **MTT 2335 Introduction to Computer Numerical Control Lab**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (5:0:15)

Description: This lab is for students seeking careers in CNC programming and operation. It introduces programming techniques such as conversational, G and M Code, and Dyna. Students learn about CAM software and how to generate code for CAM machines. Successful completers should be able to generate a process plan, a tool list, and a working program to produce the part from a print. Corequisites: MTT 2330

### **MTT 2430 Computer Numerical Control Operations**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:3:0)

Description: This course is for second-year students who want to enhance their programming and operating skills.; It reviews different manufacturing materials and cutting processes. Students learn about industrial computer-aided machining (CAM) software and the process of computer-aided manufacturing.; It emphasizes fixturing and basic machine setups. Prerequisites: MTT 2330 and MTT 2335, Corequisites: MTT 2435

### **MTT 2435 Computer Numerical Control Operations Lab**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (5:0:15)

Description: This course is for second-year students who want to enhance their programming and operating skills.; It reviews different manufacturing materials and cutting processes. Students learn about industrial computer-aided machining (CAM) software and the process of computer-aided manufacturing.; It emphasizes fixturing and basic machine setups. Prerequisites: MTT 2330 and MTT 2335. Corequisites: MTT 2430

### **MTT 2716 Machine Tool Mathematics/Measurement**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:1:4)

Description: This course consists of the practical application of the concepts learned in MTT 1715. Students will apply mathematic, geometric, and trigonometric concepts to projects in the laboratory environment. Hands-on, practical exercises are the foundation of this course. Prerequisites: MTT 1715

## **WELDING TECHNOLOGY**

### **WELD 1012 Oxy-acetylene Welding**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (2:1:3)

Description: This is a course for various trades and community members. This beginning course covers theory and practice of oxy-acetylene fusion welding of sheet steel, including welding, soldering, and braze welding of ferrous and non-ferrous metal. Local industries, farmers, and ranchers use oxy-acetylene equipment to make repairs and fabricate parts.

### **WELD 1015 Cutting Processes**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (2:1:3)

Description: This is a course designed for various trades and community members. This course covers theory and practice of oxy-acetylene, carbon arc, oxygen lance, plasma processes and the cutting of ferrous and non-ferrous metal. Local construction, fabrication shops and mining use these processes to make repairs and fabricate parts.

### **WELD 1020 Shielded Metal Arc Welding**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (4:2:6)

Description: This course is designed for welding technology majors, various trades, and community members. The course is for beginning students interested in learning basic arc welding techniques, theory, and practices, including types of machines, electrodes, and their application. Students study types of joints, expansion and contraction of metals, care and use of tools and equipment, and welding safety.

### **WELD 1030 Related Oxy-acetylene and Arc Welding**

Semester(s) Taught: Spring

Credits, Lecture hours, Lab hours: (3:1:6)

Description: This course is designed to give students in other programs a background in welding fundamentals that can be used in their career fields. This course will instruct students on the basic skills and principles for oxy-acetylene welding, shielded metal arc welding, gas metal arc welding, and gas tungsten arc welding. Instruction will also be given on shop safety, electrode selection, equipment setup, brazing, soldering, and cutting techniques.

### **WELD 1220 Intro to GMAW**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (2:1:3)

Description: This is a course designed for welding technology majors to cover theory and practical hands-on experience with semi-automatic wire-fed machines. Emphasis is on safety and maintenance of equipment, basic fundamentals of each process, mode of transfers associated with gas metal arc welding (GMAW) processes,

electrode selection, gas selection, proper regulator and flow meter calibration. Joint design and equipment troubleshooting will also be discussed.

### **WELD 1310 Welding Inspection**

Semester(s) Taught: Fall

Credits, Lecture hours, Lab hours: (2:2:0)

Description: This course is for welding technology majors. It presents skills and techniques to assist welders to better perform their duties. Procedure and qualification testing welds and welders are studied. The course covers inspection procedures and includes destructive and non-destructive testing for the various welding defects. Prerequisites: Weld 1020, Corequisites: Weld 2020

### **WELD 1420 Intro to GTAW**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (2:1:3)

Description: This course is for welding technology majors. It covers basic fundamentals of gas tungsten arc welding (GTAW) processes.

### **WELD 1715 Applied Technical Math**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:3:0)

Description: This course covers the principles of algebra and geometry as they apply to problem solving in the Business and Applied Technologies (BAT) division programs. It includes the quadratic equation, exponents and radicals, polynomials, constructions of geometric shapes, the circle concept, and applications of volume and shapes.

### **WELD 1930 Leadership & Professional Development - Course 1**

### **WELD 2930 Leadership & Professional Development - Course 2**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (1:1:0)

Description: This is the first course in a series of two courses which will help students gain and improve workplace and interpersonal skills. Professional stewardship, management, and leadership are the foundational topics. Students taking this course will also have the opportunity to participate in the Skills USA career and professional leadership organization.

### **WELD 2020 Advanced ARC Welding**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (4:2:6)

Description: This course will cover preventative maintenance of welding equipment, proper service and troubleshooting of portable engine driven welders and electric powered welding machines. Welding practice is continued with emphasis on multiple pass welding and V groove welding. Qualification tests are offered for horizontal, vertical, and overhead positions throughout the course.

Prerequisites: WELD 1020

Corequisites: WELD 1310

### **WELD 2210 Blueprints for Welders**

Semester(s) Taught: Fall

Credits, Lecture hours, Lab hours: (5:5:0)

Description: This course studies basic print interpretation and visualization for industrial applications. It includes weld symbols and covers layout techniques from shop drawings to fabrication of sheet metal, plate, pipe, and structural shapes. Lab experience is included.

### **WELD 2220 Advanced GMAW**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:1:6)

Description: This is a course designed for welding technology majors to cover theory and practical hands-on experience with advanced semi-automatic wire-fed machines. Emphasis is on safety and maintenance of equipment, basic fundamentals of each process, mode of transfers associated with gas metal arc welding (GMAW), submerged arc welding (SMA), spool gun and dual feed processes, electrode selection, gas selection and proper regulator and flow meter calibration. Joint design and equipment troubleshooting will also be discussed.

Prerequisites: WELD 1220

### **WELD 2230 Advanced FCAW**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:1:6)

Description: This is a course designed for welding technology majors to cover theory and practical hands-on experience with advanced semi-automatic wire-fed machines. Emphasis is on safety and maintenance of equipment, basic fundamentals of each process, mode of transfers associated with flux core arc welding (FCAW), inner shield, dual shield, electrode selection, gas selection, proper regulator and flow meter calibration. Joint design and equipment troubleshooting will also be discussed.

Prerequisites: WELD 2220

### **WELD 2300 Welding Fabrication**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:1:6)

Description: This course is for welding technology majors. It covers safe setup and operation of shears, break press, iron workers, band saw and drill press. Students will fabricate a project using their knowledge of print reading and layout procedures.

Prerequisites: WELD 2020, WELD 2220, WELD 2210, WELD 1715

### **WELD 2320 Metallurgy**

Semester(s) Taught: Spring

Credits, Lecture hours, Lab hours: (4:4:0)

Description: Metallurgy is the science that explains the properties, behavior, and internal structure of metals. The course emphasizes welding carbon and alloy steels used with metals, such as cast iron. Discussions and demonstrations are given on various methods of heat treatment and metal properties.

**WELD 2420 Advanced GTAW**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (4:2:6)

Description: This course is for welding technology majors. It covers gas tungsten arc welding (GTAW), aluminum, stainless and plate welding processes; i.e., resistance and specialized processes.

Prerequisites: WELD 1420

**WELD 2520 Advanced Pipe Welding**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (6:2:12)

Description: This course is for welding technology majors and will cover advanced pipe welding using SMAW and FCAW processes. Welding practice is continued with emphasis on pipe welding using SMAW and FCAW.

Qualification tests are offered as part of the course on a variety of positions.

Prerequisites: WELD 2020, WELD 2230

## Appendix C: Curriculum Map and Assessment Plan

# Snow College Industrial Manufacturing Curriculum Map

### Summary:

The program is intended for students interested in working in manufacturing settings as a general manufacturing technician for manufacturing, processing, or other production environments. The Industrial Manufacturing Technology program prepares students to Design/ Develop, install, maintain, diagnose/troubleshoot, and repair complex and integrated manufacturing equipment/systems.

This program is designed to give students a basic knowledge of maintaining and repairing a variety of machines and mechanical systems within manufacturing facilities. Through lecture and practical lab experience students will learn the industrial manufacturing skills needed in today's industry.

As an industrial manufacturing mechanic, students will be Developing, maintaining, and repairing a wide variety of machines, mechanical systems including factory machinery, food processing machinery, textile machinery, transportation equipment, and metal fabrication machinery, simple and complex parts. Students will diagnose mechanical pneumatic, hydraulic, and electrical problems. Students will be working with mathematics, blueprint reading, welding, electronics, and computers.

Students will be required to pass an entrance test with math and reading scores of an appropriate level. If the scores are too low, students will need to plan extra time to remediate those skills upon entering the program.

### Outcomes:

Students who complete an AAS degree in Industrial Manufacturing Mechanics Technology will be expected to demonstrate that they have acquired skills/knowledge in the following areas:

1. Manual dexterity – when handling very small parts, workers must have a steady hand and good hand-eye coordination.
2. Mechanical skills – use sophisticated diagnostic equipment for troubleshooting.
3. Technical skills – use sophisticated diagnostic equipment for troubleshooting.
4. Troubleshooting skills – must observe and properly diagnose and fix problems that a machine may be having.
5. Design – must have knowledge of design techniques, tools, and principals involved in production of precision technical plans, blueprints, drawings, and models.
6. Mathematics – knowledge of arithmetic, algebra, geometry, calculus, statistics, and their applications.
7. Judgment and decision making – industrial manufacturing mechanics must have the ability to measure the relative cost and benefits of potential actions to choose the most appropriate decision.
8. Operation and control – controlling operations of manufacturing equipment or system.
9. Critical thinking – use logic and reasoning to identify the strengths and weaknesses of alternative solutions, conclusions, or approaches to problems.

# Snow College Machine Tool Technology Curriculum Map

## **Summary:**

The machine tool program is designed to give students a basic knowledge of machining skills. Items covered include: math, blueprint reading, conventional lathe and mill operation, feeds and speeds, grinder operation, and the operations of computer numerical control (CNC) lathes and mills. Through lecture and practical lab experience, students can learn the machine tool operation skills needed in today's industry.

Students will be required to pass an entrance test with math and reading scores of an appropriate level. If the scores are too low, students will need to plan extra time to remediate those skills before entering the program.

## **Outcomes:**

Students who complete an AAS degree in Machine Tool Technology at Snow College will be expected to demonstrate that they:

1. Have knowledge of machining skills; i.e., lathe operation, milling machine operations, Computer Numerical Control basics, drilling machines, and other machine shop support equipment.
2. Know machine shop safety and rules of conduct.
3. Have a basic knowledge of quality control, measuring instruments, and blueprint reading.
4. Know basic knowledge of cutters and material metallurgy.
5. Can follow the guidelines and standards as set by industry requirements.
6. Produce quality machined products in a safe, time efficient manner according to required specifications.
7. Have a sense of pride in their skills and abilities.
8. Grow in individual ingenuity and imagination.
9. Acquire the ability to lead and help others grow with them.
10. Have an increase individual self-esteem as they receive recognition from a job well done.

# Snow College Welding Technology Curriculum Map

## **Summary:**

This program covers all welding processes commonly used in the fabrication, repair, and construction industries. It is taught by welding on both plate and pipe, and using ferrous and nonferrous materials.

Exact course descriptions and hours for the Welding Technology program match with other state schools and use national and international curriculum and task lists. There has been a working relationship between institutions to accept student hours and credit.

## **Outcomes:**

Students who complete an AAS Welding Technology at Snow College will demonstrate that they:

1. Have a knowledge of welding technology skills; i.e., safety, oxyacetylene welding, cutting, shielded metal arc welding, gas metal arc welding, flux cored arc welding, gas metal arc welding, flux cored arc welding, gas tungsten arc welding, blueprint reading, applied math, metallurgy, electrical safety, etc.
2. Have a knowledge of codes and standards.
3. Have a knowledge of tools used in the trade.
4. Have a knowledge of interpersonal skills.
5. Can demonstrate good safety practices in shop.
6. Complete 80% of skill/task lists for each course.
7. Correctly weld in all positions.
8. Have a sense of pride in their skills and abilities.
9. Understand the need to develop hand-eye coordination.
10. Have a feeling of confidence as they successfully complete required work assignments.

# Information Technology Department Review Self-Study

representing courses taught in Computer Information Systems Technology

submitted to Snow College Board of Trustees and the  
Utah State Board of Regents  
Summer 2019

## Reviewed Spring Semester 2019 with the rating of recommended

- Gary Cantrell, Assistant Professor of Computer Science, Southern Utah University
- Janalee Jeffery, Assistant Professor, Mathematics, Snow College

## Program Description and Mission Statement

Snow College Computer Information Systems provides an engaging learning environment that prepares students for employment in the computer networking field through current, rigorous, and hands-on learning activities.

Computer Information Systems covers a broad range of career opportunities. You could be a network administrator, network technician, network architect, network engineer, or a network manager. Companies large and small need employees skilled in CIS-related specialties, resulting in extensive options for a successful career.

The beauty of computer information systems is that you can choose your specialty in a demanding career field where there are ample career opportunities to choose from. In Utah the average salary for a Network Administrator is \$67,380, a Network Engineer's average salary is \$51,400 to \$84,500, and a Network Manager's average salary is \$44,800 to \$72,900.

Visit the Snow College website at [www.snow.edu/cis/](http://www.snow.edu/cis/) to learn more about this program.

## Curriculum:

Please see Appendix A for a descriptive list of degrees and course requirements. Appendix B offers a comprehensive list of all currently taught courses. Appendix C provides a curriculum map of courses linked to program learning outcomes.

## Student Learning Outcomes

### Computer Information Systems Technology

Students who complete a Certificate of Completion or an AAS degree in Computer Information Systems from Snow College will be expected to demonstrate that they:

- Know basic computer skills and the use of a variety of computer programs.
- Know fundamentals of IT Essentials.
- Know fundamentals of networking.
- Know fundamentals of internetworking.
- Know fundamentals of Network management.

- Know fundamentals of databases.
- Know fundamentals of project management.
- Know foundations of Security in Networking.
- Know sound business and/or project management.
- Know rules and regulations that govern their field of expertise.
- Know business ethics and copyright issues.
- Follow good business practices.
- Safely and efficiently perform quality work on computer networking systems.
- Can assemble and run a computer network.
- Understand the role that IT plays in a business infrastructure.

## Academic Advising

The general advising of students attending Snow College is conducted through the Student Success Center. The Center employs many advisors who are trained to help with schedules, consult about major and career options, and find financial aid resources to pay for school. In addition, the division funds a special advisor concentrating on career and technical education pathways whom our department has consulted. Lastly, faculty members and part-time instructors in the department often meet with students to discuss their current academic and/or performance needs as well as their future goals.

## Faculty

Our faculty consists of two instructors covering coursework offered on the Richfield and Ephraim campuses. Although there is some overlap in responsibilities, each instructor is assigned a specific course and students they have direct responsibility over for the duration of that course. Our faculty and educational credentials are as follows:

- Terrence Coltharp, Department Chair and Networking Instructor
  - AAS in Computer Information Systems, Snow College

- BS in Network Operations Security, Western Governors University (Expected May 2018)
- Certifications:
  - CompTIA A+
  - CompTIA Network+
  - CompTIA Project+
  - CompTIA Security+
  - CCENT
  - CCNA
  - Cloud Foundations
  - Linux Foundations
  - Cisco Trainer for IT Essentials through WAN
- Michael Medley, Networking Instructor
  - MBA, California State University San Bernardino
  - BA in Finance, California State University San Bernardino
  - BS in Technology Management, Utah Valley University
  - AAS in Technology Management, Utah Valley University
  - Certifications:
    - CompTIA A+
    - CompTIA Network+
    - Cisco Trainer for IT Essentials
    - Cisco Trainer for Introduction to Networks

We have utilized Snow College IT staff for several years now to cover courses that are related to what they do for the college. This has brought some real-world scenarios into the discussion that we feel enhance those courses. At the time of this report we only have one adjunct instructor.

Justin Cherry works at the college as a network administrator, server manager, and IP Telephone specialist. He has been teaching select courses for the department for several years now and we expect to have him continue in this role. These are the courses that he has been teaching:

- CIS 1125, IT Essentials Instructor
- CIS 1060, IT Project Management Instructor

## Advisory Committee

The following is a list of the advisory committee members, their strategic role on the committee, and their immediate business connection and role.

First Name	Last Name	Strategic Role	Business/Title
Russell	Beutler	Industry/Alumni	Service and Repair at CUES
Jeff	Sirrine	Education	IT Manager, SC Richfield
Justin	Cherry	Industry	Networking and Servers, SC Ephraim
Marlin	Mason	Industry	Networking, Routing, Switching, Security
James	Stanger	Industry/Cert partner	CompTIA, Chief Technology Evangelist

## Program Assessment

In accordance with Utah State Board of Regent's policy R411 on the periodic review of educational programs, an on-site visit of Snow College's Information Technology program was conducted Spring Semester 2019. This visit was preceded by a careful reading of the program's self-study document and included a comprehensive tour of current facilities, conversations with students, class visits, and faculty and administration interviews.

## Program Strengths

Outlined below are specific commendations about the program

- **Learning environment:** The current facilities provide a decent variety of practice equipment for the students and made good use of assigned space. This includes adjustments to access for students with different abilities.
- **Administrative Rights:** It is a great asset to the program that student have administrative rights to all machines. This allows for a large amount of customization and exploration in their environments. This is a great way for students to learning information technology theory applies with practice.
- **Curriculum:** The program is designed around industry certification requirements which allows for students to be fully prepared to test for very valuable industry certifications.
- **Faculty:** Program faculty are available to students on both the Ephraim and Richfield campuses. Faculty are professional and maintain a strong connection to their students.
- **Articulation:** The program's efforts toward articulation agreements with other universities will add additional program options for students: they can immediately enter the workforce or obtain more credential by transferring to four-year programs.

## Program Weaknesses/Recommendations:

1. **Career Placement:** It was recommended that program faculty collect data on students who transfer to four-year programs. It is further recommended that program faculty provide four-year transfer school contact information and provide for guest lecturers or on-site visits with faculty from potential four-year programs.

*Institutional Response: Program faculty will send a survey to each Information Technology graduates bi-annually and update a private, ad hoc database on program graduates and/or transfers. This is planned as an independent study. Program faculty will also work with Snow College advisors to determine the best four-year program contact information and reach out to respective faculty for on-site lectures or student meet-and-greets.*

- 2. Recruitment Plan:** It was recommended that the program developed a diverse recruitment plan that includes target audience marketing strategies. An emphasis on program diversity should be the focus of the recruitment plan and classroom instruction.

*Institutional Response:* Program faculty are currently working on banners, pamphlets and other materials to showcase the diversity of the Information Technology program. Program faculty will also target non-traditional students and community members to increase the program's diversity.

- 3. Degree Mapping:** It was recommended that the program provide a degree map that delineates how students can navigate the information technology pathway, including all certifications and end-of-program transfer and/or career placement options. It is further recommended that funding be obtained to help offset the student cost for IT certification.

*Institutional Response:* Program faculty have already provided an updated degree map to campus advisors. This same document will be made available to all students and will be reviewed in all classes on the first day of Fall Semester 2019. Regional CTE directors and high school pathway coordinators will have copies of the updated document to distribute to potential students in area high schools. In addition, the program purchased Boson software for all certification preparation and signed a contract with CompTIA to purchase certification exams at 50% of cost.

- 4. Virtual Machines:** It was recommended that student administrative rights to physical machines be extended to virtual machines. This provides students a variety of operating systems for applied learning.

*Institutional Response:* Program faculty will begin exploring the option of providing student administrative rights on virtual machines.

- 5. Forensic Investigator:** It was recommended that the phrase "computer forensic investigator" be removed from the program's mission statement. Current course offerings do not have a path that is appropriate for this occupation.

*Institutional Response:* This mission statement will be re-written and updated in the Snow College Catalog, on-line, and in all program materials.

- 6. Continuing Education:** It was recommended that continuing education for program faculty include at least a conference or similar technology event each year. Information technology is a rapidly changing field and it is important for faculty to be aware of these developments to maintain relevant curriculum and instruction.

*Institutional Response:* Faculty update and/or renew their industry certification on an ongoing basis, mostly through continuing education courses. Faculty will research two industry conferences for faculty to attend each year.

## Appendix A: Course Requirements Specific to Degree Outcomes

### AAS Degree in Computer Networking

Following is the new course pathway for the AAS degree with the addition, modification, or deletion of courses.

Course Prefix and Number	Title	Credit Hours
CIS 1140	Network Essentials	3
CIS 1310	Security Essentials	3
CIS 1125	IT Essentials	3
CIS 1620	Linux Fundamentals	3
CIS 2205	WAN Fundamentals	3
CIS 1200	Intro to Networks	3
CIS 1205	Routing and Switching Essentials	3
CIS 2200	Scaling Networks	3
CIS 2215	Cisco Switch	3
CIS 2210	Cisco Route	3
CIS 2220	Cisco TShoot	3
CIS 1060	IT Project Management	3
CIS 2300	Cisco Wireless Fundamentals	3
CIS 2250	Cisco VoIP	3
GE Course Computation	MATH 1050 College Algebra or AT 1715 Applied Technical Math	3
GE Course Composition	BUS 2200 Bus. Communication or ENGL 1010	3
GE Course Human Relations	GNST 1200 GE Foundations or BUS 1170 Human Relations in Org	3
<b>Elective Courses</b>		
	<b>12 credits from this approved list</b>	
BUS 1270	Strategic Selling	3
BUS 1020	Computer Technology & Applications	3
BUS 1300	Social Media Marketing	3
BUS 1060	QuickBooks for Small Business	3
BUS 1600	Entrepreneurship Seminar	1
BUS 2650	Management Principles for Entrepreneurs	3
BUS 2222	Entrepreneurship	3
<b>Total Number of Credits</b>		<b>63</b>

## Certificate of Proficiency in Networking

Following are the changes to this certificate that will help prepare students better for entry-level employment and/or advanced computer networking courses.

Course Prefix and Number	Title	Credit Hours
CIS 1140	Network Essentials	3
CIS 1310	Security Essentials	3
CIS 1125	IT Essentials	3
CIS 1620	Linux Fundamentals	3
CIS 1200	Intro to Networks	3
CIS 1205	Routing and Switching Essentials	3
<b>Total Number of Credits</b>		<b>18</b>

## Certificate of Proficiency in Advanced Networking

Following are the changes to this certificate that will help prepare students better for entry-level employment and/or advanced computer networking courses.

Course Prefix and Number	Title	Credit Hours
CIS 2200	Scaling Networks in the Enterprise	3
CIS 2205	Wide Area Networking	3
CIS 2300	Cisco Wireless Networking	3
CIS 2210	Cisco Route	3
CIS 2215	Cisco Switch	3
CIS 2220	Cisco TShoot	3
<b>Total Number of Credits</b>		<b>18</b>

## Appendix B: Computer Information Technology Courses

### **CIS 1060 Information Technology Project Management**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:2:2)

Description: This course is designed to prepare students to manage IT projects from initiation to closure.; Students will gain the fundamentals of project management and will learn the project management process to include topics in planning, execution, project acceptance, management, and support.; Students will learn to manage projects for scope, time, and budget restraints.

### **CIS 1125 IT Essentials**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:2:2)

Description: This course discusses the history, role, and structure of computer architecture and operating systems needed by computers. This course provides an introduction to the computer hardware and software skills needed to help meet the growing demand for entry-level computer technicians.; The curriculum covers the fundamentals of computer hardware and software as well as advanced concepts in security, networking, and computer technician responsibilities. Lab exercises include assembling a computer, laptop, and troubleshooting problems. The course prepares students for the CompTIA A+ certification exam. (Additional fee required)

### **CIS 1140 Networking Technologies**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:2:2)

Description: In this course, students will learn the basic concepts and prerequisites of network computing, including hardware, software, topologies, and the Open Systems Interface (OSI) reference model. Additionally, students will install, configure, and troubleshoot computer networking hardware and software. Prerequisites: CIS 1120 or department approval

### **CIS 1200 Introduction to Networks**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:2:2)

Description: This course introduces the architecture, structure, functions, components, and models of the Internet and other computer networks. The principles and structure of IP addressing and the fundamentals of Ethernet concepts, media, and network operations. Students will build simple LANs, perform basic configurations for routers and switches, and implement IP addressing schemes. (Additional fee required)

### **CIS 1205 Routing and Switching Essentials**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:2:2)

Description: This course describes the architecture, components, and operations of routers and switches in a small network. Students learn how to configure a router and a switch for basic functionality, including topics in troubleshooting routers, switches, RIPv1, RIPv2, single-area and multi-area OSPF, virtual LANs, and inter-VLAN routing in both IPv4 and IPv6 networks. (Additional fee required) Prerequisites: CIS 1200

### **CIS 1310 Network Security Fundamentals**

Semesters Offered: TBA

Credits, Lecture hours, Lab hours: (3:2:2)

This course will introduce students to the fundamentals of network security concepts. Students will become familiar with network attackers and their attacks, security basics, network and web security, cryptography, operational security, and policies and procedures related to network security.

### **CIS 1620 Linux Fundamentals**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:2:2)

Description: This course will introduce students to the fundamentals of the Linux OS and Linux networking concepts. Students will become familiar with Linux installation, usage, file system, management of GUI interface and networking processes, troubleshooting, and security. Prerequisites: CIS 1121, CIS 1122, and CIS 1140

### **CIS 2200 Scaling Networks in the Enterprise**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:2:2)

Description: This course describes the architecture, components, and operations of routers and switches in large and complex networks. Students learn how to configure routers and switches for advanced functionality. Students will also be able to configure and troubleshoot routers and switches and resolve common issues with OSPF, EIGRP, STP, and VTP in both IPv4 and IPv6 networks. Students will also develop the knowledge and skills needed to implement DHCP and DNS operations in a network. (Additional fee required) Prerequisites: CIS 1205

### **CIS 2205 Wide Area Networking Fundamentals**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:2:2)

Description: This course discusses the WAN technologies and network services required by converged applications in a complex network. The course enables students to understand the selection criteria of network devices and WAN technologies to meet network requirements. Students learn how to configure and troubleshoot network devices and resolve common issues with data link protocols. Students will also develop the knowledge and skills needed to implement IPsec and virtual private network (VPN) operations in a complex network. (Additional fee required) Prerequisites: CIS 2200

### **CIS 2210 Cisco ROUTE: Implementing IP Routing**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:2:2)

Description: This course will teach students how to plan, configure, and verify the implementation of complex enterprise LAN and WAN routing solutions, using a range of routing protocols in IPv4 and IPv6 environments. Students will obtain the knowledge and skills needed to plan, implement, monitor, secure, maintain, and troubleshoot converged enterprise networks. The student will also be able to configure a secure routing solution to support branch offices and mobile workers. Comprehensive labs emphasize hands-on learning and practice to reinforce configuration skills. Prerequisites: CIS 1205

### **CIS 2215 Cisco SWITCH: Implementing IP Switching**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:2:3)

Description: This course teaches students how to implement, monitor, and maintain switching in converged enterprise networks. Students will learn how to plan, configure, and verify the implementation of complex enterprise switching solutions. The course also covers the secure integration of VLANs, WLANs, voice, and video into enterprise networks. Comprehensive labs emphasize hands-on learning and practice to reinforce configuration skills. Prerequisites: CIS 1205

### **CIS 2220 Cisco TSHOOT: Maintaining and Troubleshooting IP Networks**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:2:2)

Description: This course teaches students how to monitor, maintain and troubleshoot complex enterprise routed and switched IP networks. Skills learned include: planning and execution of regular network maintenance, support and troubleshooting using technology-based processes and best practices based on systematic and industry recognized approaches. Extensive labs emphasize hands-on learning and practice to reinforce troubleshooting techniques. Prerequisites: CIS 2210 and CIS 2215

### **CIS 2250 Cisco VOIP Networking Fundamentals**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:2:2)

Description: Cisco VOIP Networking Fundamentals teaches students how to maintain and operate a Cisco Unified Communications solution that is based on Cisco Unified Communications Manager, Cisco Unified Communications Manager Express, Cisco Unity Connection, and Cisco Unified Presence. This course provides the students with the knowledge and skills to achieve associate-level competency in Cisco Unified Communications. This course introduces the architecture, components, functionalities, and features of Cisco Unified Communications solutions and describes how daily job tasks, such as system monitoring, moves, adds, and changes are performed on Cisco Unified Communications Manager, Cisco Unified Communications Manager Express, Cisco Unity Connection, and Cisco Unified Presence. Prerequisites: CIS 1205

## **CIS 2300 Cisco wireless Networking Fundamentals**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:2:2)

Description: This course will introduce students to the fundamentals of a Cisco based wireless network.

Students will become familiar with wireless network planning, designing, installation, and configuration.

Students will become familiar with wireless standards and concepts covering security and troubleshooting.

(Additional fee required) Prerequisites: CIS 1205

## Appendix C: Curriculum Map and Assessment Plan

# Snow College Computer Information Systems Curriculum Map

### Summary:

This program includes a variety of courses that are designed to train students with high demand, marketable computer skills. Students receiving an Associate of Applied Science degree will complete courses in Computer Networking, Internetworking, PC Hardware and Software configuration. Each of these skillsets is marketable individually; however, the combination will help set students apart as top candidates for employment in this field.

The networking program focuses on industry leading skills to include CISCO Essentials, Routing and Switching, Wireless Networking, VOIP Networking, Network Security, Internetworking. In addition, the networking program covers Microsoft and Linux operating systems.

Students will gain the knowledge and skills to certify in CISCO, Microsoft, and CompTIA certification domain areas.

### Outcomes:

Students who complete a Certificate of Completion or an AAS in Computer Information Systems-Computer Networking from Snow College will be expected to demonstrate that they

1. Know basic computer skills and the use of a variety of computer programs.
2. Know fundamentals of IT Essentials.
3. Know fundamentals of networking.
4. Know fundamentals of internetworking.
5. Know fundamentals of Network management.
6. Know fundamentals of databases.
7. Know fundamentals of project management.
8. Know foundations of Security in Networking.
9. Know sound business and/or project management.
10. Know rules and regulations that govern their field of expertise.
11. Know business ethics and copyright issues.
12. Follow good business practices.
13. Safely and efficiently perform quality work on computer networking systems.
14. Can assemble and run a computer network.
15. Understand the role that IT plays in a business infrastructure.

Program Coursework and Assessment	Knowledge Area: Computer Information Systems															
	Know basic computer skills and the use of a variety of computer programs	Know fundamentals of IT Essentials	Know fundamentals of networking	Know fundamentals of internetworking	Know fundamentals of Network management	Know fundamentals of databases	Know fundamentals of project management	Know foundations of Security in Networking	Know sound business and/or project management	Know rules and regulations that govern their field of expertise	Know business ethics and copyright issues	Follow good business practices	Safely and efficiently perform quality work on computer networking systems	Can assemble and run a computer network	Understand the role that IT plays in a business infrastructure	Meets another program level outcome

# Outdoor Leadership Department Review Self-Study

representing courses taught in Outdoor Leadership and Entrepreneurship

submitted to Snow College Board of Trustees and the  
Utah State Board of Regents  
Summer 2019

**Reviewed Spring Semester 2019 with the rating of recommended**

- **Bridget Eastep, Ph.D., Director of Outdoor Engagement, Southern Utah University**
- **English Brooks, Assistant Professor of English, Snow College**

## **Program Description and Mission Statement**

The Outdoor Leadership and Entrepreneurship Program at Snow College is a highly field-based program that offers unique learning environments, which are characterized by hands-on learning in small classes where students have the opportunity for close interaction with fellow students, faculty, professionals, and the outdoor environments. Students will leave Snow College with a strong educational foundation and real-world experience in both outdoor leadership and entrepreneurship by participating in a variety of experiences. The Outdoor Leadership and Entrepreneurship Program helps prepares students to successfully start their own outdoor business, enter the outdoor industry workforce, or continue their education.

Outdoor Leadership and Entrepreneurship's mission is to actively engage the future outdoor leader in an environment of innovative learning through meaningful and direct outdoor experiences and interactions with other individuals, groups, and organizations.

**Curriculum:** Please see Appendix A for a descriptive list of degrees and course requirements. Appendix B offers a comprehensive list of all currently taught courses.

## **Student Learning Outcomes**

### **Outdoor Leadership and Entrepreneurship**

Students who complete the Outdoor Leadership and Entrepreneurship Associates Degree will:

- Communicate effectively in both oral and written contexts.
- Work effectively as a team.
- Apply business principles as they relate to the outdoors.
- Address and assess industry standards and best management practices.
- Apply outdoor skills (which may include basic camping skills, equipment and clothing selection and use, weather, health and sanitation, travel techniques, navigation, technical skills).
- Express theoretical knowledge as it relates to outdoor adventure and then demonstrate critical thinking, judgement and decision making.

- Develop a personal definition of outdoor leadership.
- Apply planning, logistics, and risk management strategies for trip planning/programming.

## Students

	2014	2015	2016	2017	2018
<b>Number of Graduates</b>	<b>0</b>	<b>0</b>	<b>2</b>	<b>1</b>	<b>1</b>

\*The three current certificates were approved Spring 2018

\*\*Annual headcount – Fall even years immersion, Spring headcount higher in some cases

## Academic Advising

The general advising of students attending Snow College is conducted through the Student Success Center in both Richfield and Ephraim. The center employs many advisors who are trained to help with schedules, consult about major and career options, and find financial aid resources to pay for school. The Business and Applied Technologies Division recently funded a part-time adviser for BAT Division students in Ephraim. Department and division leadership meet with advisers regularly to ensure that students receive correct program information.

## Faculty

- Whitney Ward, Ph.D., Indiana State University
- Part-time faculty member
- Part-time faculty member

Additionally, faculty members and part-time instructors in the Business Department often meet with students to discuss their current academic and/or performance needs as well as their future goals.

## Program Assessment

The Outdoor Leadership and Entrepreneurship program was not part of the scope of the most recent Business and Applied Technologies division review.

## Self-Assessment

The Outdoor Leadership and Entrepreneurship program regularly takes part in the Snow College assessment day. Several signature and reflective assignments and associated rubrics have been developed to assess student learning and program outcomes.

## Program Assessment

In accordance with Utah State Board of Regent's policy R411 on the periodic review of educational programs, an on-site visit of Snow College's Outdoor Leadership and Entrepreneurship was conducted Spring Semester 2019. This visit was preceded by a careful reading of the program's self-study document and included a comprehensive tour of current facilities, conversations with students, class visits, and faculty and administration interviews.

## Program Strengths:

- **Credentials/Pathway:** The OLE Associates Degree and 3 certificates (OLE, Outdoor Skills, and Outdoor Product Design and Development) incorporate high impact practices with nationally recognized training, significant field time, and meaningful interactions with outdoor industry professionals to serve as an example program in Utah's thriving outdoor industry field. The immersion semester is a unique package that brings these strengths together to offer students a once-in-a-lifetime learning opportunity.

OLE offers industry-recognized training through Leave No Trace, the Wilderness Education Association, and Solo. Students who complete the associate degree and the Outdoor Skills Certificate earn Leave No Trace Trainer certificates, WEA's Outdoor Leadership training, and SOLO's Wilderness First Responder certification. All three trainings are recognized in the outdoor industry and give students a solid skill set to successfully compete for competitive jobs in guiding and outdoor education. WEA's Outdoor Leadership Certificate requires at least 20 days in the field to practice skills. This is taken very seriously, and students accrue significant field time through the outdoor skills courses.

Students master skills in backpacking, climbing, winter (skiing, ice climbing, backcountry winter travel and camping), and river/water skills. This hands-on time is structured into campus courses and then elevated in the immersion experience. Significant assignments include planning and implementing an expedition on the immersion experience, operating a Haunted House, leading others in the outdoors, and developing business plans.

Finally, the reviewers were impressed with the caliber and variety of outdoor professionals with whom students interacted with throughout their courses. This includes leaders from Cotopaxi,

Black Diamond, the National Park Service, guiding businesses, the US Forest Service, and the Bureau of Land Management. The immersion students also participated in AORE, a well-respected outdoor recreation and education professional conference that took place in Snowbird last October. The students we interviewed referred to these interactions as opportunities that open their eyes to the many options within the outdoor industry.

- **Learning Environment:** Snow College's mission and history asks professors to provide a "vibrant learning environment that empowers students to achieve their educational goals, encouraging and supporting innovative initiatives that create dynamic learning experiences...and creating learning and service opportunities locally and globally to engage students, faculty, and staff in surrounding communities." The instruction within OLE exceeds this expectation. Students were and are challenged and supported out of their comfort zone to expand their knowledge and skill base through intentional experiential learning processes. Dr. Ward helps students find their passion for outdoor leadership and is viewed as a valued mentor, role model, and friend.
- **National Recognition:** As mentioned above in the curriculum discussion, OLE incorporates nationally recognized certificates and trainings into its curriculum. WEA, SOLO, and LNT trainings give students a solid foundation to seek competitive positions after graduating from Snow. The best example we have for this is the success Snow students have had being hired at SUU Outdoors as trip leaders. SUU Outdoors requires trip leaders to have wilderness first aid, outdoor leadership experience, and Leave No Trace skills. When an OLE student applies for a trip leader position, it is rare he or she is not hired due to the solid training recognized throughout the industry.

## Program Concerns/Recommendations

1. **Great Basin Station Contract:** It was recommended that Snow College renew or formalize a close working relationship with the Great Basin Station. Having an outdoor facility for the immersion experience is critical to program rigor and curricular quality. A working relationship with the Great Basin Station has the potential to allow OLE faculty (and perhaps other programs) access to the facility as a teaching/learning space while offering meaningful, feasible ways to maintain the center through project-based, community-oriented, place-based learning. Without the contract or a working relationship, the OLE program has 1.5 years to find a suitable outdoor immersion facility.

*Institutional Response: It would be great to renew the permit with the Forest Service for the Great Basin Station. If this is not a feasible option, the OLE program will seek different opportunities/facilities like the Great Basin Station in order to preserve the immersion and other outdoor leadership course experiences.*

2. **Marketing:** It was recommended that the OLE program provide internal marketing among enrolled students and improve external marketing to potential students. OLE is a unique program that offers an amazing student experience and needs to be promoted to three distinct audiences. First, OLE provides Snow College students a way to incorporate health and wellbeing into their academic schedules. Second, OLE's combination of outdoor leadership and entrepreneurship as an associate degree offers students who want to pursue a profession in the outdoor field a unique

option for a practical education that sets them up to begin their own business or continue their education. Finally, OLE's immersion experience and integrative certificates are unique in the outdoor academic field. Many schools have dissolved their immersion experiences and do less instruction in a field setting in order to be more efficient. OLE serves a unique niche that can serve students seeking such opportunities to transition into higher education. The immersion experience and the certificates can draw students from around the world to experience the best Snow has to offer.

***Institutional Response:** OLE will continue to utilize high impact practices and provide hands-on experiences. However, more efforts can be made to market and promote the OLE program. A program-specific student ambassador will be utilized starting fall 2019 to visit high schools and support other recruitment opportunities. The program will work with business students to develop marketing materials to raise awareness of OLE opportunities to current students. Faculty will better coordinate with the admissions and academic advisement offices to more consistently promote OLE's degree and curricular opportunities.*

- 3. Program Capacity and Growth:** It was recommended that the program fully implement the three certificate programs in order to encourage more students to participate and/or major in the program. This will necessitate and increase to the current instructor pool, which is at capacity with one full-time and two part-time faculty. Program growth potentially creates paid student worker positions that help manage program equipment (even on-campus outdoor equipment rentals) and market program offerings.

***Institutional Response:** The addition of student workers and additional faculty will help with program management, provide additional areas of curricular expertise, help with recruitment and retention, and enable the Immersion Experience to be offered each year. Dr. Ward will work with the Snow College Career Center regarding student worker positions and with faculty and administrative leadership on administrative support within the division and program growth targets that support the acquisition of another full-time faculty member.*

BUS 1600	Entrepreneurship Seminars		1

## General Education Coursework for the Associate degree

The General Education curriculum is made up of courses that formulate a GE core (which is mandated by the state of Utah) and a selection of course options that fall into several knowledge areas:

### General Education Core

- Quantitative Literacy (MATH 1030, 1040, 1050, or 1080)
- American Institutions (ECON 1740, HIST 1700,
- POLS 1000, POLS 1100, HIST 2700, or HIST 2710)
- English (ENGL 1010 and ENGL 2010)

**Additional Knowledge Areas (students must complete at least one course in each area)**

- Fine Arts
- Humanities
- Social and Behavioral Science
- Physical Science
- Life Science
- Integrated Exploration

## Appendix B: Outdoor Leadership and Entrepreneurship Courses

### **OLE 1000 Introduction to Outdoor Leadership**

Semester(s) Taught: Fall, Spring

Credits, Lecture hours, Lab hours: (3:3:0)

General Ed Requirement: Social Sciences

Description: This course focuses on outdoor leadership by introducing and exposing students to the history and various theories of outdoor leadership principles, practices, and ethics. Emphasis is also placed on implementation, evaluation and transference of leadership characteristics beyond an outdoor environment. Students apply leadership skills while planning and implementing a three-day outdoor adventure to be carried out during the semester.

### **OLE 1010 Outdoor Leadership Business and Careers**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:1.5:3)

Description: This course explores the outdoor industry and associated careers. It provides students opportunities with and exposure to a variety of outdoor-related businesses and organizations (private, non-profit, and government). Students will produce outdoor products/services and develop a workable business plan. (Field trips required)

### **OLE 1505 Kayaking**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (1:5:2)

Description: This course introduces the fundamental skills and knowledge in kayaking, including proper use and care of equipment, paddling strokes and techniques, reading water flow patterns on flat- and white-water rivers, safety measures, and self-rescue techniques. Students must pass a swimming test. A field trip is required. This course may be repeated for credit. (Additional fee required).

### **OLE 1515 Sailing**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (1:5:2)

Description: This course addresses sailing theory, sailing nomenclature, parts of the boat, how to launch and retrieve the boat, how to rig and trim the boat for various points of sail. Students will be exposed to various types of sailing boats and experiences, which may include keelboats, catamaran, sailing canoe, dinghies, and boardsailing. (Additional Fee and Field trip required)

### **OLE 1527 Rock Climbing**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (1:5:2)

Description: This course introduces the fundamental skills and knowledge in rock climbing, including free climbing and safety systems. This course may be repeated for credit. (Additional fee required).

**OLE 1535 Backpacking**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:2:3)

Description: This course provides students an introduction to the fundamental skills and knowledge of backpacking. Students will learn about proper clothing, equipment and use, sheltering, cooking, travel techniques, safety, and Leave No Trace ethics. This course may be repeated for credit. (Additional fee and field trip required.)

**OLE 1542 Wilderness First Responder**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:2:2)

Description: This course addresses the practice of advanced wilderness medical techniques and protocols for situations requiring extended patient care and management in remote, backcountry, or wilderness environments with limited resources. SOLO Wilderness First Responder Certification offered with successful completion. (Course fee required.)

**OLE 1635 Backcountry Skiing**

Semester(s) Taught: Spring

Credits, Lecture hours, Lab hours: (1:0:3)

Description: This course introduces the fundamental skills and knowledge of backcountry skiing, including proper winter attire and equipment use and care, travel techniques, winter safety, and environmental awareness. (Additional fee required.)

Prerequisites: Permission of Instructor

**OLE 1655 Snowshoeing**

Semester(s) Taught: Spring

Credits, Lecture hours, Lab hours: (1:0:3)

Description: This course provides students an introduction to the fundamental skills and knowledge of snowshoeing. Students will learn about proper winter clothing, equipment and use, travel techniques, winter safety, and environmental awareness. (Additional fee required.)

**OLE 1660 Winter Camping**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (1:0.5:3)

Description: This course provides students an introduction to the fundamental skills and knowledge of winter camping. Students will learn about proper winter clothing, equipment and use, sheltering, cooking, travel techniques, winter safety, and environmental awareness. (Additional fee and field trip required.)

**OLE 2000 Outdoor Skills**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:1.5:3)

Description: This course provides a foundation to outdoor skills in specialized backcountry environments. Topics covered include specialized travel techniques, navigation, teaching, decision making/problem

solving, Leave No Trace Outdoor Ethics, and environment specific camping skills, specialized equipment and clothing selection and use. (Additional fee and field trip required.)

### **OLE 2200 Expedition Leadership**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (1:0.5:3)

Description: This course provides an experiential approach in addressing the planning, logistics, and safety and risk management needed to design and implement outdoor expeditions. Emphasis is on development of leadership through sound judgment, decision-making, while instructing in backcountry/wilderness environments. (Additional fee and field trip required.)

### **OLE 2450 Climbing Technical Leadership**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:1.5:3)

General Ed Requirement: Integrated Exploration

Description: This course provides a combination of theoretical background and technical aspects of leading and managing groups in a vertical environment and emphasizes hands-on skill development such as: rope systems, anchors, rappelling and belaying, protection placement, lead climbing, site management, risk management, related emergency procedures, and Leave No Trace Outdoor Ethics. (Additional fee and field trips required)

### **OLE 2550 Winter Technical Leadership**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:1.5:3)

General Ed Requirement: Integrated Exploration

Description: This course provides a combination of theoretical background and technical aspects of leading and managing groups in winter environments, highlighting avalanche awareness, while utilizing specialized hands-on skill development such as snowshoeing, skiing, and ice climbing. It will emphasize specialized clothing/equipment selection, care, and maintenance, equipment nomenclature, technical aspects of avalanche awareness and assessment, backcountry travel and route finding, risk management, and related beacon search and rescue procedures. (Additional fee and field trips required.)

### **OLE 2600 Adventure Education**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (2:1:2)

Description: This course provides a theoretical background and hands-on application of adventure education utilizing concepts such as real and perceived risk, sequencing, utilizing peak experiences, leadership styles and development, debriefing, framing, and metaphor use.

### **OLE 2650 Ropes Course Technical Leadership**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:1.5:3)

General Ed Requirement: Integrated Exploration

Description: This course provides a combination of theoretical background and technical aspects of leading and managing groups in a challenge environment and will emphasize hands-on skill development such as spotting/belaying, equipment management selection, and care, program design/sequencing, facilitation strategies, course design and maintenance, risk management, and related emergency procedures.

### **OLE 2750 River/Water Technical Leadership**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:1.5:3)

General Ed Requirement: Integrated Exploration

Description: This course provides a combination of theoretical background and technical aspects of leading and managing groups in a water environment and will emphasize hands-on skill development such as equipment selection, care, and maintenance, equipment nomenclature, strokes, self and group rescues, reading and recognizing water features/hydrology, site management, risk management, and related emergency procedures. (Additional fee and field trips required.)

## Appendix C: Curriculum Map and Assessment Plan

# Snow College Outdoor Leadership and Entrepreneurship Curriculum Map

### **Summary:**

The Outdoor Leadership and Entrepreneurship Program at Snow College is a highly field-based program that offers unique learning environments, which are characterized by hands-on learning in small classes where students have the opportunity for close interaction with fellow students, faculty, professionals, and the outdoor environments.

Students will leave Snow College with a strong educational foundation and real-world experience in both outdoor leadership and entrepreneurship by participating in a variety of experiences including internship, certifications, trainings, and instruction.

The Outdoor Leadership and Entrepreneurship Program prepares to successfully start their own outdoor business, enter the outdoor industry workforce, or continue their education.

### **Outcomes:**

Students who complete the Outdoor Leadership and Entrepreneurship Associates Degree will:

1. Communicate effectively in both oral and written contexts.
2. Work effectively as a team.
3. Apply business principles as they relate to the outdoors.
4. Address and assess industry standards and best management practices.
5. Apply outdoor skills (which may include basic camping skills, equipment and clothing selection and use, weather, health and sanitation, travel techniques, navigation, technical skills).
6. Express theoretical knowledge as it relates to outdoor adventure and then demonstrate critical thinking, judgment and decision-making.
7. Develop a personal definition of outdoor leadership.
8. Apply planning, logistics, and risk management strategies for trip planning/programming.

# Services Technology Department Review Self-Study

representing courses taught in Cosmetology/Barbering and Nail Technology

submitted to the Snow College Board of Trustees and the  
Utah State Board of Regents  
Summer 2019

## Reviewed Spring Semester 2019 with the rating of recommended

- Debbie Prichard, Associate Professor of Cosmetology, Utah State University—Eastern
- Adrian Peterson, Assistant Professor, Biology Department Chair, Snow College

## Program Mission Statement

Snow College Cosmetology understands the challenges students face learning the skills required to be successful in the beauty industry. Our reputation as South Central Utah's leading hairstyling and nail school is built on over a half century of experience.

Our commitment to providing relevant, cutting-edge courses and programs delivered by top quality instructors ensures a hands-on, inspiring, accessible and supportive learning environment for every student.

We respond to the evolving learning styles and career aspirations of our students with continued educational opportunities for our instructional team. We know that the achievements of our graduates speak directly to the dedication of our faculty and staff.

Snow College exceeds the needs and desires of the beauty salons in the community by educating students to be proficient in areas that surpass licensure requirements and prepare the student for job readiness throughout the country.

## Cosmetology/Barbering Program Description

Cosmetology/Barbering/Nail Technology remains a viable and relevant career choice. The future outlook in the beauty service industry continues to look bright. There are many exciting job options available.

The Cosmetology/Barbering Technology program is designed to prepare students for direct employment in cosmetology, barbering salons and/or prepare them to open new salon businesses. This program includes 1600 clock time hours of instruction required by the State of Utah for licensure. Students are prepared to take the National Interstate Council of State Boards of Cosmetology/Barbering Licensure Examination required for licensure in the State of Utah.

Students learn to communicate with customers, analyze skin, hair and nails, perform the duties of men and women hair cutting, coloring, styling, chemical texture services, straight razor shaving, hair extensions, basic skin and nail services and all other services offered in a licensed salon.

## Curriculum

This program is intended for students interested in working in cosmetology/barbering salons as a cosmetologist, barber, nail technician, salon manager or business owner. Students earning the AAS Salon Business degree will be prepared to run their own business, execute sales promotions, maintain necessary financial reports and other skills associated with maintaining a successful salon business.

Please see Appendix A for a descriptive list of degrees and course requirements. Appendix B offers a comprehensive list of all currently taught courses. Appendix C is a curriculum and assessment map.

## Student Learning Outcomes

Students who complete an A.A.S. in Salon Business at Snow College will be expected to demonstrate that they have knowledge of/and an understanding in the following areas:

- principles and practices related to cosmetology/barbering skills; i.e., shampooing, styling, men and women haircutting, straight razor shaving, hair extensions, chemical texture services, hair coloring, skin care, nail services, and other material essential to becoming a successful cosmetologist/barber;
- State of Utah rules and regulations governing Cosmetology/Barbering;
- related anatomy and physiology;
- assess salon work areas and practices, recognize potential safety hazards and implement accepted methods to mitigate those hazards;
- writing coherent reports and document client results;
- assess present conditions and determine the action needed to obtain desired client outcomes based on a critical analysis of situations;
- work effectively both individually and with others through class projects and client services through lab experiences;
- communicate in electronic, verbal and written formats;
- deal professionally and ethically with clients, the public and co-workers;
- relevant business practices and the requirements of a successful operation commonly found in cosmetology/barbering establishments.

## Nail Technology Program Description

Nail technology continues to grow within the business of beauty. This course will give you an opportunity to specialize in nails within the Cosmetology industry.

Students will receive 300 hours of education in both theory and practical experience in many phases of manicuring, pedicuring and the application of artificial nails. This course may be completed in one semester. Students are prepared to take the National Interstate Council of State Boards of Nail Technology Licensure Examination required for licensure in the State of Utah.

## Student Learning Outcomes

Students who complete the Nail Technology program at Snow College will be expected to demonstrate that they have knowledge of/and an understanding in the following areas:

- principles and practices related to nail technology skills; i.e., manicuring, pedicuring, gel, fiberglass, and acrylic application, manual and electric filing, polishing, client consultation and other material essential to becoming a successful nail technician;
- State of Utah rules and regulations governing Nail Technology;
- related anatomy and physiology;
- assess salon work areas and practices, recognize potential safety hazards and implement accepted methods to mitigate those hazards;
- assess present conditions and determine the action needed to obtain desired client outcomes based on a critical analysis of situations;
- work effectively both individually and with others through class projects and client services through lab experiences;
- deal professionally and ethically with clients, the public and co-workers;
- relevant business practices and the requirements of a successful operation commonly found in nail salon establishments.

## Academic Advising

The general advising of students attending Snow College is conducted through the Student Success Center. The Center employs advisors who are trained to help with schedules, consult about major and career options, and find financial aid resources to pay for school. However, faculty members and part-time instructors in the cosmetology/barbering/nail technology department often meet with students to discuss their current academic and/or performance needs as well as their future goals.

## Faculty

### Cosmetology/Barbering

- Teri Mason, Instructor, Cosmetology/Barbering; A.A.S., Snow College; Sevier Valley Tech; Full-time Faculty; Department Chair
- Chad Price, Instructor, Cosmetology/Barbering; A.A.S., Snow College; Evans Hairstyling College; Full-time Faculty
- Amanda Wood, Instructor, Cosmetology/Barbering; Evans Hairstyling College; Part-time Faculty

### Nail Technology (new instructional design spring 2019)

- Sheri Thompson, Instructor, Cosmetology/Barbering, Nail Technology, Snow College, Part-time
- Devanae Robinson, Instructor, Cosmetology/Barbering, Nail Technology, Snow College, Part-time

Faculty Headcount	Fall 2014	Fall 2015	Fall 2016	Fall 2017	Fall 2018
Full-Time Professional Track	2	2	2	2	2
Part-Time	2	1	1	2	1

Cosmetology courses are assigned to full-time faculty members, and the part-time faculty member helps team teach. Nail courses are assigned to a specific part-time instructor.

### Program Support

Cost	2014	2015	2016	2017
Direct Institutional Expenditures	\$215,339	\$213,321	\$220,958	\$241,526
Cost Per Student FTE (Annualized)	\$12,109	\$10,968	\$10,526	\$14,833
<b>Funding:</b>				
Appropriated Fund	\$215,339	\$213,321	\$220,958	\$241,526
<b>Other:</b>	NA	NA	NA	NA

Source: Snow College Institutional Research

### Program Advisory Committee:

The advisory committee meets bi-annually and discusses the current curriculum for that semester. They advise on areas that need improvement as they observe new hires from Snow College. Any changes to the state licensing process is reviewed and any legislature items concerning the Cosmetology/Barbering/Nails profession is discussed. Competition accomplishments of the students is emphasized. Members consist of alumni, salon owners, managers and stylists from surrounding counties, along with school representatives, and the cosmetology/barbering/nail instructors. Current members are:

Toni Smith	Scruples Educator and owner of Spruce Moose	Monroe
Julia Jensen	Owner of The Works	Richfield
Hailey Christensen	Manager of Smart Styles Walmart	Richfield
Darin Pili	Owner of Sharp Image	Ephraim
Stacie Goble	Owner of Shear Style	Mt. Pleasant
Rylie Fautin	Owner of Wild Roots	Marysvale
Doug Mortensen	Doug's Barber Shop	Richfield
Martha Zabriskie	Small Town Hair	Fountain Green
Pam Erickson	Tint and Taper Salon	Loa

### Program Assessment

In accordance with Utah State Board of Regent's policy R411 on the periodic review of educational programs, an on-site visit of Snow College's Cosmetology/Nail Services program was conducted Spring

Semester 2019. This visit was preceded by a careful reading of the program's self-study document and included a comprehensive tour of current facilities, conversations with students, class visits, and faculty and administration interviews.

### Program Strengths:

Outlined below are specific commendations for the program.

- **Faculty:** Cosmetology faculty are well-skilled in traditional and modern hair style practices and exhibit professionalism in their dress and the way they interact with students and clients. Faculty have started to use Scruples training to standardize their teaching and provide students with common industry terminology. Faculty are also involved in campus leadership, serving on or assisting with various committees or campus projects. Students report a feeling of family with the faculty and fellow students. They are comfortable coming to the faculty for help with both school, work, and other concerns.
- **Curriculum:** The implementation of the MindTap program has enhanced student learning by providing dynamic access to training videos and learning tracking software. In addition, the partnership public education continues to provide "fast-track" career training to local junior and senior high school students, who can complete part of their training prior to high school graduation.
- **Salon Facility:** recent renovations are a benefit to the facility. This includes recovering current salon chairs and dedicated space for a barbering station. The nail salon is well-designed with a smaller desk used to make appointments. The leveraging of vacated building space supports program improvement with a comfortable facial room equipped with two beds.
- **Marketing:** The program's innovative approach to marketing includes a very successful Fashion Fusion Show, which has now outgrown current space capacity. The show allows students to demonstrate their overall learning and skills (like a capstone experience) while providing the community with an entertaining evening of hairstyle and fashion. Students can also exhibit their work, expertise, fill appointments, and garner new clients through a well-organized social media presence.

### Program Weaknesses/Recommendations:

1. **Faculty:** It was recommended that the program seek additional faculty and/or staff support. At least one additional part-time employee is needed or one of the current part-time positions needs to be increased to a full-time professional track position. The additional instruction/staff would allow for the lead instructor to be a full-time program administrator. This would keep more instructors on the floor with students and keep the department informed of college updates.

***Institutional Response:** Currently, the program has three licensed instructors, two of which are full-time, and one is part-time. The part-time faculty addition has supported the implementation of events like the Fashion Show and other student activities on the Richfield and Ephraim campuses. This instructor also provides theory and lab instruction on a rotating basis, which has allowed the*

*full-time instructors opportunities to participate in campus leadership and/or /professional development activities. It is anticipated that at the completion of the associate degree, this part-time instructor can be made full-time. With interest for a salon on the Ephraim campus as well as the development of an Esthetics program (Richfield), current faculty will work on a budget proposal for overall program expansion that includes the additional full-time faculty position.*

- MindTap Program Savings:** It was recommended the program investigate a combined purchase of the MindTap software for greater cost savings. Currently, software costs for the program include a two-year license for \$254.00 per student.

***Institutional Response:** Business and math students pay \$120 per semester for Cengage Unlimited, which includes general use of MindTap but does not offer access to Cosmetology/Barbering texts and/or media. Communication with the MindTap representative revealed that the Cosmetology/Barbering software is not sold in a block with other programs or by semester. It is only offered as a two-year license. The department is mindful of costs passed onto students; it is atop consideration when selecting resources.*

- Ephraim Salon:** In an effort to improve enrollment and visibility of the program, it was recommended that a space be created on the Ephraim campus to allow for a small salon to operate 2-3 days each week. This would also benefit the students that live in Sanpete county by limiting travel at least part of the time.

***Institutional Response:** The future of the Cosmetology/Barbering program looks very strong. The development of a satellite program has raised concerns for program over-saturation. However, current enrollment and interest suggest that a salon on the Ephraim campus will help the program growth. To open a campus salon, the college would need to have space available that has access to water, power and ventilation. The salon would need to be staffed by an instructor and possibly a student employee receptionist. A budget would need to be approved for equipment, supplies, and salaries. The Ephraim salon will be beneficial for both campuses. It potentially provides needed hair services and easy accessibility to the general student population, while providing cosmetology students access to a bigger, more diverse clientele. Instruction at the Ephraim salon would be lab only. The current vision is to have the salon open 2-3 days per week. Instructors and students would rotate to the salon from Richfield. A client would get the same quality haircut and the student the same instruction no matter regardless of salon location.*

- Fashion Fusion Show:** It was recommended that this capstone event be held on the Ephraim campus to enhance program visibility and increase fundraising capital. It is further recommended that additional funds be earmarked to provide better scholarships and support program recruitment.

***Institutional Response:** At this time, faculty and program leadership feel that production on the Ephraim campus is premature. The current show is still in its development. Replicating the show to Ephraim would mean models required a greater time commitment (two full days over one full day) from students, models, and support staff. In addition, many of the costs associated with the*

*production on two campuses would outweigh the current proceeds. Meanwhile, current students and faculty are willing to commit better efforts toward advertising the event to Ephraim students and the Sanpete county community.*

5. **Scholarships:** It was recommended that additional scholarship money be dedicated toward awards for continuing students. It is further recommended that faculty work with the Snow College Development office to use money earned from the fashion show to build private scholarship funds.

***Institutional Response:** Faculty understand that critical role scholarships play with high school seniors (potential students) to encourage them to continue their education and obtain their degree at Snow College. Faculty will encourage students to utilize Snow College's new option, BadgerTracks, as a concurrent enrollment-to-college scholarship opportunity. Faculty will also work with the Development office to have money awarded for a scholarship while developing and market the fashion show as a bigger community event and recruiting tool. Faculty will also work with the Development office in finding private donors that fund private Cosmetology/Barbering scholarships. This scholarship will be generated by funds from the fashion show and a fundraiser associated with the event.*

6. **Esthetics Program:** It was recommended that faculty develop a proposal for a full-service esthetics program.

***Institutional Response:** Snow College's Cosmetology/Barbering program is the only program of its kind within 100 miles in every direction. Students that complete the program and desire to continue their pathway/employment in the beauty industry must transfer to another long-distance program to complete the credentials of Master Esthetician. A Master Esthetician is licensed to work in a spa setting and/or dermatology offices. This is a growing industry and businesses such as Elevate and Cedar Dermatology have opened in the last two years in Richfield, each of which employ Master Esthetician. Faculty will develop a proposal and budget plan to include this curricular expansion to the program within the next five years.*

7. **Initial and reinforced training:** It was recommended that the curriculum provide for an initial training period or opportunities to reinforce basic training using specific class periods throughout the program.

***Institutional Response:** During 2018-2019 emphasis was placed on changes in the PSI State Board exam, for which a bi-monthly class focused on the specific techniques and requirements to pass the new exams. Faculty plan to increase class offerings from bi-monthly to weekly. The additional classes will focus on reviewing the basic techniques taught during the basic classes. When the State of Utah changed cosmetology/barbering clock hours from 2000 to 1600, basic class adjustments were made to expedite the salon time of basic students. Hands on exposure with clients is one of the best forms of training from which students receive one-on-one instructions. Adding bi-monthly basic review classes in tandem with the bi-month State Board exam prep classes will benefit students and strengthen the program.*

8. **Facial Room:** It was recommended that the chairs in the facial room be replaced.

*Institutional Response: The facial chairs will be replaced upon approval of our Perkins fund request for 2019-2020.*

9. **Continuing Education:** It was recommended that continuing education and other similar professional development activities be pursued by faculty to help solidify the standardization of industry terminology and techniques. There is an opportunity to expand this opportunity to local salon owners using Snow College's office of Community Education.

*Institutional Response: Currently, students in the basic class are taught using the Milady Standard 2016 edition (which updates every 5 years) and Scruples' Cutting by Design techniques. As they begin to move to the salon lab, they learn different advanced terms and techniques. The cosmetology/barbering industry is forever changing, and faculty/staff continue to attend applied training classes on current trends. As trends change, so does terminology. Faculty will continue to provide students with the knowledge and skills associated with the most current elements of hair and nail technology. Faculty will also improve efforts to more consistently offer classes to local stylists using Snow College's Community Education program. Where possible, these classes are offered on-line or at off-site locations and taught by program alumni.*

## Appendix A: Course Requirements specific to degree outcomes

### Cosmetology/Barbering

recommended courses for licensure

Course	Description	Credits
COSB 1000	Basic Cosmetology Theory	4
COSB 1005	Basic Cosmetology Lab	5
COSB 1015	Basic Barbering Lab	4
COSB 1100	Basic Barbering Theory	3

### Nail Technology Courses

Course	Description	Credits
COSB 1810	Theory of Nail Technology	4
COSB 1811	Nail Technology Practicum	6

## Appendix B: Services Technology Courses

### **COSB 1000 Basic Cosmetology Theory**

Semester(s) Taught: Fall, Spring, Summer

Credits, Lecture hours, Lab hours: (4:4:0)

Description: This theory course (formerly COSB 1001) presents basic cosmetology practices, demonstrations of technical procedures, practical application of cosmetology skills, and identifies the responsibilities of the cosmetologist. Critical thinking skills will also be developed. Students will demonstrate competency through written tests and skills pass-off working on mannequins. This course prepares students for working with the public in the salon lab. This course is part of a required series to prepare students to take the National Interstate Council of State Boards of Cosmetology Licensure Examination (NIC test). Students must be accepted into the Cosmetology/Barbering program to take this course. Corequisites: This course must be taken concurrently with COSB 1005, COSB 1015, COSB 1100

### **COSB 1005 Basic Cosmetology Lab**

Semester(s) Taught: Fall, Spring, Summer

Credits, Lecture hours, Lab hours: (5:0:15)

Description: This lab course with the Basic Barbering Lab course are the main lab components for the COSB 1000 series. Lab instruction and practice are an integral part of this program. Practice and lab experiences include shampooing, scalp and hair treatments, manicuring, pedicuring, artificial nails, haircutting, hairstyling, permanent waving, chemical relaxing, facials, makeup application, hair coloring, hair lightening, shaving, waxing, and hair extension applications. Corequisites: COSB 1000, COSB 1015, and COSB 1100

### **COSB 1015 Basic Barbering Lab**

Semester(s) Taught: Fall, Spring, Summer

Credits, Lecture hours, Lab hours: (4:0:12)

Description: Lab instruction and practice are an integral part of this program. This course covers practical experience with shampooing, scalp treatments, manicuring, haircutting, hairstyling, facials, massage, care and styling of hairpieces, and shaving with an emphasis on all men specific services. Corequisites: This course must be taken concurrently with COSB 1000, COSB 1005, COSB 1100

### **COSB 1100 Basic Barbering Theory**

Semester(s) Taught: Fall, Spring, Summer

Credits, Lecture hours, Lab hours: (3:3:0)

Description: This course presents barbering theory for the following subjects: history of barbering, barber implements, tools and equipment, shaving and facial design, men's styling, and haircutting. Corequisites: This course must be taken concurrently with COSB 1000, COSB 1005, and COSB 1015

### **COSB 1200 Cosmetology/Barber Sciences**

Semester(s) Taught: Fall, Spring

Credits, Lecture hours, Lab hours: (2:2:0)

Description: This course presents cosmetology/barbering theory for the following subjects: history of cosmetology, infection control, general anatomy and physiology, skin and nail structure and growth, properties of hair and scalp, and basics of chemistry. This is a block course and must be taken with COSB 1201, COSB 1205, and COSB 1215. Prerequisites: COSB 1000, COSB 1100, COSB 1005, and COSB 1015; Corequisites: COSB 1201, COSB 1205, and COSB 1215

### **COSB 1201 Cosmetology/Barber Procedures**

Semester(s) Taught: Fall, Spring

Credits, Lecture hours, Lab hours: (2:2:0)

Description: This course presents cosmetology/barbering theory for the following subjects: basics of electricity, principles of hair design, haircutting, braiding and extensions, wigs, hair coloring, skin diseases, facial makeup, and nail diseases. Prerequisites: COSB 1000, COSB 1005, COSB 1015, COSB 1100  
Corequisites: This course must be taken concurrently with COSB 1200, 1205, and 1215

### **COSB 1205 Intermediate Cosmetology Lab**

Semester(s) Taught: Fall, Spring

Credits, Lecture hours, Lab hours: (6:0:18)

Description: Lab instruction and practice are an integral part of this program. This course covers principles and practices of manicuring, pedicuring, nail diseases and disorders, massage, facials, facial makeup, skin disorders and diseases, and removal of unwanted hair by tweezing and waxing, hair extension application, shampooing, draping, finger waving, roller sets, thermal curling, braiding, hair coloring, hair lightening, chemical relaxing, care of wigs, hairstyling, permanent waving, and haircutting. This course has a service-learning component. Prerequisites: COSB 1000, COSB 1005, COSB 1015, COSB 1100; Corequisites: COSB 1200, COSB 1201, COSB 1215

### **COSB 1215 Intermediate Barbering Lab**

Semester(s) Taught: Fall, Spring

Credits, Lecture hours, Lab hours: (4:0:12)

Description: Lab instruction and practice are an integral part of this program. This lab course provides practical experience with shampooing, scalp treatment, manicuring, pedicuring, application of nail enhancements, haircutting, hairstyling, permanent waving, chemical relaxing, facials, esthetic procedures, hair extension applications, finger waving, roller sets, thermal curling, hair coloring, and hair lightening. This course has a service-learning component. This course has a \$50.00 lab fee. This fee is nonrefundable. Prerequisites: COSB 1000, COSB 1005, COSB 1015, COSB 1100; Corequisites: COSB 1200, COSB 1201, COSB 1205

### **COSB 1305 Cosmetology Practical Lab**

Semester(s) Taught: Summer

Credits, Lecture hours, Lab hours: (4:0:12)

Description: Lab instruction and practice are an integral part of this program. This course covers practical experience with shampooing, scalp treatments, manicuring, haircutting, hairstyling, chemical hair texture services, facials, massage, care and styling of hairpieces, hair coloring, hair lightening, shaving and haircutting.

### **COSB 1315 Barbering Practical Lab**

Semester(s) Taught: Summer

Credits, Lecture hours, Lab hours: (4:0:12)

Description: Lab instruction and practice are an integral part of this program. This course covers practical experience with shampooing, scalp treatments, manicuring, haircutting, hairstyling, chemical hair texture services, facials, massage, care and styling of hairpieces, haircoloring, hair lightening, shaving and haircutting, with an emphasis on all men specific services.

### **COSB 1519 Cosmetology/Barbering Lab**

Semester(s) Taught: Fall, Spring, Summer

Credits, Lecture hours, Lab hours: (1-6:0:3-15)

Description: Lab instruction and practice are an integral part of this program. This course covers principles and practices of manicuring, pedicuring, application of nail enhancements, facials, facial makeup, removal of unwanted hair by tweezing and waxing, hair extension application, shampooing, draping, finger waving, roller sets, thermal curling, braiding, hair coloring, hair lightening, chemical relaxing, care of wigs, hairstyling, permanent waving, and haircutting. Repeatable for credit. Prerequisites: With instructor approval

### **COSB 1715 Applied Technical Math Soon to be AT 1715**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:3:0)

Description: This course covers the principles of algebra and geometry as they apply to problem solving in the Career and Technical Education (CTE) division programs. It includes the quadratic equation, exponents and radicals, polynomials, constructions of geometric shapes, the circle concept, and applications of volume and shapes.

### **COSB 1810 Theory of Nail Technology**

Semester(s) Taught: Fall, Spring

Credits, Lecture hours, Lab hours: (4:4:0)

Description: This course covers principles and concepts of the nail technology profession, including: manicuring, pedicuring, sanitation, disorders and diseases of the skin and nails, body chemistry, product safety, related anatomy and physiology, methods of artificial nail applications, problem solving, professional ethics, business management, and state laws. Corequisites: COSB 1811

### **COSB 1811 Nail Technology Lab**

Semester(s) Taught: Fall, Spring

Credits, Lecture hours, Lab hours: (6:0:16)

Description: Lab instruction and practice are an integral part of this program. Practice and lab experiences include client consultation; manicuring; pedicuring; application of nail tips, wraps, and acrylic; polishing techniques; nail art; and salon management.; A \$50.00 lab fee includes; a one-time rental of a state board testing kit. This fee is non-refundable.

Corequisites: COSB 1810

### **COSB 1910 Professional Development - Course 1**

Semester(s) Taught: Fall

Credits, Lecture hours, Lab hours: (1:1:0)

Description: This course is designed to prepare the student for the job market, learning skills in time management, goal setting, ethics and professional dress. The importance of working and communicating with others, personal financial skills, community service and resume writing skills are emphasized.

### **COSB 1920 Professional Development - Course 2**

Semester(s) Taught: Spring

Credits, Lecture hours, Lab hours: (1:1:0)

Description: This course is the second in a series of courses designed to deal with employment opportunities, public speaking, job application, and employment portfolios, focusing on mentoring, job search, leadership skills and being a good salon team player.

### **COSB 2300 Principles of Cosmetology/Barbering**

Semester(s) Taught: Fall, Spring

Credits, Lecture hours, Lab hours: (2:2:0)

Description: This theory course covers in-depth principles and practices of the following subjects; ethics, history and opportunities, hygiene, bacteriology and infection control, general anatomy and physiology, skin structure and growth, ;nail structure and growth, properties of the hair and scalp, and basics of chemistry.

Prerequisites: COSB 1000, COSB 1005, COSB 1100, COSB 1015, COSB 1200, COSB 1201, COSB 1205, COSB 1215; Corequisites: COSB 2301, COSB 2305, COSB 2315

### **COSB 2301 Disciplines of Cosmetology/Barbering**

Semester(s) Taught: Fall, Spring

Credits, Lecture hours, Lab hours: (2:2:0)

Description: This theory course covers in-depth principles and practices of the following subjects: electricity, electrotherapy, light therapy, philosophy of hair design, haircutting techniques, braiding and braid extensions, wigs and hair enhancements, hair coloring, skin diseases and disorders, facial makeup, and nail diseases and disorders. Prerequisites: COSB 1000. COSB 1005, COSB 1015, COSB 1100, COSB 1200, COSB 1201, COSB 1205, COSB 1215; Corequisites: COSB 2300, COSB 2305, COSB 2315

### **COSB 2305 Advanced Cosmetology Lab**

Semester(s) Taught: Fall, Spring

Credits, Lecture hours, Lab hours: (6:0:18)

Description: Lab instruction and practice are an integral part of this program. This course provides in-depth practical experience with shampooing, scalp treatments, manicuring, haircutting, hairstyling, permanent waving, facials, massaging, esthetic procedures, hair extension applications, care and styling of wigs, hair coloring, chemical relaxing, hair lightening, retail sales, appointment booking, and phone skills.; Students perform services in a salon setting. This course has a service learning component. A \$100.00 lab fee includes; a one-time rental of a state board testing kit. This fee is non-refundable. Prerequisites: COSB 1000, COSB 1005, COSB 1015, COSB 1100, COSB 1200, COSB 1201, COSB 1205, COSB 1215  
Corequisites: COSB 2300, COSB 2301, COSB 2315

### **COSB 2315 Advanced Barbering Lab**

Semester(s) Taught: Fall, Spring

Credits, Lecture hours, Lab hours: (4:0:12)

Description: Lab instruction and practice are an integral part of this program. This course provides in-depth practical experience with shampooing, scalp treatments, manicuring, pedicuring, nail enhancements, haircutting, hairstyling, permanent waving, facials, massaging, esthetic procedures, hair extension applications, care and styling of wigs, hair coloring, chemical relaxing, hair lightening, retail sales, appointment booking, and phone skills.; Students perform services in a salon setting. The course has a service learning component. Prerequisites: COSB 1000, COSB 1005, COSB 1015, COSB 1100, COSB 1200, COSB 1201, COSB 1205, COSB 1215, Corequisites: COSB 2300, COSB 2301, COSB 2305

### **COSB 2505 Cosmetology/Barbering Capstone**

Semester(s) Taught: Fall, Spring, Summer

Credits, Lecture hours, Lab hours: (2:0:6)

Description: Lab instruction and practice are an integral part of this program. This capstone course allows students to complete the last 1-100 hours of the mandated 1600 clock hours by the State of Utah. Students are prepared to take the National Interstate Council of State Boards of Cosmetology Licensure Examination (NIC test) and apply for licensure. Prerequisites: Must have Instructor approval

### **COSB 2519 Advanced Cosmetology/Barbering Lab**

Semester(s) Taught: Fall, Spring, Summer

Credits, Lecture hours, Lab hours: (1-6:0:3-15)

Description: Lab instruction and practice are an integral part of this program. This course covers practical experience with shampooing, scalp treatments, manicuring, pedicuring, nail enhancements, haircutting, hairstyling, permanent waving, facials, massaging, esthetic procedures, hair extension applications, care and styling of wigs, hair coloring, chemical relaxing, hair lightening, retail sales, appointment booking, and phone skills. Students perform services in a salon setting. Repeatable for credit. Prerequisites: COSB 1000, COSB 1005, COSB 1015, COSB 1100, COSB 1200, COSB 1201, COSB 1205, COSB 1215

## **COSB 2709 Cosmetology/Barbering/Nail Technology Student Instructor**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (8-16:2:16)

Description: This course prepares the student for state examinations as a Cosmetology/Barbering/Nail Technology instructor. It includes experience in teaching theory and lab. The State of Utah requires 1000 hours of instruction in preparation for licensing as an instructor. The department chairperson's permission is required prior to enrolling. Students must have at least one year of work experience as a licensed cosmetologist/barber before taking this course. Instructor licensure requirements are such that a student will be required to take this course at least twice. Repeatable for credit. Prerequisites: Cosmetology/Barbering License and one year of work experience

## Appendix C: Curriculum Map and Assessment Plan

# Snow College Services Technology Curriculum Map

### Summary:

The Cosmetology/Barbering Technology program is designed to prepare students for direct employment in cosmetology, barbering salons and/or prepare them to open new salon businesses. This program includes 1600 clock time hours of instruction required by the State of Utah for licensure. Students are prepared to take the National Interstate Council of State Boards of Cosmetology/Barbering Licensure Examination required for licensure.

Students learn to communicate with customers, analyze skin, hair and nails, perform the duties of hair cutting, coloring, styling, chemical texture services, basic skin and nail services and all other services offered in a salon.

The Snow College Cosmetology/Barbering Technology program is unique. A Snow College student has the following options:

1. Earn 1600 hours for licensure purposes only.
2. Earn a Certificate of Completion in Cosmetology/Barbering Technology.
3. Earn an A.A.S. degree in Salon Business.
4. Specialize in Nail Technology.

### Outcomes:

Students who complete an AAS in Salon Business at Snow College will be expected to demonstrate that they have knowledge of/and an understanding in the following areas:

1. (COSB) Principles and practices related to cosmetology/barbering skills; i.e., shampooing, styling, men and women haircutting, straight razor shaving, hair extensions, chemical texture services, haircoloring, skin care, nail services, and other material essential to becoming a successful cosmetologist/barber.
1. (Nails) Principles and practices related to nail technology skills, i.e. manicuring, pedicuring, gel, fiberglass, and acrylic application, manual and electric filing, polishing, client consultation and other material essential to becoming a successful nail technician.
2. State of Utah rules and regulations governing Cosmetology/Barbering and/or Nail Technology.
3. General sciences, i.e., anatomy, infection control, hair structure, skin and nail diseases and disorders, chemistry and electricity.
4. Assess salon work areas and practices, recognize potential safety hazards and implement accepted methods to mitigate those hazards.
5. Writing coherent reports and document client results.
6. Assess present conditions and determine the action needed to obtain desired client outcomes based on a critical analysis of situations.
7. Work effectively both individually and with others through class projects and client services through lab experiences.
8. Communicate in electronic, verbal and written formats through records, quizzes and exams.
9. Deal professionally and ethically with clients, the public and co-workers.
10. Relevant business practices and the requirements of a successful operation commonly found in cosmetology/barbering establishments.

■ Orange boxes represent assessment for this program

**Assessment Notes:**

Assessment uses a pass/fail rubric (see attached). Utah state licensing requires a 75% pass rate on the practical and written licensing exams. This is our benchmark. Our program target is a 75% pass rate for each student. For each of the assessment measures associated with the rubric, the goal is to have 80% of all students achieve a 75% (state benchmark) or higher pass-rate.

Assessment on all practical work is done on skill pass-off sheets, on a daily, weekly and monthly basis (examples included). Practical exams are given at the conclusion of each semester.

Assessment on all theory chapters is done with an exam at the conclusion of each chapter. Mid-term and final written exams are also used for assessment.

Assessment of communication and professionalism skills (outcomes 5, 8, and 9) uses written assignments completed in the Professional Development classes and objective-judged scores from the Fashion Fusion Runway Project

# Transportation Technology Department Review Self-Study

representing courses taught in Automotive Technology and Diesel Heavy Duty Mechanics Technology

submitted to Snow College Board of Trustees and the  
Utah State Board of Regents  
Summer 2019

## Reviewed Spring Semester 2019 with the rating of recommended

- Scott Hadzik, Department Chair, Automotive Technology, Weber State University
- Kyle Rowley, Assistant Professor, Engineering, Snow College

## Department Description and Mission Statement

The Snow College Transportation Departments goal is to provide the learning opportunities and skill sets students need to be entry-level technicians in the automotive and diesel industries. The Snow College Automotive and Diesel Programs were merged into the Transportation Technology Department in 2012, since that time significant work has been done to align the curriculum, share instruction, create common course numbering, create new courses, obtain new equipment, and much more to become a cohesive multi-program department. The Snow College Automotive Technology program is accredited through the ASE Education Foundation and the Diesel Technology Program is currently involved in the accreditation process.

The professors and instructors in the Transportation Technology Department are highly educated, industry certified, and professionally trained individuals. Each instructor must complete a minimum of 20 hours of automotive or diesel related training each year to maintain our ASE Education Foundation accreditation. They provide an excellent, and difficult to achieve, balance of lecture, class time, and “hands on” lab work to provide the best experience and learning environment for our students. The instructors incorporate service learning by doing live work on vehicles for members of the local communities. Through small class sizes, high student expectations, live work, direct and personal contact with the instructors, and a high level of dedication from the faculty, our students are able to enter the automotive and diesel industries ready to work and obtain a high level of success.

## Automotive Technology Program

As one of the premier Automotive Technician Training Schools in Utah, accredited by the ASE Education Foundation, Snow College offers its' courses based on the Automotive Service Excellence (ASE) certification areas. Including:

- Electrical/Electronic Systems
- Suspension and Steering
- Brakes
- Manual Transmissions/Transaxles & Drive Trains
- Heating and Air Conditioning

- Engine Repair
- Automatic Transmissions and Transaxles
- Engine Performance

Students have two options. (1) They may obtain Certificates of Proficiency or, (2) an Associate of Applied Science degree in Automotive Technology.

The program is designed to give students an in-depth knowledge of repairing and maintaining automobiles. Students who complete the program can expect a career in a variety of automotive fields including becoming a technician, service manager, shop foreman, service consultant, a parts technician with the option of working in a dealership, an independent repair shop, or your own business.

### **Diesel Heavy Duty Mechanics Technology Program**

As one of the premier Diesel and Heavy-Duty Technician Training Schools in Utah, Snow College offers its courses based on the Automotive Service Excellence (ASE) certification areas. Including:

- Electrical/Electronic Systems
- Suspension and Steering
- Brakes
- Transmissions and Drive Trains
- Heating and Air Conditioning
- Engine Repair
- Preventative Maintenance
- Hydraulics
- Fuel Systems
- Emissions Systems

Students have two options. (1) They may obtain Certificates of Proficiency or, (2) an Associate of Applied Science degree in Diesel Technology.

Diesel technicians have a wide variety of opportunities to apply their trade. With so many heavy-duty machines powered by Diesel, the field for this expertise is vast. After completing the Diesel and Heavy-Duty Mechanics program, students can expect rewarding careers as Diesel technicians in light duty and heavy-duty trucking, mining equipment, off highway equipment, excavating machinery, construction equipment, trains, ships, etc. With the right training and credentials, you have countless opportunities ahead of you for a worthwhile job.

**Curriculum:** Please see Appendix A for a descriptive list of degrees and course requirements. Appendix B offers a comprehensive list of all currently taught courses. Appendix C presents a map of courses to program student learning outcomes.

## Student Learning Outcomes

### *Automotive Technology*

Students who complete an AAS degree or specific courses in any or all of the eight ASE areas in Automotive Technology at Snow College will be expected to demonstrate that they,

1. Students will complete lab tasks outlined by the Automotive Service Excellence Education Foundation (ASEED). They will complete 100% of priority one, 80% of priority two, and 60% of priority three tasks.
2. Students will learn the operation, function, diagnosis, and repair of internal combustion engines and their related fuel, ignition, and emissions systems.
3. Students will learn electrical theory including, the operation and function of electrical circuits, electrical components, and the diagnosis and repair of these circuits.
4. Students will learn the operation, function, diagnosis, and repair of components used in the drivetrain of automobiles, i.e.: transmissions, transaxles, transfer cases, differentials, etc.
5. Students will learn the operation, function, diagnosis, and repair of components used in the suspension and braking systems of automobiles.
6. Students will learn the operation, function, diagnosis, and repair of components used in the heating and air conditioning systems found in automobiles.
7. Upon graduation students will be prepared to take ASE certification tests to assist them in gaining quality employment in their desired field.

### *Diesel Heavy-Duty Mechanics Technology*

Students who complete an AAS degree in Diesel & Heavy-Duty Mechanics Technology will be expected to demonstrate that they

1. Students will complete lab tasks outlined by the Automotive Service Excellence Education Foundation (ASEED). They will complete 100% of priority one, 80% of priority two, and 60% of priority three tasks.
2. Students will learn the operation, function, diagnosis, and repair of internal combustion engines and their related fuel, and emissions systems.
3. Students will learn electrical theory including, the operation and function of electrical circuits, electrical components, and the diagnosis and repair of these circuits.
4. Students will learn the operation, function, diagnosis, and repair of components used in the drivetrain of trucks and heavy-duty equipment, i.e. transmissions, transaxles, transfer cases, differentials, etc.
5. Students will learn the operation, function, diagnosis, and repair of components used in the suspension and braking systems of trucks and heavy-duty equipment.
6. Students will learn the operation, function, diagnosis, and repair of components used in the heating and air conditioning systems found in trucks and heavy-duty equipment.
7. Upon graduation students will be prepared to take ASE certification tests to assist them in gaining quality employment in their desired field.

### Academic Advising

The general advising of students attending Snow College is conducted through the Student Success Center. The Center employs many advisors who are trained to help with schedules, consult about major and career options, and find financial aid resources to pay for school. The department chair and faculty members also meet with the students to discuss their current academic and/or performance needs as well as their future goals to set up an appropriate course of study.

### Faculty

- Brent Reese, Department Chair, Associate Professor  
 Associate of Science, Merced Community College  
 Bachelor of Science, Technology Education - Southern Utah University  
 ASE Master Automobile Technician, L1 Advanced Engine Performance Certification
- Robert Gary, Diesel Program Chair, Instructor  
 Associate of Applied Science, Dixie State College  
 ASE Master Automobile Technician, Graduate, General Motors University of Automotive Management
- Justin Morgan, Instructor  
 Associates of Science, Snow College  
 Bachelor of Science, Technology Education, Valley City State University

## Advisory Committees

### Automotive Technology

Name	Company	Title
Cassidy Schear	Fixed Operations Manager	High Country Auto
Jacob Christensen	Technician, High Country Auto	former student
Nathan Polelonema	Fixed Operations Manager	Jorgensen Ford
Jay Moosman	Technician	Jorgensen Ford
Kyle Musselman	Technician	Jorgensen Ford, former student
Jim Hare	Owner Operator	Red Hills Truck and Auto
Gary Brian	Owner Operator	Brian Auto
Wayne Connelly	Service Manager	Freedom Ford
Ben Schoppe	Ag. Instructor	Manti HS
Jennifer Christensen	CTE Director	Central Utah

### Diesel and Heavy-Duty Mechanics Technology

Name	Company	Title
Beth Miya	Cummins Sales and Service-SLC	Technical Support Manager
Brent Moosman	Warner Truck- Freightliner	Service Manager in Salina
Ben Romney	Wheeler Machinery-SLC	Vice Pres. Product Support
Ronald Dimmick	Cummins Sales and Service-SLC	Dealer Account Executive
Dave VanDyke	Kenworth Sales and Service	Service Manager-Salina
Delton Koehn	Staker Parsons	Shop Manager-Redmond
Dustin Shakespear	Sevier County School District	Counselor
Jennifer Christensen	Sevier County School District	CTE Director
Josh Mejeur	Eaton Powertrain	Western Region Manager
Heidi Stringham	Snow College	Asst. to the President
Josh Allan	Jackson Group- Peterbilt	Service Manager- Salina
Kelly Crofts	Barney Trucking	HR Director
Kent Mickelsen	Wheeler Machinery	Product Support Manager
LaFaun Barnhurst	Snow College	BAT Division Dean
Malcolm Nash	Six County Economic Dev.	Director
Troy Fulmer	Meritor Heavy Vehicle Systems	District Manager
Michael Medley	Snow College	CTE Director
Chris Thatcher	Barney Trucking	Technician

### Program Assessment

The Automotive and Diesel programs base their assessment on the ASE Education Foundation required task lists for each subject area. All students are required to complete certain percentages of these tasks and the completion of these tasks verifies that the learning outcomes are met. The results are reviewed each Spring and when low completions are noted the instructors revise the curriculum to improve the

learning opportunities and understanding for the students. Results of these assessments are on file with the department chair and with the institutional research office.

Students will be assessed by passing the ASE Student Certification tests. These tests are similar to the full ASE certification tests, but designed specifically for students enrolled in technical training programs. The results will be collected on the ASE website, [www.na3sa.org](http://www.na3sa.org).

In accordance with Utah State Board of Regent's policy R411 on the periodic review of educational programs, an on-site visit of Snow College's Automotive Technology and Diesel and Heavy-Duty Mechanics program was conducted Spring Semester 2019. This visit was preceded by a careful reading of the program's self-study document and included a comprehensive tour of current facilities, conversations with students, class visits, and faculty and administration interviews.

## Automotive Technology

### Program Strengths:

- **Student Experience:** In general, students are very pleased with the curriculum, instruction, and facilities associated with instruction. Students commended the organization and clarity of the brakes-systems lab book. They felt that the book was laid out in such a way that they could easily find the appropriate tasks and associated worksheets for each lab activity. Students would like to see more consistency in the other lab books. Students mentioned the value they found in the textbook requirements for the program. They were pleased with the price and quality of the Cengage content.
- **Workforce Preparation:** Students commended the organization of the shop and the availability of tools and equipment. The shop equipment is in good repair and well maintained. They felt like the quantity and quality of tools available to them was appropriate. They requested more generic scan tools and work done to maintain and update the factory specific tools. Students, generally, seemed to have a good understanding of the various automotive subject areas. Students seemed confident in all areas covered by NATEF MLR standards. Electrical and Electronic systems seemed to be their weakest area, specifically CAN and other types of bus communication. A weakness in electrical and electronic systems corresponds to national trends in automotive education.

## Diesel and Heavy-Duty Mechanics Technology

### Program Strengths:

- **Student Experience:** Students are pleased with their education, interaction with faculty, and the facilities. Students seemed to benefit from the incorporation of automotive courses in the areas that have similar systems to Heavy Duty. Several students suggested adding curriculum that focused on equipment repair; such as agricultural or construction equipment. If feasible adding additional content or partnering with the agricultural mechanic program is recommended in order to expose those students who are interested in equipment repair.

- **Workforce Preparation:** Students feel prepared to enter the workforce with the skills they have developed during their educational experience. Students, generally, seemed to have a good understanding of the various diesel subject areas. More emissions related equipment should continue to be incorporated into the curriculum as the equipment becomes available. The recent purchase of the truck with modern emissions is commendable. Funding should be prioritized to repairing the current Heavy-Duty Truck dynamometer. This piece of equipment would help students to understand diagnostics under load as well as emissions related content.
- **Program Leadership:** Adding Bob Gary as program chair has improved equipment procurement and standards for course content.

### Program Recommendations:

1. **Lab Workbooks:** It was recommended that lab workbooks be updated to more closely model those found in the automotive technology program.

*Institutional Response: This has been discussed and the preferred lab books reviewed by the instructors, we will be soliciting student input to make the most effective and useful updates for the needed classes. This will be implemented and adopted for the Fall 2019 semester.*

2. **NATEF Certification:** It was recommended that the program continue to add NATEF related tasks and lab activities to the curriculum.

*Institutional Response: We use the basic ASE Education Foundation task lists and add to them based on input from the advisory committee. Due to a lack of appropriate material in the areas of computerized fuel systems and emissions control systems we have created two additional classes for the Diesel Technology AAS degree, DMT 1801/1805 Fuel Systems and DMT 2801/2805 Emissions Control Systems. These classes offer extend information and lab tasks above and beyond the basic ASE Accreditation requirements.*

3. **Dynamometer:** It was recommended that the program find funding to purchase a dynamometer, which will help students understand diagnostics under load as well as emissions-related content.

*Institutional Response: We have requested funding from the college, from Perkins grants, and are working on the possibility of obtaining other forms of grant money.*

4. **Electrical and Electronic Systems Instruction:** It was recommended that faculty find ways to incorporate electrical system content in all courses, including making curricular adjustments to increase the amount of time students spend working on electrical and electronic systems.

*Institutional Response: We currently cover the operation and diagnostics of electrical and electronic systems relevant to the area studied in, Auto 1601/1605, 2601/2605, 1801/1805, 2801/2805, 1201/1205, 1501/1505, 1401/1405, DMT 1801/1805, 2801/2805, 1501/1505,*

1301/1305, and 2701/2705. As vehicles become increasingly more automated and computerized, the need for students to understand the operation and diagnosis of electronic systems becomes important. The ways faculty determine additions to the curriculum needs include, specialized instructor training, adoption and use of current texts, updated ASE Education Foundation task lists, and input from the advisory committees. We add these new electrical and electronics components to the curriculum each time the relevant course is taught.

5. **Diesel Emissions Content:** It was recommended that faculty continue to add content related to modern diesel emission systems, including system identification, operation, and diagnostics.

***Institutional Response:** Due to a lack of appropriate material in the areas of computerized fuel systems and emissions control systems we have created two additional classes for the Diesel Technology AAS degree, DMT 1801/1805 Fuel Systems and DMT 2801/2805 Emissions Control Systems. These classes offer extend information and lab tasks above and beyond the basic ASE Accreditation requirements. We continue to add curriculum and content to these courses based on instructor training and industry needs.*

6. **Faculty Contact Hours:** It was recommended that faculty and associated academic leadership review the amount of contact hours faculty spend with students each week. This may require adjustments to faculty load to no exceed the contact hours associated with other state programs.

***Institutional Response:** No response was provided.*

7. **Industry Certifications:** It was recommended that Justin Morgan receive relevant industry certifications. This should be a program priority.

***Institutional Response:** Justin has recently completed training from Osh-Kosh and from Cat and is currently looking for additional training in engines and hydraulics in preparation for the Fall 2019 semester. We have reached agreements with several manufacturers to offer their online training, (i.e. Peterbilt, Cummins, Freightliner, etc.) that can be used by instructors and students.*

8. **Course Development:** It was recommended that a course be developed focused on body communication and computer-controlled systems, moving the electronics content from AUTO 1660 into this new course.

***Institutional Response:** The restructure of Auto 1600 will help this. Body communication and computer-controlled systems are heavily covered in Auto 2601/2605, Auto 2801/2805, and DMT 1801/1805. The faculty do not feel that a new course is justified to cover this information; however, we plan to review the content and possibly add to it where we deem it needed.*

9. **Engine Repair:** It was recommended that Engine Repair be reorganized to free up credits hours for advance electrical instruction. It was further recommended that the course be removed from the required credits for the AAS degree.

*Institutional Response:* We discussed reducing the credit hour requirements for this class in the past and we are planning on pursuing it next school year. We are going to complete many of tasks as a "group unit" instead of each student individually completing each task. This will reduce the lab time required yet still introduce the students to the content and fulfill the required accreditation tasks. ASE Education Foundation accreditation still requires content and tasks for automotive engine repair, and after recent conversations with them, they do not plan on removing it soon. If it is required for accreditation the faculty agree that it should remain a requirement for the AAS degree and a core course for the Automotive program.

10. **Student Learning Outcomes Assessment:** It was recommended that faculty use ASE Entry Level Certification tests in a pre-test/post-test format to determine student learning outcome achievement.

*Institutional Response:* In our current outcome assessments, we already use the ASE Entry Level tests in both the Automotive and Diesel programs. Each Spring the college pays for the students to take the ASE Entry Level tests for the courses they completed that school year. We use the results in our outcome assessment and for Perkins Grant funding third party testing justifications.

11. **Division Organization:** It was recommended that the division re-align programs, adding computer science and engineering under an Applied Technology division. Such organization would put the division in closer alignment with the other in-state institutions.

*Institutional Response:* This is up to administration; however, it is heavily supported by the faculty in all the skilled trades programs. Our first choice would be the creation of a separate skilled trades division, but the other options could be worked out as well.

## Appendix A: Course Requirements specific to degree outcomes

### Automotive Technology

Students may obtain an Associate of Applied Science in Diesel and Heavy-Duty Mechanics Technology or obtain certificates of proficiency in the following areas.

- Engine Performance
- Engines and Hydraulics
- Chassis and Electrical Systems
- Drivetrain and Climate Control

Course	Description	Credits
AUTO 1000	Automotive Safety and Basics	1
AUTO 1101	Auto Engine Repair Lecture	2
AUTO 1105	Auto Engine Repair Lab	3
AUTO 1201	Auto Automatic Trans. & Transaxles Lecture	2
AUTO 1205	Auto Automatic Trans. & Transaxles Lab	3
AUTO 1301	Auto Manual Trans. & Transaxles Lecture	2
AUTO 1305	Auto Manual Trans. & Transaxles Lab	3
AUTO 1401	Auto Suspension & Steering Lecture	2
AUTO 1405	Auto Suspension & Steering Lab	3
AUTO 1501	Auto Brakes Lecture	2
AUTO 1505	Auto Brakes Lab	3
AUTO 1600	Auto Electrical & Electronics I	5
AUTO 1715	Applied Technical Math	3
AUTO 1801	Auto Fuel, Emissions, & Ignition Systems Lecture	3
AUTO 1805	Auto Fuel, Emissions, & Ignition Systems Lab	2
AUTO 1930	Leadership & Professional Development-Course 1	1
AUTO 2601	Auto Electrical & Electronics II Lecture	4
AUTO 2605	Auto Electrical & Electronics II Lab	2
AUTO 2701	Auto Heating and Air Conditioning Lecture	2
AUTO 2705	Auto Heating and Air Conditioning Lab	2
AUTO 2801	Auto Engine Performance Lecture	3
AUTO 2805	Auto Engine Performance Lab	2
AUTO 2930	Leadership & Professional Development-Course 2	1

## Diesel and Heavy-Duty Mechanics Technology

Students may obtain an Associate of Applied Science in Diesel and Heavy-Duty Mechanics Technology or obtain certificates of proficiency in the following areas.

- Engine Performance
- Engines and Hydraulics
- Chassis and Electrical Systems
- Drivetrain and Climate Control

Course	Description	Credits
DMT 1000	Safety and Basics	1
DMT 1101	Diesel Engine Repair & Overhaul Lecture	2
DMT 1105	Diesel Engine Repair & Overhaul Lab	3
DMT 1301	Transmissions & Drivetrains Lecture	3
DMT 1305	Transmissions & Drivetrains Lab	3
DMT 1401	Steering & Suspension Lecture	2
DMT 1405	Steering & Suspension Lab	2
DMT 1501	Brakes Lecture	2
DMT 1505	Brakes Lab	2

## Appendix B: Transportation Technology Courses

### **AUTO 1000 Automotive Safety and Basics**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (1:1:1)

Description: This course provides proper knowledge of practices in safety to help establish working habits that would reflect industry standards and result in a safe working environment.

### **AUTO 1001 Automotive Technology I**

Semester(s) Taught: Fall

Credits, Lecture hours, Lab hours: (5:5:0)

Description: This course covers careers in the Automotive Industry, ASE Certification, tools, fuels and fuel systems, lubrication systems, engines, engine classification, displacement, cooling systems, belts, intake, and exhaust systems.

### **AUTO 1002 Automotive Technology II**

Semester(s) Taught: Spring

Credits, Lecture hours, Lab hours: (5:5:0)

Description: This course covers the principles of suspension and steering, wheels and tires, electrical systems, starting systems, charging systems, lighting and wiring, and ignition systems.

### **AUTO 1039 Automotive Technology III**

Semester(s) Taught: Fall, Spring,

Credits, Lecture hours, Lab hours: (2:0:4)

Description: This course helps students understand and use work orders, calculate labor amounts, parts, and flat rate charges. Students shall also gain experience doing a variety of automotive repairs. This course may be repeated for a maximum of six credits.

### **AUTO 1101 Automotive Engine Repair**

Semester(s) Taught: Fall

Credits, Lecture hours, Lab hours: (2:2:0)

Description: This course covers the construction and operational principles of basic gasoline engine systems and major overhaul of the complete automotive engine. Corequisites: AUTO 1105

### **AUTO 1105 Automotive Engine Repair Lab**

Semester(s) Taught: Fall

Credits, Lecture hours, Lab hours: (3:0:3)

Description: This course gives students the hands-on lab experience required for Auto 1101. It covers the construction and operational principles of basic gasoline engine systems and major overhaul of the complete automotive engine. Corequisites: AUTO 1101

### **AUTO 1201 Automotive Automatic Transmissions and Transaxles (formerly AUTO 1200)**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (2:2:0)

Description: This course covers theory, operation, diagnosis, and overhaul procedures of automotive automatic transmissions and trans-axles, including planetary gearing, valve bodies, computerized transmission controls, and torque converter lock-up. Corequisite: This lecture AUTO 1201 must be taken concurrently with the lab AUTO 1205.

### **AUTO 1205 Automotive Automatic Transmissions and Transaxles Lab (formerly AUTO 1200)**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:0:9)

Description: This course gives students the hands-on lab experience required for AUTO 1201. This course covers theory, operation, diagnosis, and overhaul procedures of automotive automatic transmissions and trans-axles, including planetary gearing, valve bodies, computerized transmission controls, and torque converter lock-up.

Corequisite: This lab AUTO 1205 must be taken concurrently with the lecture AUTO 1201.

### **AUTO 1301 Automotive Manual Transmissions/Power Trains**

Semester(s) Taught: Fall

Credits, Lecture hours, Lab hours: (2:2:0)

Description: This course covers theory, operation, diagnosis, maintenance, and overhaul of the clutch, standard transmission, standard trans-axles, drive lines, differentials, front-wheel drive units, and four-wheel drive components. Corequisites: AUTO 1305

### **AUTO 1305 Automotive Manual Transmissions/Power Trains**

Semester(s) Taught: Fall

Credits, Lecture hours, Lab hours: (3:0:9)

Description: This course gives students the hands-on lab experience required for Auto 1301. It covers theory, operation, diagnosis, maintenance, and overhaul of the clutch, standard transmission, standard trans-axles, drive lines, differentials, front wheel drive units, and four-wheel drive components. Corequisites: AUTO 1301

### **AUTO 1401 Automotive Suspension and Steering (formerly AUTO 1400)**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (2:2:0)

Description: This course covers repair and adjustment suspension and steering systems. Students study steering gears, rack and pinion, conventional and McPherson struts, alignment angles, and alignment with a computerized four-wheel alignment fixture. Corequisite: This lecture AUTO 1401 must be taken concurrently with the lab AUTO 1405.

### **AUTO 1405 Automotive Suspension and Steering Lab (formerly AUTO 1400)**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:0:9)

Description: This course gives students the hands-on lab experience for AUTO 1401. This course covers repair and adjustment suspension and steering systems. Students study steering gears, rack and pinion, conventional and McPherson struts, alignment angles, and alignment with a computerized four-wheel alignment fixture. Corequisite: This lab AUTO 1405 must be taken concurrently with the lecture AUTO 1401.

### **AUTO 1501 Automotive Brakes (formerly AUTO 1500)**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (2:2:0)

Description: This course covers principles, repair, and adjustment of the automotive brake system and includes hydraulic theory, diagnosis, and service of brake systems. Students study drums, disks, power units, and Antilock Braking System (ABS) brakes. Corequisite: This lecture AUTO 1501 must be taken concurrently with the lab AUTO 1505.

### **AUTO 1505 Automotive Brakes Lab (formerly AUTO 1500)**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:0:9)

Description: This course gives students the hands-on lab experience for AUTO 1501. This course covers principles, repair, and adjustment of the automotive brake system and includes hydraulic theory, diagnosis, and service of brake systems. Students study drums, disks, power units, and Antilock Braking System (ABS) brakes. Corequisite: The lab AUTO 1505 must be taken concurrently with the lecture AUTO 1501.

### **AUTO 1509 Hot Rod and Performance Vehicles**

Semester(s) Taught: Fall, Spring

Credits, Lecture hours, Lab hours: (2:1:3)

Description: This course will teach students the theory and skills required to build and modify engines, drive-trains, suspensions, and vehicles for increased performance and personal taste. This course is repeatable for credit.

### **AUTO 1600 Automotive Electrical and Electronics I**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (5:5:3)

Description: This course covers the principles and laws that govern electrical circuits, including Ohm's and Kirchhoff's Laws. Student will also gain understanding of the use of meters, wiring diagrams, wiring repair, conductors, semiconductors, PN junctions, diodes, transistors, multiplexing, computers, and sensors.

### **AUTO 1715 Applied Technical Math**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:3:0)

Description: This course covers the principles of algebra and geometry as they apply to problem solving in the Business and Applied Technologies (BAT) division programs. It includes the quadratic equation, exponents and radicals, polynomials, constructions of geometric shapes, the circle concept, and applications of volume and shapes.

### **AUTO 1801 Automotive Fuel, Emissions, and Ignition Systems (formerly AUTO 1800)**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:3:0)

Description: Students will understand the theory, operation, diagnosis, and repair of fuel, emission control systems, and ignition systems. Corequisite: The lecture AUTO 1801 must be taken concurrently with the lab AUTO 1805.

**AUTO 1805 Automotive Fuel, Emissions, and Ignition Systems Lab (formerly AUTO 1800)**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (2:0:6)

Description: This course gives students the hands-on lab experience required for Auto 1801. Students will understand the theory, operation, diagnosis, and repair of fuel, emission control systems, and ignition systems.

Corequisite: The lab AUTO 1805 must be taken concurrently with the lecture AUTO 1801.

**AUTO 1930 Leadership & Professional Development - Course 1**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (1:1:0)

Description: This is the first course in a series of two courses which will help students gain and improve workplace and interpersonal skills. Professional stewardship, management, and leadership are the foundational topics. Students taking this course will also have the opportunity to participate in the SkillsUSA career and professional leadership organization.

**AUTO 2601 Automotive Electrical and Electronics II (formerly AUTO 2600)**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (4:4:0)

Description: This course covers the theory, operation, and diagnosis of automotive batteries, starting systems, charging systems, lighting systems, instrumentation, and automotive accessories.

Corequisite: The lecture AUTO 2601 must be taken concurrently with the lab AUTO 2605.

**AUTO 2605 Automotive Electrical and Electronics II Lab (formerly AUTO 2600)**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (2:0:4)

Description: This course gives students the hands-on lab experience required for AUTO 2601. It covers theory, operation, and diagnosis of automotive batteries, starting systems, charging systems, lighting systems, instrumentation, and automotive accessories. Corequisite: The lab AUTO 2605 must be taken concurrently with the lecture AUTO 2601.

**AUTO 2701 Automotive Heating and Air Conditioning (formerly AUTO 2700)**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (2:2:0)

Description: Students will cover the principles, operation, and servicing of automotive air conditioning and heating systems and their components. Corequisite: The lecture AUTO 2701 must be taken concurrently with the lab AUTO 2705.

**AUTO 2705 Automotive Heating and Air Conditioning Lab (formerly AUTO 2700)**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (2:0:5)

Description: This course gives students the hands-on lab experience required for AUTO 2701. Students will cover the principles, operation, and servicing of automotive air conditioning and heating systems and their components. Corequisite: The lab AUTO 2705 must be taken concurrently with the lecture AUTO 2701.

### **AUTO 2801 Automotive Engine Performance (formerly AUTO 2800)**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:3:0)

Description: Students will cover diagnosis, adjustment, and repair of the systems which affects engine performance. Emphasis will be placed on computerized engine control systems of various makes. Use of diagnostic equipment is emphasized. Corequisite: The lecture AUTO 2801 must be taken concurrently with the lab AUTO 2805.

### **AUTO 2805 Automotive Engine Performance Lab (formerly AUTO 2800)**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (2:0:6)

Description: This course gives students the hands-on lab experience required for Auto 2801. Students will cover diagnosis, adjustment, and repair of the systems which affects engine performance. Emphasis will be placed on computerized engine control systems of various makes. Use of diagnostic equipment is emphasized. Corequisite: The lab AUTO 2805 must be taken concurrently with the lecture AUTO 2801.

### **AUTO 2930 Leadership & Professional Development - Course 2**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (1:1:0)

Description: This is the second course in a series of two courses which will help students gain and improve workplace and interpersonal skills. Professional stewardship, management, and leadership are the foundational topics. Students taking this course will also have the opportunity to participate in the SkillsUSA career and professional leadership organization.

### **AUTO 2990 Shop Practicum I**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (1-6:0:2-12)

Description: This course provides supervised work experience at a sponsoring dealership or repair garage which applies directly to previous automotive courses. Proof of employment and approval by faculty supervisor is required.

### **AUTO 2991 Shop Practicum II**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (1-6:0:2-12)

Description: This course provides supervised work experience at a sponsoring dealership or repair garage which applies directly to previous automotive courses. Proof of employment and approval by faculty supervisor is required.

### **DMT 1000 Diesel Safety and Basics**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (1:1:1)

Description: This course provides proper knowledge of practices in safety to help establish working habits that would reflect industry standards and result in a safe working environment.

### **DMT 1001 Intro to Diesel Technology I**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (5:4:2)

Description: This course covers careers in the Diesel and Transportation Industry, ASE Certification, fasteners, tools, preventative maintenance, lubrication systems, engines, and fuel systems.

### **DMT 1002 Intro to Diesel Technology II**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (5:4:2)

Description: This course covers electricity and electrical systems, batteries, starting systems, charging systems, steering and suspension systems, brakes, wheels, and tires.

### **DMT 1101 Diesel Engine Repair and Overhaul**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (2:2:0)

Description: This course will instruct heavy duty mechanics technology students on the basic operation, parts, and overhaul procedures of diesel engines. The course provides theory of four-stroke diesel engines, their design, structure, operation, maintenance, repair, and overhaul. Students will receive detailed instruction on engine lubrication, air, cooling, and exhaust systems. Corequisite: This lecture DMT 1101 must be taken concurrently with the lab DMT 1105.

### **DMT 1105 Diesel Engine Repair and Overhaul Lab**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:0:9)

Description: This course gives students the hands-on lab experience for DMT 1101. This course will instruct heavy duty mechanics technology students on the basic operation, parts, and overhaul procedures of diesel engines. The course provides theory on four-stroke diesel engines, their design, structure, operation, maintenance, repair, and overhaul. Students will receive detailed instruction on engine lubrication, air, cooling, and exhaust systems. Corequisite: This lab DMT 1105 must be taken concurrently with the lecture DMT 1101.

### **DMT 1301 Transmissions and Drivetrains**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:3:0)

Description: This course provides instruction on theory and operation of torque converters, powershift, automatic transmissions, manual transmissions, double and triple countershaft transmissions, differentials, clutches, transfer cases, axles, drivetrain components, drivelines, and electronic control devices. This course emphasizes troubleshooting, repair procedures, use of service manuals, and schematic diagrams. Corequisite: This lecture DMT 1301 must be taken concurrently with the lab DMT 1305.

### **DMT 1305 Transmissions and Drivetrains Lab**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:0:9)

Description: This course gives students the hands-on lab experience for DMT 1301. This course provides instruction on theory and operation of torque converters, powershift, automatic transmissions, manual transmissions, double and triple countershaft transmissions, differentials, clutches, transfer cases, axles, drivetrain components, drivelines, and electronic control devices. This course emphasizes troubleshooting, repair procedures, use of service manuals, and schematic diagrams. Corequisite: This lab DMT 1305 must be taken concurrently with the lecture DMT 1301.

### **DMT 1401 Diesel Suspension and Steering**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (2:2:0)

Description: This course covers repair and adjustment suspension and steering systems. Students study steering gears, rack and pinion, conventional and McPherson struts, alignment angles, and alignment with a computerized four-wheel alignment fixture. Corequisite: This lecture DMT 1401 must be taken concurrently with the lab DMT 1405.

### **DMT 1405 Diesel Suspension and Steering Lab**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (2:0:6)

Description: This course gives students the hands-on lab experience for DMT 1401. This course covers repair and adjustment suspension and steering systems. Students study steering gears, rack and pinion, conventional and McPherson struts, alignment angles, and alignment with a computerized four-wheel alignment fixture. This lab DMT 1405 must be taken concurrently with the lecture DMT 1401.

Corequisites: DMT 1401

### **DMT 1501 Diesel Brakes**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (2:2:0)

Description: This course covers principles, repair, and adjustment of the diesel truck and trailer brake systems and includes hydraulic theory, air brake theory, diagnosis, and service of brake systems. Students study drums, disks, power units, and Antilock Braking System (ABS) brakes. Corequisite: This lecture DMT 1501 must be taken concurrently with the lab DMT 1505.

### **DMT 1505 Diesel Brakes Lab**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (2:0:6)

Description: This course gives students the hands-on lab experience for DMT 1501. This course covers principles, repair, and adjustment of the diesel truck and trailer brake systems and includes hydraulic theory, air brake theory, diagnosis, and service of brake systems. Students study drums, disks, power units, and Antilock Braking System (ABS) brakes. The lab DMT 1505 must be taken concurrently with the lecture DMT 1501. Corequisites: DMT 1501

### **DMT 1600 Diesel Electrical and Electronics I**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (5:5:3)

Description: This course covers the principles and laws that govern electrical circuits, including Ohm's and Kirchhoff's Laws. Student will also gain understanding of the use of meters, wiring diagrams, wiring repair, conductors, semiconductors, PN junctions, diodes, transistors, multiplexing, computers, and sensors.

### **DMT 1715 Applied Technical Math**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (3:3:0)

Description: This course covers the principles of algebra and geometry as they apply to problem solving in the Business and Applied Technologies (BAT) division programs. It includes the quadratic equation, exponents and radicals, polynomials, constructions of geometric shapes, the circle concept, and applications of volume and shapes.

### **DMT 1801 Computerized Engine Controls and Fuel Systems**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (2:2:0)

Description: This course provides experience on computerized engine diagnostics. Time will be spent on engine performance factors, scan tools, input sensors, computer outputs, etc. It will also cover maintenance, tune up, diagnostic procedures, and repair on electronics, hydraulic electric unit injection (HUEI), Bosch in-line, common rail, and mechanical fuel systems. Corequisite: The lecture DMT 1801 must be taken concurrently with the lab DMT 1805.

### **DMT 1805 Computerized Engine Controls and Fuel Systems Lab**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (2:0:6)

Description: This course gives students the hands-on lab experience for DMT 1801. This course provides experience on computerized engine diagnostics. Time will be spent on engine performance factors, scan tools, input sensors, computer outputs, etc. It will also cover maintenance, tune up, diagnostic procedures and repair on electronics, hydraulic electric unit injection (HUEI), Bosch in-line, common rail, and mechanical fuel systems. Corequisite: The lab DMT 1805 must be taken concurrently with the lecture DMT 1801.

### **DMT 1930 Leadership & Professional Development - Course 1**

### **DMT 2930 Leadership & Professional Development - Course 2**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (1:1:0)

Description: This is the first course in a series of two courses which will help students gain and improve workplace and interpersonal skills. Professional stewardship, management, and leadership are the foundational topics. Students taking this course will also have the opportunity to participate in the SkillsUSA career and professional leadership organization.

### **DMT 1999 Cooperative Education Experience**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (1:0:2)

Description: This course provides an opportunity for students to apply knowledge and techniques learned in the classroom to actual job experience. Classroom instruction must precede the job experience or the student must be registered for courses at the same time the student is enrolled in the work experience.

Prerequisites: Instructor approval required.

### **DMT 2311 Hydraulics and Pneumatics**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (2:2:0)

Description: This course covers theory, formulas, design, maintenance, and repair of hydraulic and pneumatic operated systems, including rams, pistons, apply devices, motors, etc. Corequisites: DMT 2315

### **DMT 2315 Hydraulics and Pneumatics Lab**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (2:0:6)

Description: This course covers theory, formulas, design, maintenance, and repair of hydraulic and pneumatic operated systems, including rams, pistons, apply devices, motors, etc. Co-requisite: The lab DMT 2315 must be taken concurrently with the lecture DMT 2311. Corequisites: DMT 2311

### **DMT 2601 Diesel Electrical and Electronics II**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (4:4:0)

Description: This course covers the theory, operation, and diagnosis of diesel batteries, starting systems, charging systems, lighting systems, instrumentation, and diesel accessories. Corequisite: The lecture DMT 2601 must be taken concurrently with the lab DMT 2605.

### **DMT 2605 Diesel Electrical and Electronics II Lab**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (2:0:4)

Description: This course gives students the hands-on lab experience required for DMT 2601. It covers theory, operation, and diagnosis of diesel batteries, starting systems, charging systems, lighting systems, instrumentation, and diesel accessories. Corequisite: The lab DMT 2605 must be taken concurrently with the lecture DMT 2601.

### **DMT 2701 Diesel Heating and Air Conditioning**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (2:2:0)

Description: Students will cover the principles, operation, and servicing of automotive, diesel, and transportation; air conditioning and heating systems and their components. Corequisite: The lecture DMT 2701 must be taken concurrently with the lab DMT 2705.

### **DMT 2705 Diesel Heating and Air Conditioning Lab**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (2:0:5)

Description: This course gives students the hands-on lab experience required for DMT 2701. Students will cover the principles, operation, and servicing of automotive air conditioning and heating systems and their components. Corequisite: The lab DMT 2705 must be taken concurrently with the lecture DMT 2701.

### **DMT 2801 Emissions and Emissions Control Devices**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (2:2:0)

Description: This course teaches diesel systems that control/regulate the engine's output emissions, emission controls, maintenance procedures, repair, diagnosis, and safety. Students will be taught the emission standards and regulations of the federal government and administered by organizations such as the Environmental Protection Agency (EPA) and Mine Safety and Health Administration (MSHA). Co-requisite: The lecture DMT 2801 must be taken concurrently with the lab DMT 2805. Corequisites: DMT 2805

### **DMT 2805 Emissions and Emissions Control Devices Lab**

Semester(s) Taught: TBA

Credits, Lecture hours, Lab hours: (2:0:6)

Description: This course gives students the hands-on lab experience for DMT 2801. This course teaches diesel systems that control/regulate the engine's output emissions, emission controls, maintenance procedures, repair, diagnosis, and safety. Students will be taught the emission standards and regulations of the federal government and administered by organizations such as the Environmental Protection Agency (EPA) and Mine Safety and Health Administration (MSHA). Co-requisite: The lab DMT 2805 must be taken concurrently with the lecture DMT 2801. Corequisites: DMT 2801

## Appendix C: Curriculum Map and Assessment Plan

# Snow College Automotive Technology Curriculum Map

### **Summary:**

Snow College Transportation Technology department offers an Automotive Technology program that follows the eight (8) Automotive Service Excellence (ASE) areas. Students are encouraged to take the ASE certification tests when they complete an area and the associated course numbers.

Students have three options. (1) They may complete any singular course for a school certificate. (2) Obtain any one or combination of State Certificates of Proficiency in Engine Performance, Engines and Drivetrains, Chassis and Climate Control, or Electrical Systems and Automatic Transmissions. (3) Obtain an Associate of Applied Science degree in Automotive Technology.

### **Outcomes:**

Students who complete an AAS degree or specific courses in any or all the eight ASE areas in Automotive Technology at Snow College will be expected to demonstrate that they:

1. Have completed lab tasks outlined by the National Automotive Technicians Education Foundation and Automotive Service Excellence (NATEF/ASE), and have completed 100% of priority one, 80% of priority two, and 60% of priority three tasks.
2. Have basic knowledge of the operation, function, diagnosis, and repair of internal combustion engines and their related fuel, ignition, and emissions systems.
3. Have basic knowledge of electrical theory including, the operation and function of electrical circuits, electrical components, and the diagnosis and repair of these circuits.
4. Have basic knowledge of the operation, function, diagnosis, and repair of components used in the drivetrain of automobiles, i.e.: transmissions, transaxles, transfer cases, differentials, etc.
5. Have basic knowledge of the operation, function, diagnosis, and repair of components used in the suspension and braking systems of automobiles.
6. Have basic knowledge of the operation, function, diagnosis, and repair of components used in the heating and air conditioning systems found in automobiles.
7. Upon graduation students will be prepared to take ASE certification tests to assist them in gaining quality employment in their desired field.

PROGRAM COURSEWORK AND ASSESSMENT	Knowledge Area: Automotive Technology							DIESEL & AUTO
	Completed lab tasks outlined by the (NATEF/ASE), and complete 100% of priority one, 80% of priority two, and 60% of priority three tasks	Have basic knowledge of the operation, function, diagnosis, and repair of internal combustion engines and their related fuel, ignition, and emissions systems	Have basic knowledge of electrical theory including, the operation and function of electrical circuits, electrical components, and the diagnosis and repair of these circuits	Have basic knowledge of the operation, function, diagnosis, and repair of components used in the drivetrain of automobiles, i.e.: transmissions, transaxles, transfer cases, differentials, etc.	Have basic knowledge of the operation, function, diagnosis, and repair of components used in the suspension and braking systems of automobiles	Have basic knowledge of the operation, function, diagnosis, and repair of components used in the heating and air conditioning systems found in automobiles	Be prepared to take ASE certification tests to assist them in gaining quality employment in their desired field

# Snow College Diesel Mechanics Technology Curriculum Map

## **Summary:**

Snow College offers a Diesel and Heavy-Duty Mechanics Technology program, which prepares the student to meet job entry requirements. This program covers the servicing and repairing of diesel and heavy-duty equipment and machines in preparation for becoming a successful Heavy-Duty Mechanic.

Students have three options. (1) They may complete any singular course for a school certificate. (2) Obtain any one or combination of State Certificates of Proficiency in Engine Performance, Engines and Hydraulics, Chassis and Electrical Systems, or Drivetrains and Climate Control. (3) Obtain an Associate of Applied Science degree in Diesel Technology.

## **Outcomes**

Students who complete an AAS in Diesel and Heavy-Duty Mechanics Technology will be expected to demonstrate that they:

1. Have completed lab tasks outlined by the National Automotive Technicians Education Foundation and Automotive Service Excellence (NATEF/ASE), and have completed 100% of priority one, 80% of priority two, and 60% of priority three tasks.
2. Have basic knowledge of the operation, function, diagnosis, and repair of internal combustion engines and their related fuel, ignition, and emissions systems.
3. Have basic knowledge of electrical theory including, the operation and function of electrical circuits, electrical components, and the diagnosis and repair of these circuits.
4. Have basic knowledge of the operation, function, diagnosis, and repair of components used in the drivetrain of trucks and heavy-duty equipment, i.e.: transmissions, transaxles, transfer cases, differentials, etc.
5. Have basic knowledge of the operation, function, diagnosis, and repair of components used in the suspension and braking systems of trucks and heavy-duty equipment.
6. Have basic knowledge of the operation, function, diagnosis, and repair of components used in the heating and air conditioning systems found in trucks and heavy-duty equipment.
7. Upon graduation students will be prepared to take ASE certification tests to assist them in gaining quality employment in their desired field.

# SNOW COLLEGE

## STRATEGIC ENROLLMENT MANAGEMENT

September, 2019

Update by Teri Clawson, Assistant Vice President for Enrollment Management

Over the past eight months, Enrollment Management has been busy working on a variety of projects and initiatives with regard to Strategic Enrollment Management. We missed the opportunity to increase the number of applications in our enrollment funnel, so we focused strictly on yielding more students who had already applied and been admitted. I am pleased to say our enrollment yield was 4% higher than last year! Below is a bulleted list of initiatives we have been working on, as well as upcoming projects. As we increase the applications in the funnel, our work during the last half of the admissions cycle and into the future will provide increased enrollments.

- The Admissions Office and the Office of Scholarships and Financial Aid worked together to create a communication plan to focus on affordability, quality of education, student life, financial aid/scholarship opportunities, etc. This is now an automated plan using the Admissions Office's CRM technology in order to get information to students in the enrollment funnel. We sent out thousands of communications, both in printed and electronic media, keeping Snow College in the forefront for prospective students, which greatly impacted the number of students who completed the process and started classes.
- Marketing worked with Enrollment Management to increase our presence on social media, where most students get their information about college.
- We negotiated with Ellucian, bringing them to campus, free-of-charge, to help us fix issues overlooked during the set-up of the CRM. We are now more effective using our CRM tools, reaching more students and improving the application experience.
- We held several Registration Open Houses across the Wasatch Front, in partnership with Academic Advising and other campus partners. Additionally we held a Priority Registration Open House for our six-county school. During the Open Houses we estimate we registered 300+ students.
- We focused on enrollment, as well as preventing students from "melting away" during the summer months after graduation. Our admissions staff made over 3,000 telephone calls to students eligible to register. We helped several students through the registration process successfully influencing their next semester.
- We hired Leticia Corona as scholarship coordinator and she is working tirelessly to get the office in order. She improved process that were out-of-date and unfriendly to students while documenting all the scholarship processes and procedures.

We are already working on these initiatives as we approach the upcoming admissions cycle:

- In July we invited consultants to campus to help us look at both recruitment and leveraging scholarships. We reviewed the enrollment funnel data and identified gaps. We started a contract to have them help us leverage our scholarship dollars better which will us with next fall's enrollment. We will host consultants on campus in the next month to solidify a plan for next year.

- Reallocating resources, we added an additional admissions advisor position to cover Utah and Salt Lake Counties better. Instead of one recruiter covering the majority of these areas and having over 90 schools to visit regularly, the new distribution will allow us to spend more time in individual schools and show more of a presence representing Snow College, especially in Utah County where we will have the largest impact.
- We moved the majority of our Snow Blast activities to the Spring to accommodate changes to the Utah Higher Ed Day tour, now focused on high school juniors. This will increase our attendance to an activity that makes a big impact on a student's decision to attend Snow College.
- We have planned several scholarship open houses during October to coincide with Utah College Application Week (Month).
- As part of the recommendations from our consultants, we are more focused on digital advertising. This includes digital ads geo-targeted to specific populations as well as digital marketing efforts in various high schools in the state.
- Snow College has a large concurrent enrollment population and we are working on a specific marketing campaign to these students. The goal is to convert more of our CE students into fully matriculated students next fall.
- Researching possibilities for targeted mailings based on interests, demographics, geographic locations.
- A full-time videographer and part-time social media specialist have been hired in the Marketing Office to assist with much-needed digital recruiting content.
